Map of Bi-State Region

Introduction

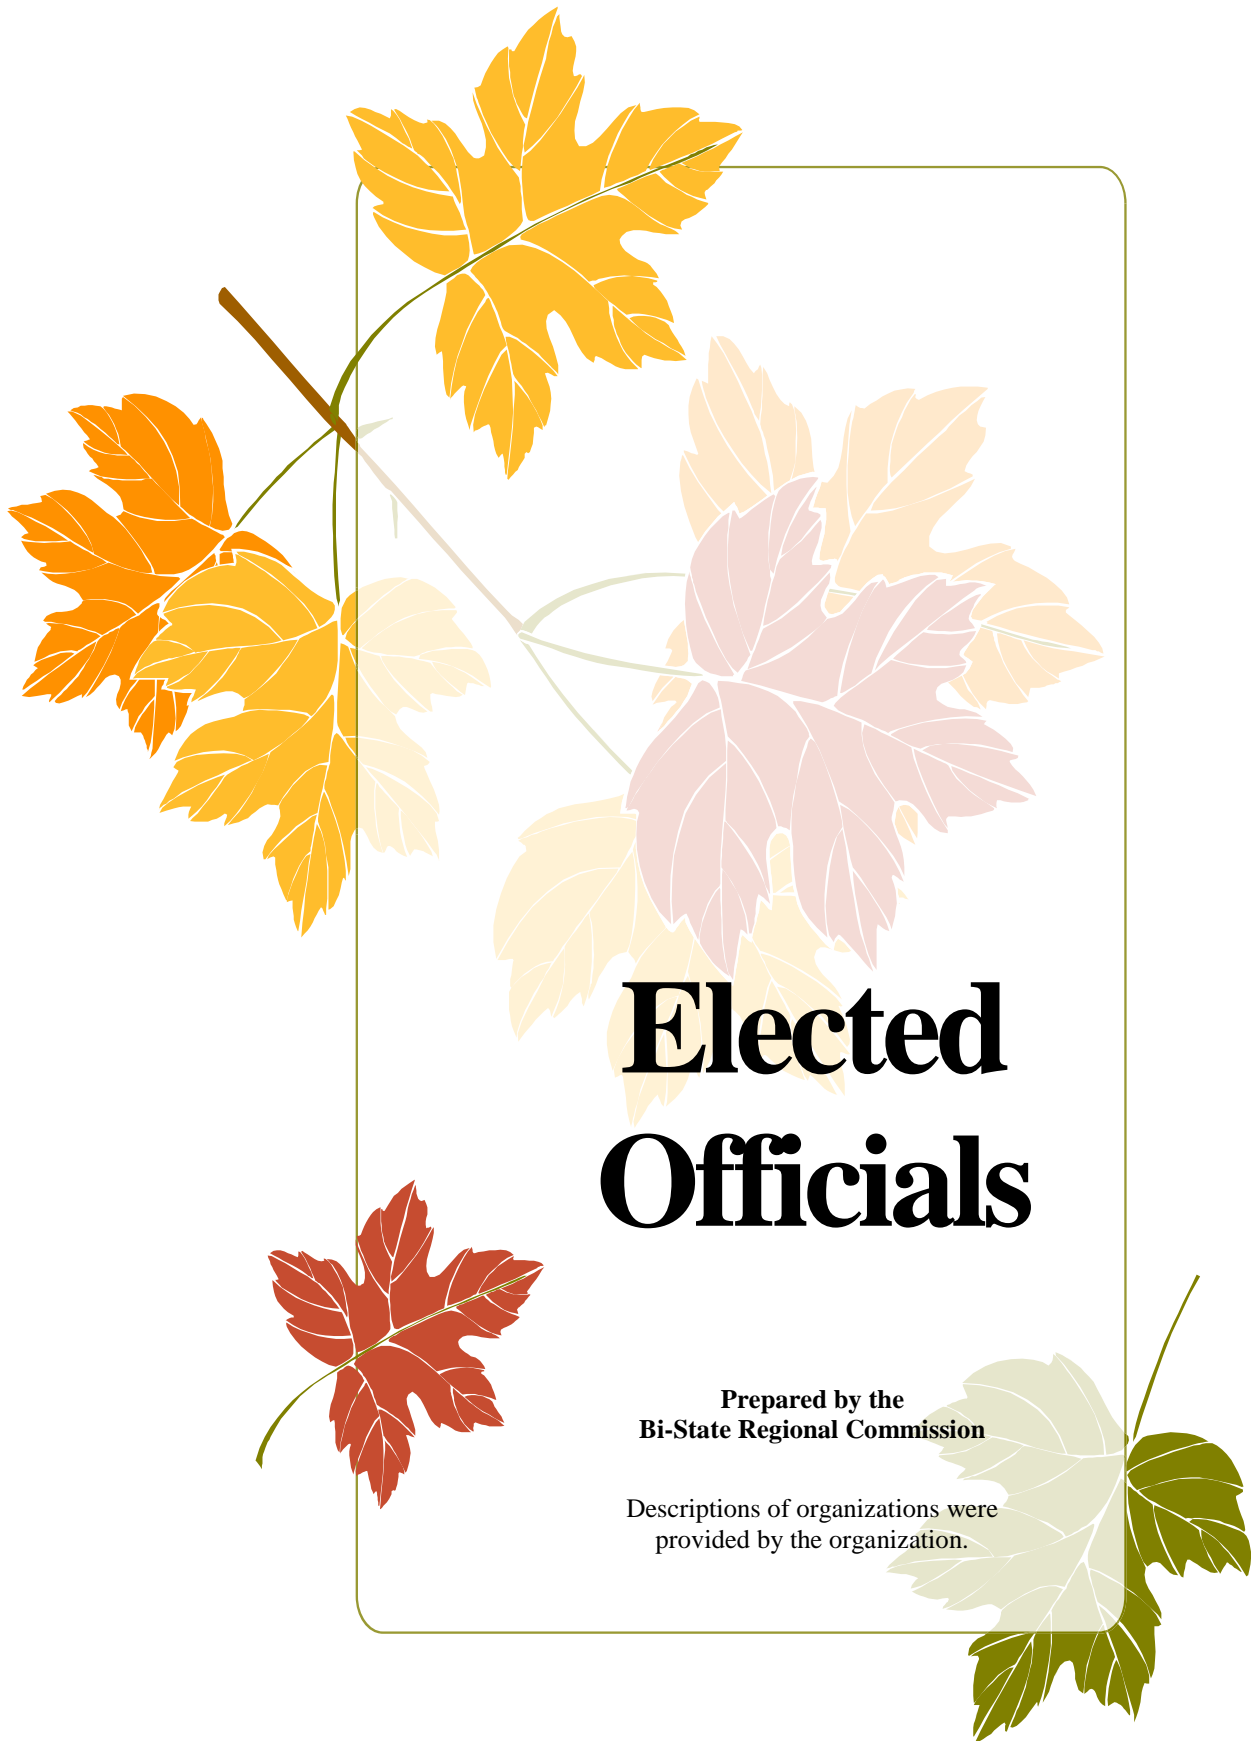

There are three major views on resource use. The economic or "use it" view is that if it is cost effective to extract it, use it, or develop it, then the resource should be used. Then there is the conservationist or "preserve it" view, which is that large portions of natural resources should be set aside in preserves for their aesthetic value, or to save the resource for future use. The third ethic is the ecological view that there should be a balance between using the resource and preserving it. The views are really a graduation of the same idea. This directory includes groups with all three viewpoints.

Americans are increasingly environmentally savvy in the 21st Century. However, America is still one of the most resource consumptive countries in a world where environmental concerns are growing annually. In an effort to increase environmental awareness and resource conservation, this directory provides a basis for research and data collection. This directory also lists many, but not all, of the elected officials, federal and state agencies, and organizations to contact for advice, assistance, education, or to report a problem. The focus of this directory is on regional, state, and national agencies and organizations with potential for funding influence or jurisdiction in the Bi-State region.

Elected officials set the guidelines and make the laws that directly control environmental hazards and resource use. The sharing of ideas and concerns with the representatives can have an impact on determining environmental policy. Officials listen to those who elect them. Furthermore, legislators and their staff provide information to constituents.

Numerous federal and state government agencies are concerned with the conservation of natural resources and the preservation of our natural heritage. The agencies are a source of information on the policies and programs related to open space conservation and can provide general technical assistance on the preservation of land resources. It is frequently important to coordinate and consult these resource organizations in the development of community projects and for transportation system improvements.

