

TRANSPORTATION PLANNING WORK PROGRAM

FOR THE

QUAD CITIES IOWA/ILLINOIS

METROPOLITAN PLANNING AREA

July 1, 2025 to June 30, 2026 (FY 2026)

DRAFT March 2025

Including comprehensive, cooperative, and continuing transportation planning activities to be performed by:

Bi-State Regional Commission
Illinois Department of Transportation
Iowa Department of Transportation
and
Local Units of Government

with the assistance of:

U.S. DEPARTMENT OF TRANSPORTATION
(Federal Highway Administration and
Federal Transit Administration)
STATE OF ILLINOIS
STATE OF IOWA

The preparation of this report was financed in part through federal funds provided by the U.S. Department of Transportation, Federal Transit Administration and Federal Highway Administration. The findings, opinions, and conclusions expressed in this report are not necessarily those of these agencies. In accordance with Federal Law and policy, Bi-State Regional Commission is an equal opportunity employer and provider, and is prohibited from discriminating on the basis of race, color, national origin, age, disability, religion, sex, and familial status. (Not all prohibited bases apply to all programs.)

ABSTRACT

TITLE: Transportation Planning Work Program for the Quad Cities MPA/Davenport Iowa-Illinois Urbanized Area July 1, 2025 to June 30, 2026 (FY 2026)

AUTHOR: Bi-State Regional Commission

SUBJECT: A work program covering activities of the Bi-State Regional Commission, and state and local agencies involved with the cooperative, comprehensive and continuing transportation planning process.

PLANNING AGENCY: Bi-State Regional Commission
Rock Island, Illinois

SOURCE OF COPIES: Bi-State Regional Commission
1504 Third Avenue
Rock Island, Illinois 61201
www.bistateonline.org

ABSTRACT: The Transportation Planning Work Program describes the transportation planning activities of the Bi-State Regional Commission for the Fiscal Year 2026 beginning July 1, 2025 and ending June 30, 2026. The work of the Commission is carried out with full involvement and participation of local elected and appointed officials and other citizens.

Bi-State Regional Commission Staff

Denise Bulat, Executive Director

Gena McCullough, Deputy Director

Sarah Bambas, Planner
Maia Edmondson, GIS Analyst
Kim Ellis, Accounting Technician
Sarah Grabowski, Desktop Publisher
Becky Grems, Accounting Technician
Jill Henderson, Finance Manager
Nithin Kalakuntla, Transportation Engineer
Rich Keehner, MUNICES Project Manager

Kassie Keeney-McGurk, GIS/Graphics Coordinator
David Kovarik, Planner
Peggi Merchie, Accounting Technician
Ricky Newcomb, Senior Planner
Jim Schmedding, Interactive Media Designer
Bryan Schmid, Principal Planner
Zachary Sutton, Planner
Justine VanBlair, Accounting Technician

Transportation Policy Committee¹

Bob Gallagher, Mayor
City of Bettendorf, Iowa

Mike Matson, Mayor
City of Davenport, Iowa

Jazmin Newton
Alderman
City of Davenport, Iowa

Rick Dunn
Alderman
City of Davenport, Iowa

Reggie Freeman, Mayor
City of East Moline, Illinois

Sangeetha Rayapati, Mayor
City of Moline, Illinois

Dennis Gerard, Mayor^{3,4}
City of LeClaire, Iowa
(Alternate: Vacant)

Mike Thoms, Mayor
City of Rock Island, Illinois

Michael Bartels, Mayor⁴
Village of Coal Valley, Illinois
(Alternate: Duane Dawson, Mayor
Village of Milan, Illinois)

Richard "Quijas" Brunk, Chair²
Rock Island County Board

Ross Paustian
Scott County Board of Supervisors

Trisha Thompson
Region 2, District 2 and 3 Engineer
Illinois Department of Transportation
(Alternate: Faith Duncan)

Dave Krouth, Chair
Rock Island County Metropolitan
Mass Transit District

Carrie Butler (ex-officio, non-voting)
Administrator, Federal Transit
Administration – Region VII
(Alternate: Jared Austin)

Vershun Tolliver (ex-officio, non-voting)
Division Administrator
Federal Highway Administration – Illinois
(Alternate: Vacant)

Timothy Marshall (ex-officio, non-voting)
Division Administrator
Federal Highway Administration – Iowa
(Alternate: Sean Litteral)

Stuart Anderson, Director
Transportation Development Division
Iowa Department of Transportation
(Alternate: Hector Torres-Cacho,
District Transportation Planner)

¹ The Policy Committee voting is restricted to one vote for each voting member. Voting members may authorize an alternate, with the stipulation that alternates of elected officials also be an elected representative of the appropriate jurisdiction.