Additionally, many organizations have formed across the nation related to natural resources. These organizations formed because they felt the government was not meeting a need or because they wanted to provide the energy and guidance and take the action into their own hands. Some try to change one specific problem in one area, others reach out to problems involving the entire nation, or even beyond. Through united efforts and intergroup cooperation, these organizations have elevated the awareness of the general public and its elected officials. They have started and directed numerous conservation projects. Some organizations buy land, some lobby for legislation and some conduct research, while others educate the public or raise funds.

Elected Officials

provided by the organization.

How to Communicate with Elected Officials

The President

Envelope: The President
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

Salutation: Dear Mr. President:

E-mail: president@whitehouse.gov

Governors

Envelope: The Honorable _____
State Capitol
Springfield, IL 62706 OR
Des Moines, IA 50319

Salutation: Dear Governor _____:

United States Senators or State Senators

Envelope: The Honorable (full name)
__(Rm.#) __ (name of) Senate Office Building
United States Senate
Washington, DC 20510 OR
State Capitol
Springfield, IL 62706 OR
Des Moines, IA 50319

Salutation: Dear Senator _____:

United States Congressmen or State Representatives –

Envelope: The Honorable (full name)
__(Rm.#) __ (name of) House Office Building
United States House of Representatives
Washington, DC 20515 OR
State Capitol
Springfield, IL 62706 OR
Des Moines, IA 50319

Salutation: Dear Congressman _____: OR
Dear Representative _____:

Note: When writing to the Chair of a Committee or the Speaker of the House, it is proper to address them as:

Dear Mr. Chairman or Madam Chairwoman:

Dear Madam Speaker or Mr. Speaker:

Elected Officials

Tips on Writing Effective Letters:

The letter is the most popular choice of communication with a congressional office. If you decide to write a letter, this list of helpful suggestions will improve the effectiveness of the letter.

1. Your purpose for writing should be stated in the first paragraph of the letter. If your letter pertains to a specific piece of legislation, identify it accordingly, e.g., House bill: H. R. _____, Senate bill: S. _____.
2. Be courteous, to the point, and include key information, using examples to support your position.
3. Keep the letter to one page. Be specific; write on only one issue. Give reasons for your position and, if possible, the impact of the bill on you and the area the representative serves.
4. Use your own words. A personal, non-photocopied letter appears more meaningful than a form letter.
5. Be polite and reasonable. Do not make threats. It is strongly discouraged to begin with the self-righteous words, "As a citizen and a taxpayer..." or to say "I won't vote for you (again) unless..." Sharp, personal criticism will only alienate the representative.
6. If you are trained or skilled in the subject of the bill, or have some expert or firsthand knowledge, let the representative know. You can provide much needed information.
7. Finally, sign the letter and include a return address. If you will not stand behind your words, neither will your representative.

Additional options to letters:

- ✓ **Phone.** Use the same basic guidelines as for letter writing. To find your senators' and representative's phone numbers, you may use the searchable online congressional directory at <https://ssl.capwiz.com/congressorg/directory/congdir.tt>. Or, call the U.S. Capitol Switchboard at (202) 224-3121 and ask for your senators' and/or representative's office.

Remember that a staff member, not the member of Congress, usually takes telephone calls. Ask to speak with the aide who handles the issue about which you wish to comment.

After identifying yourself, tell the aide you would like to leave a brief message, such as: "Please tell Senator/Representative (Name) that I support/oppose (S.____/H.R.____)."

You will also want to state reasons for your support or opposition to the bill. Ask for your senators' or representative's position on the bill. You may also request a written response to your telephone call.

- ✓ **Visit.** If you are in Washington, Des Moines or Springfield, consider visiting your representatives. Many also have local offices.
- ✓ **E-Mail.** Elected officials have an e-mail address. Federal Congressmen each have a fill-in-the-blank e-mail form available on the Congressman's website. Federal Congressmen can only accept e-mail from their constituents. With this fill-in-the-blank website form, the public cannot e-mail a Congressmen who does not represent them.
- ✓ **Social Web Sites.** Many elected officials communicate information to constituents through sites such as Facebook and Twitter.

United States Congressional Committees

(Concerned with Environmental Issues and Resource Management)

United States Senate:

Committee on Agriculture, Nutrition, and Forestry

This committee is concerned with all things related to agriculture, nutrition, and forestry.

Room 328-A
Russell Building
Washington, DC 20510
(202) 224-2035
Fax: (202) 228-2125
<http://www.agriculture.senate.gov/>

Committee on Appropriations

This committee is concerned with all matters related to appropriations of revenue for support of the government.