² Chair, Transportation Policy Committee

³ Vice-Chair, Transportation Policy Committee

⁴ The mayors of the cities of Buffalo, Eldridge, LeClaire, Princeton, and Riverdale in the Iowa portion and the cities and villages of Andalusia, Carbon Cliff, Coal Valley, Colona, Hampton, Milan, Oak Grove, Port Byron, Rapids City, and Silvis in the Illinois portion select a representative from their jurisdictions (Iowa and Illinois separately) to represent them on the Policy and Technical Committees.

Transportation Technical Committee¹

Brent Morlok, City Engineer²
City of Bettendorf, Iowa

Jeff Reiter, Economic Development Director
City of Bettendorf, Iowa

Brian Schadt, City Engineer
City of Davenport, Iowa

Gary Statz, Engineer
City of Davenport, Iowa

Bruce Berger, Community Planning & Economic
Development Director
City of Davenport, Iowa

Tim Kammler, City Engineer³
City of East Moline, Illinois

Mark Rothert, City Administrator
City of East Moline, Illinois

Nevada Lemke, City Administrator⁴
City of Eldridge, Iowa

Jerry Lebovitz, City Administrator⁴
City of Silvis, Illinois
(Alternate: Nick Gottwalt, Carbon Cliff, Illinois)

K.J. Whitley, Community Development Program
Manager
City of Moline, Illinois

David Dyer, City Engineer
City of Moline, Illinois

Tanner Osing, Planning and Zoning Manager
City of Rock Island, Illinois

Mike Kane, City Engineer
City of Rock Island, Illinois

Scott Stephenson, County Engineer
Henry County, Illinois

Matt Miller, Public Works Engineer
Rock Island County, Illinois

Greg Thorpe, Director of Building & Zoning
Rock Island County, Illinois

Jeff Nelson, General Manager
Rock Island County Metropolitan
Mass Transit District

Greg Schaapveld, Planning & Development Director
Scott County, Iowa

Angie Kersten, County Engineer
Scott County, Iowa

Vacant
Federal Highway Administration
Illinois Division

Sean Litteral
Federal Highway Administration
Iowa Division

Jared Austin
Federal Transit Administration

Katie Smith
Illinois Department of Transportation

Hector Torres-Cacho
Iowa Department of Transportation

¹ The Technical Committee system allows one vote per agency with delegated representative voting permitted in the absence of an agency's listed member. The City of Davenport has three votes. Transit managers for Bettendorf Transit and Davenport CitiBus are invited.

² Chair, Transportation Technical Committee.

³ Vice-Chair, Transportation Technical Committee.

⁴ The mayors of the cities of Buffalo, Eldridge, LeClaire, Princeton, and Riverdale in the Iowa portion and the cities and villages of Andalusia, Carbon Cliff, Coal Valley, Colona, Hampton, Milan, Oak Grove, Port Byron, Rapids City, and Silvis in the Illinois portion select a representative from their jurisdictions (Iowa and Illinois separately) to represent them on the Policy and Technical Committees.

NOTE: Additional membership may include advisory representatives from the Illinois and Iowa Departments of Transportation, planning and research engineers from the Illinois and Iowa Federal Highway Administration, and a community planning representative from the Federal Transit Administration Region VII.

1. Introduction

Purpose

The Transportation Planning Work Program (TPWP), federally known as the Unified Planning Work Program (UPWP). It is intended to serve a number of local, state, and federal purposes for the current program year. Locally, the program serves to:

- Provide for coordination among many local units of governments cooperating in the metropolitan transportation planning effort
- Establish continuing, comprehensive, and cooperative area wide planning within the Quad Cities metropolitan area and within the Bi-State Region
- Assist in the development of budgets for transportation planning activities and in the preparation of requests for planning funds
- Delineate requirements for the various agencies involved in the planning efforts
- Establish products, purposes, and general methods to be employed in the conduct of specific transportation planning work elements

Federal and state agencies use the TPWP for monitoring and evaluating: 1) the progress of transportation planning; 2) the effectiveness of the planning program in addressing key regulations, issues and problems; and 3) as an aid in allocating federal planning funds. These efforts go back to the Long Range Transportation Plan (LRTP) goals and objectives for transportation planning and they frame work activities identified in the TPWP. Transportation plays a supportive role in our local economy moving goods and services. The LRTP metro development goals are reinforced by the transportation objectives, and further implemented through the planning and programming process. The transportation objectives in the *Connect QC 2050: Quad Cities Long Range Transportation Plan* include the following:

Increase Accessibility and Mobility Options

- Maintain, improve, and expand river crossing capacity
- Support implementation of passenger rail service to/from the Quad Cities
- Design the transportation system to provide convenient access to essential services and alternative transportation options for the movement of goods and people, giving consideration to types of users, surrounding context, and service levels (e.g. Complete Streets)
- Encourage land use patterns and transportation services that support transportation alternatives (bus, bike, and pedestrian options), and provide choices for mobility and access
- Promote and enhance facility and service design for persons with disabilities, the elderly, and low-income individuals
- Improve connections to existing modal facilities – airports, barge, rail, and motor freight terminals – and remove or reduce impediments to the movement of goods and services
- Study the feasibility of bus rapid transit, express bus and park-n-ride enhancements to the overall transit system.