Room S 128
Capitol Building
Washington, DC 20510
(202) 224-7257
<http://appropriations.senate.gov/>

Committee on Commerce, Science, and Transportation

This committee is concerned in the following areas: Coast Guard; coastal zone management; inland waterway; marine fisheries; weather and atmospheric activities; testing related to toxic substances; science, engineering, and technology research; transportation; navigation; interstate commerce; and communications.

Russell Senate Office Building
Washington, DC 20510
(202) 224-0411
<http://commerce.senate.gov>

Committee on Energy and Natural Resources

This committee is concerned with the following areas: energy resources and development, including regulation, conservation, strategic petroleum reserves, and appliance standards; nuclear energy; Indian affairs; public lands and their renewable resources; surface mining, federal coal, oil, and gas, other mineral leasing; territories and insular possessions; and water resources.

304 Dirksen Building
Washington, DC 20510
(202) 224-4971
<http://energy.senate.gov>

Elected Officials

Committee on Environment and Public Works

This committee is concerned with all aspects of the environment from pollution to wildlife, public works projects, transportation systems, air quality, flood protection, drinking water and wastewater systems, and climate change.

Majority Office
410 Dirksen Building
Washington, DC 20510-6175
(202) 224-8832

Minority Office
456 Dirksen Building
Washington, DC 20510-6175
(202) 224-6176

<http://www.epw.senate.gov/public/>

House of Representatives:

Committee on Agriculture

This committee is concerned with all aspects of agriculture; insect pests; protection of birds and animals in forest reserves; agricultural colleges and experiment stations; agricultural economics and research; agricultural education extension services; agricultural production and marketing and stabilization of prices of agricultural products, and commodities; animal industry and diseases of animals; soil conservation; inspections; forestry; human nutrition and home economics; plant industry, soils, and agricultural engineering; rural electrification and development; and water conservation related to activities of the Department of Agriculture.

1301 Longworth House Office Building
Washington, DC 20515
(202) 225-2171
Fax: (202) 225-4464
E-mail: AgRepublicanPress@mail.house.gov
<http://agriculture.house.gov/>

Committee on Appropriations

This committee is concerned with the appropriations for support of the government.

Room H-305
The Capitol
Washington, DC 20515
(202) 225-2771
<http://appropriations.house.gov/>

Committee on Energy and Commerce

This committee is concerned with the promotion of commerce, public health, energy, and technology.

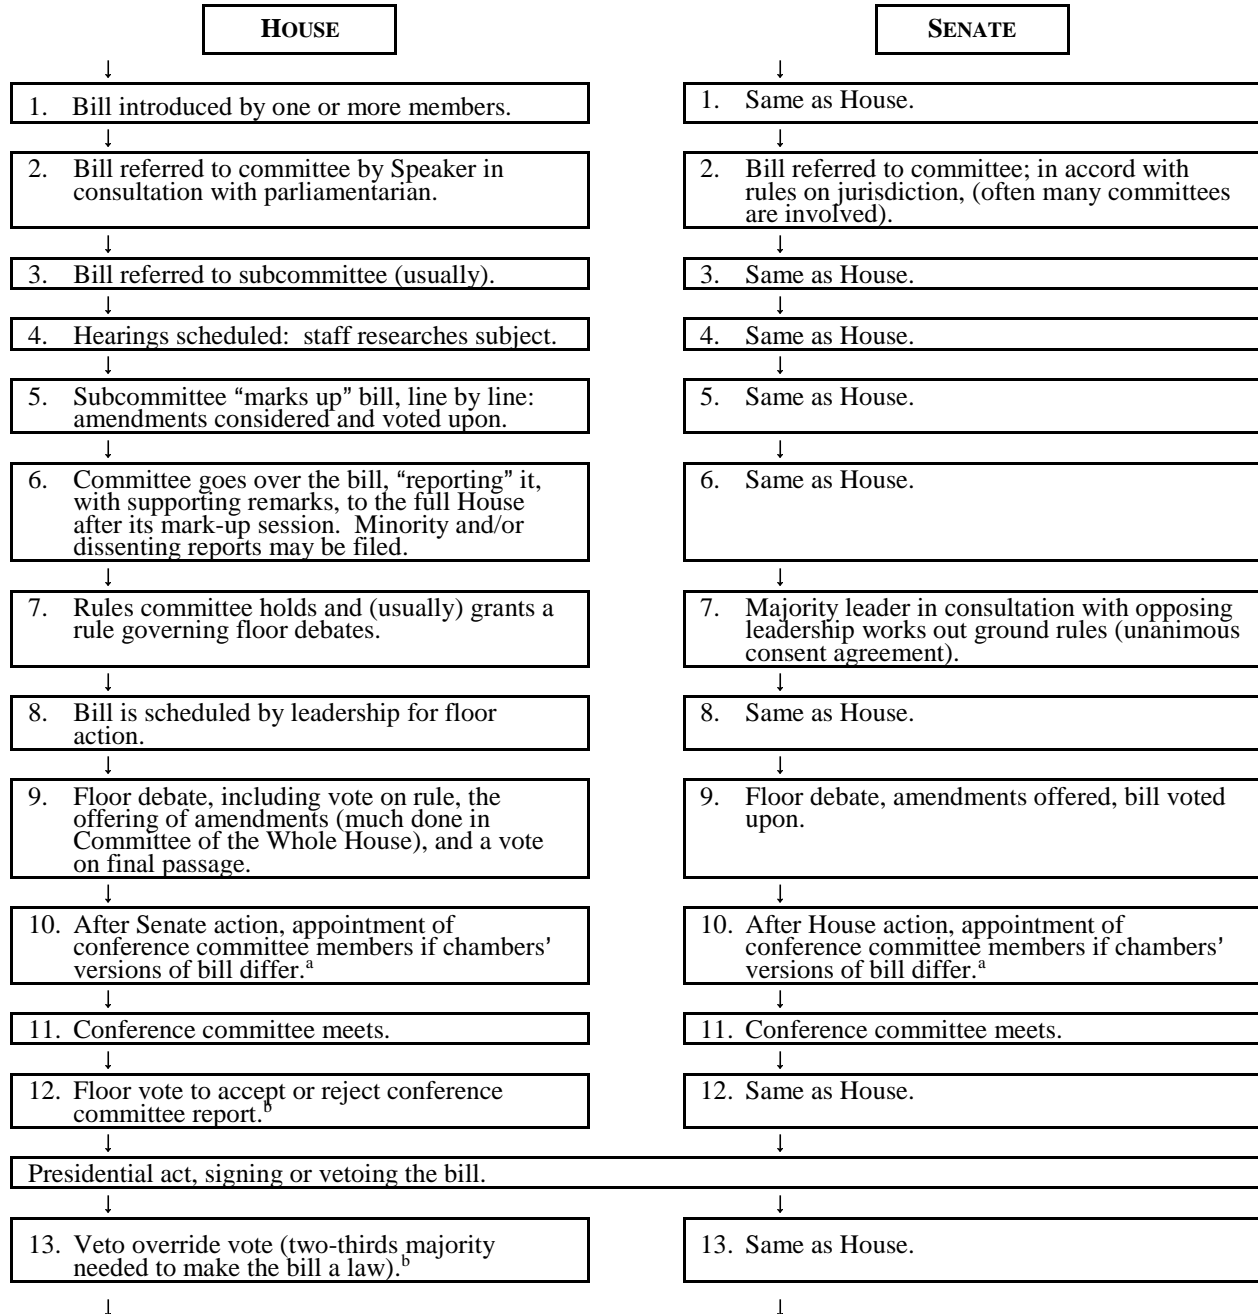

2322 Rayburn House Office Building
Washington, DC 20515
(202) 225-2927
<https://energycommerce.house.gov>

Committee on Natural Resources

This committee is concerned with American energy production; mineral lands and mining; fisheries and wildlife; public lands; oceans; Native Americans; irrigation; and reclamation.

1324 Longworth House Office Building
Washington, DC 20515
(202) 225-2761
Fax: (202) 225-5929
<http://naturalresources.house.gov/>

The Path from Bill to Law

^a - Either House may adopt the other’s bill, thus eliminating the need for a conference.

^b - These are absolute “yes or no” votes, without the possibility of amendment.

Federal Agencies

**Prepared by the
Bi-State Regional Commission**

Descriptions of organizations were
provided by the organization.

U.S. Government – Executive Branch

Council on Environmental Quality

One of the major duties of the White House Council on Environmental Quality is to develop and recommend to the President national policies to foster and promote the improvement of environmental quality to meet the conservation, social, economic, health, and other requirements and goals of the nation.

722 Jackson Place, N.W.
 Washington, DC 20503
 (202) 394-5750
 Fax: (202) 456-6546
 Chair: Brenda Mallory
 Administrative Officer: Essence Tillett – (202) 395-5750
<http://www.whitehouse.gov/ceq/>

Department of Agriculture (USDA)

The Department of Agriculture provides leadership on food, agriculture, natural resources, and related issues based on sound public policy, the best available science, and efficient management.

USDA
 National Resources Conservation Service
 1400 Independence Avenue S.W., Room 200A
 Washington, DC 20250
 Fax: (202) 720-2166
 Secretary: Tom Vilsack
 Emergency Operations Center
<http://www.usda.gov>

USDA – Farm Service Agency (FSA)

The FSA was formerly the Agricultural Stabilization and Conservation Service (ASCS). The Farm Service Agency implements agricultural policy, administers credit and loan programs, and manages conservation, commodity, disaster and farm marketing programs through a national network of offices

National Institute of Food and Agriculture (NIFA)

All universities engage in research and teaching, but the nation's more than 100 land-grant colleges and universities, have a third critical mission – extension. "Extension" means "reaching out," and – along with teaching and research – land-grant institutions "extend" their resources, solving public needs with college or university resources through non-formal, non-credit programs. These programs are largely administered through thousands of county and regional extension offices, which bring land-grant expertise to the most local of levels. Both the universities and their local offices are supported by NIFA, the federal partner in the Cooperative Extension System (CES). NIFA plays a key role in the land-grant extension mission by distributing annual congressionally appropriated formula grants to supplement state and county funds.

Today, extension works in six major areas:

- 4-H Youth Development
- Agriculture and Food Nutrition
- Leadership Development
- Environment and Natural Resources
- Family and Consumer Sciences
- Community and Economic Development

Federal Agencies

Natural Resources Conservation Service (NRCS)

The Natural Resources Conservation Service provides technical assistance to individuals, groups, and local and state governments to help people conserve, maintain, and improve our natural resources and environment. NRCS services include assistance programs, resource conservation development and community/off-farm assistance; easement programs and conservation planning; science-based technology and technical tools related to conservation engineering, practice standards, air quality (supporting the USDA Agricultural Air Quality Task Force), energy conservation, nutrient management, and other ecological issues; soil science, soil survey and resource assessment; and technical assistance.

Department of Defense (DOD)

U.S. Army Corps of Engineers

The Corps of Engineers' primary concern is for flood control and navigation of waterways. Located in this office are specialists in biology, archaeology, geology, soil science, urban environmental impact statement writing, engineering hydrology, graphics, and photography. These professionals can provide technical advice and assistance to landowners with flooding or other water-related problems.

U.S. Fish and Wildlife Service (FWS)

The Fish and Wildlife Service aids in the conservation of the nation's migratory birds, certain mammals, and sport fishes through acquiring and developing wildlife refuges, operating fish hatcheries, monitoring development projects through environmental impact assessments, and enforcing wildlife protection laws. The U.S. Fish and Wildlife Service also administers federal aid to state governments for its programs, conducts research, provides information and technical assistance to other agencies, operates a public environmental education program, and has copies of the wetland inventory for viewing. The district office, part of the National Wildlife Refuge System, manages part of the Mark Twain Wildlife Refuge. The field office is responsible for review of all federal environment impact actions in Iowa and the north half of Illinois.

Illinois Department of Natural Resources (IDNR)

The Department of Natural Resources is the combination of the Department of Conservation, the Department of Mines and Minerals, the Abandoned Mined Lands Reclamation Council, the Division of Water Resources of the Department of Transportation, and portions of the Department of Energy and Natural Resources. The preservation, conservation, and enhancement of Illinois' natural and cultural resources are the responsibility of the IDNR. Fishery, forestry, and wildlife habitat management assistance programs are available for public and private land. The regional office of the IDNR should be one of the first contacts regarding the preservation of natural areas in Illinois. Professional staff is available to visit the site, give technical advice, and make recommendations for preservation.

Illinois Conservation Foundation (ICF)

The Illinois Conservation Foundation is a non-profit organization and was formed after a recommendation at the first Illinois Conservation Congress by a volunteer group of citizens throughout Illinois. The ICF was established by law in 1994. The 13-member board is appointed by the Governor and four legislative leaders and is chaired by the Director of the Illinois Department of Natural Resources.

Illinois Nature Preserves Commission

The commission is a Governor-appointed, nine-member commission dedicated to formally and legally protecting natural, undisturbed areas. This is mainly done by dedication of the land as a nature preserve. Once dedicated, the land is protected from development. The commission has focused on land identified in the 1979 Natural Areas Inventory and has contacted all landowners in the top priority category

Illinois Department of Commerce and Economic Opportunity (DCEO)

State Agencies

The Illinois Department of Commerce is the state agency that leads economic development efforts for Illinois. Its main focus is to retain and create jobs in Illinois by marketing to:

- Existing businesses, encouraging them to reinvest and create more jobs for Illinois citizens
- New businesses, inviting them to relocate, invest, and create new jobs
- International companies, positioning Illinois as a global business destination for Foreign Direct Investment
- Entrepreneurs and investors, connecting resources to support their startups and ventures
- Locally and globally promoting Illinois as a world-class tourism and film destination

DCEO is organized into the following offices that are laser focused on economic growth for the State of Illinois: Business Development; Community Development; Employment & Training; Energy & Recycling; Energy Assistance; Entrepreneurship, Innovation & Technology; Film; Tourism; Trade & Investment; and Urban Assistance.

Bureau of Air (BOA)

The Bureau of Air (BOA) is composed of two divisions. The purpose of the Division of Air Pollution Control (DAPC) is to improve air quality by identifying air pollution problems, propose regulations to reduce or control contaminants, and conduct inspections and reviewing permit applications to assure compliance with regulations. The other division is the Division of Mobile Source programs whose primary purpose is to enforce vehicle emission limitations.

Illinois Soil and Water Conservation Districts (SWCD)

Soil and Water Conservation Districts are non-taxing local government entities mandated by state statute to protect the land, water, and related resources located in its borders. Each is governed by a five-member board of directors and is empowered to enter into private and public partnerships. SWCDs receive their funding through appropriations made by the Illinois General Assembly and from local sources, including county and municipal governments.

The Prairie Research Institute

The Institute of Natural Resource Sustainability is now officially the Prairie Research Institute at the University of Illinois at Urbana-Champaign.

The Scientific Surveys of the University of Illinois at Urbana-Champaign are the primary agencies in Illinois responsible for producing and disseminating scientific and technological information, services, and products related to the environment, economic development, and quality of life. To achieve this mission, the Scientific Surveys conduct state-of-the-art research and collect, analyze, archive, and disseminate high-quality, objective data and technical information.

Praveen Kumar
Executive Director

E-mail kumar1@illinois.edu
www.prairie.illinois.edu

State Agencies

The following are divisions of the Prairie Research Institute (PRI) of the University of Illinois at Urbana-Champaign (UIUC):

The Illinois State Water Survey (SWS)

The organizational structure of the SWS includes four centers (Center for Atmospheric Science, Center for Chemistry & Technology, Center for Groundwater Science, and Center for Watershed Science), and one national program (National Atmospheric Deposition Program), together with central administration and management functions conducted in the Office of the Director.

<https://www.isws.illinois.edu>

The Illinois State Geological Survey (ISGS)

The ISGS is the state Geological Survey serving the needs of Illinois with earth science information relevant to the state's environmental quality, economic vitality, and public safety. Scientists and technical support staff conduct basic and applied research in geology, compile geologic maps, and gather and manage the state's geological data to provide information to industry, governmental agencies, and the public about the geology and mineral resources of Illinois.

E-mail: info@isgs.illinois.edu
<http://isgs.illinois.edu>

The Illinois State Archeological Survey (ISAS)

ISAS conducts multiple-scale field and laboratory research projects that concentrate on interpreting the archaeological heritage of Illinois. ISAS disseminates information for professional and public audiences through publications, educational exhibits, lectures, school visits, displays, and electronic media. An integral part of ISAS's mission includes the curation of extensive archaeological research and museum-quality collections that include artifacts from over 3,000 Illinois sites. ISAS actively collaborates with numerous public interest organizations to preserve archaeological sites in conservation areas and parks across the state.

The Illinois Sustainable Technology Center (ISTC)

ISTC is a change agency that performs research, spreads awareness and facilitates implementation regarding practices, technology, and systems that improve sustainability. The Illinois Sustainable Technology Center (formerly the Waste Management and Research Center) provides assistance to Illinois businesses and the public. Services offered include: sophisticated analytical laboratory support, a library and clearinghouse on environmental and pollution prevention issues, technical assistance, and research funding to explore a wide range of issues affecting waste management in Illinois.

Iowa State Agencies

Department of Agriculture and Land Stewardship (IDALS)

Land stewardship is central to the work of the department. The Division of Soil Conservation provides farmers with expertise and funds to help them install practices that preserve our highly productive soil, prevent erosion, and protect our critical waterways. The department is responsible for regulating meat processing; commercial feed and fertilizer; pesticide application; agriculture statistics; homeland security; the Iowa horse and dog breeding program; dairy production and processing; farmers' markets promotion; and nutrition programs. The Weights and Measures Bureau makes sure both buyers and sellers are treated fairly at the gas pump, grocery store, or grain elevator. The State Climatologist, Entomologist, and Veterinarian are also all part of the department.

Mike Naig, Iowa Secretary of Agriculture

State Agencies

Iowa Department of Natural Resources (DNR)

The DNR manages fish and wildlife programs, ensures the health of Iowa's forests and prairies, and provides recreational opportunities in Iowa's state parks. Just as importantly, the DNR carries out state and federal laws that protect air, land, and water through technical assistance, permitting, and compliance programs. The DNR also encourages the enjoyment and stewardship of natural resources among Iowans through outreach and education.

Organizations

**Prepared by the
Bi-State Regional Commission**

Descriptions of organizations were
provided by the organization.

American Farmland Trust

The American Farmland Trust was founded in 1980 by a group of farmers and citizens concerned about the rapid loss of farmland to development. The trust was formed to preserve prime agricultural land and to aid in the prevention of soil erosion. This is accomplished through three areas: Farmland Protection, Agriculture & Environment, and Growing Local.

American Farmland Trust

1150 Connecticut Avenue N.W., Suite 600
 Washington, DC 20036
 (202) 331-7300
 John Piotti, President
 E-mail: info@farmland.org
www.farmland.org

Farmland Information Center (FIC)

The FIC is a clearinghouse for information about farmland protection and stewardship. The FIC is a private/public partnership between the USDA Natural Resource Conservation Service (NRCS) and American Farmland Trust (AFT), which was authorized by the Farmland Protection Act (FPA).

(800) 370-4879
www.farmlandinfo.org

American Forests

American Forests is the oldest national non-profit conservation organization in the U.S. It advocates for the protection and expansion of America's forests by restoring watersheds, restoring forests, and planting trees.

American Forests

1220 L Street, NW, Suite 750
 Washington, DC 20005

Keep America Beautiful

Keep America Beautiful was founded in 1953 by a consortium of American businesses, nonprofit organizations, government agencies, and concerned individuals in reaction to the growing problem of highway litter that followed the construction of the Interstate Highway System, and an increasingly mobile and convenience-oriented American consumer. The original goal of the organization was to reduce litter through public service advertising (PSA) campaigns.

Periodicals

**Prepared by the
Bi-State Regional Commission**

Descriptions of organizations were
provided by the organization.

Periodicals

American Archaeology Magazine

American Archaeology is the only magazine devoted to the excitement and mystery of archaeology in the United States, with additional coverage of Canada and Latin America. In four issues each year, American Archaeology's colorful features and departments present the research breakthroughs, persistent puzzles, and unique personalities making news in this field.

The Archaeological Conservancy

1717 Girard Blvd. NE

Albuquerque, NM 87106

(505) 266-1540

<http://www.archaeologicalconservancy.org/american-archaeology-magazine/>

American Forests Magazine

American Forests, the oldest national nonprofit conservation organization in the country, advocates for the protection and expansion of America's forests. The magazine is published quarterly by the American Forests for \$25 per year for membership (includes magazine). The magazine can be purchased without membership for \$3/issue, and can be viewed online at www.americanforests.org/our-programs/magazine.

American Forests

1220 L Street NW, Suite 750

Washington, DC 20005

(202) 737-1944

Fax: (202) 737-2457

Audubon Magazine

This is a general magazine that explores nature and the environment through essays and photographs. It is published bi-monthly by the National Audubon Society for \$20 per year (includes membership in The National Audubon Society). Call to receive back issues if extra copies are needed.

National Audubon Society

225 Varick Street

New York, NY 10014

(212) 979-3196