Increase Transportation System Safety

Section 1 – Introduction

- Encourage comprehensive transportation safety solutions through engineering, enforcement, education, and emergency response to reduce traffic fatalities and severe injury crashes, as well as crash frequencies overall
- Support programs that ensure safe operation of the transportation system for motorized and nonmotorized users, including adequate safety data for problem identification and analysis

Emphasize System Preservation

- Support projects that preserve and improve the condition of the existing transportation system in order to maintain a state of good repair
- Preserve planned and proposed transportation corridors whenever feasible

Engage in Efficient Operations and Management of the Transportation System

- Seek ways to reduce recurring and non-recurring congestion, and bottlenecks in the transportation network.
- Use technology-based strategies to improve traffic flow, better transit operations, and applications to other modes or intersection of modes of transportation.
- Encourage roadway network improvements to support deployment of autonomous vehicles and other advances in mobility services.

Enhance the Connectivity and Integration Among Modes

- Promote interconnections between passenger modes and encourage integrated facilities where intracity and intercity transportation facilities link to other modes, such as transit centers, bicycle facilities, sidewalks, or park-and-ride locations
- Consider connectivity of the various transportation modes in the development of freight transportation facilities
- Promote efficient system management and operation through the use of technology and innovative, context-sensitive solutions
- Encourage use of travel demand management techniques, work zone management, incident response, and Intelligent Transportation Systems (ITS) for better transportation system performance
- Work to coordinate transportation systems through management and operations strategies to reduce congestion and enhance mobility, including support of data collection, analysis, and access to traveler information
- Promote area-wide uniformity in traffic regulations, signs, and enforcement

Protect and Enhance the Environment

- Consider urban design context of the community for culture, diversity, history, aesthetics, and the natural environment in development of transportation facilities
- Develop a balanced multi-modal system that enhances the environment and minimizes effects on the quality of the air, land, and water as well as effects to protected groups under Title VI requirements for improved quality of life
- Promote energy conservation and air emission reduction measures to improve air quality and reduce dependence on a single energy source
- Promote early environmental consultation and coordination with resource agencies on planning transportation facilities to identify and develop potential mitigation strategies as part of project development

Support Economic Vitality

- Use transportation project programming to support desired development patterns – fill gaps, connect employment centers and attractions, and invest in planned corridors
- Consider regional travel patterns and commuting in the development of the transportation network to encourage proximity of residential areas to jobs in and around the planning area as a process to support affordable housing and healthy lifestyles
- Improve air freight, barge, rail, and truck terminals to enable competitiveness and address freight reliability and capacity needs for productivity and efficiency
- Improve project delivery by accelerating project completion, eliminating delays in the project development and delivery process, reducing regulatory impediments and improving agencies' work practices

Increase Transportation System Security

- Support transportation system redundancy to provide alternatives, mobility, and connectivity during emergency situations
- Support programs that ensure secure operation of the transportation system for motorized and nonmotorized users, including adequate transportation data useful for emergency response and/or evacuations
- Encourage cooperative communications and monitoring systems to observe and react to changing conditions and transportation system hazards, natural or man-made

Address System Resilience

- Protect and enhance vulnerable transportation facilities subject to recurring extreme weather events that serve critical and/or vulnerable facilities to eliminate or reduce disruptions in the system as a whole.
- Assess planned and new projects for extreme weather vulnerability and evaluate mitigation strategies or actions to reduce impacts.
- Consider building more durable and resilient transportation facilities if damaged and rebuilt.
- Support air emission reductions to lesson impacts for resilience from natural disasters.

The Infrastructure Investment and Jobs Act (IIJA) or Bi-Partisan Framework (BIF) continues the federal metropolitan transportation planning processes and outlines the federally required elements to be conducted by the Metropolitan Planning Organization, which is Bi-State Regional Commission in the Quad Cities. IIJA was enacted in November 2021 and will expire September 30, 2026. IIJA extends the Federal performance management goals to address the following performance measures:

Safety—To achieve a significant reduction in traffic fatalities and serious injuries on all public roads; as well as transit safety

Infrastructure condition—To maintain the highway infrastructure asset system in a state of good repair and maintain transit assets and facilities in a state of good repair

Congestion reduction—To achieve a significant reduction in congestion on the National Highway System, such as interstates and U.S. highways

System reliability—To improve the efficiency of the surface transportation system

Freight movement and economic vitality—To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development

Environmental sustainability—To enhance the performance of the transportation system while protecting and enhancing the natural environment

Reduced project delivery delays—To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices

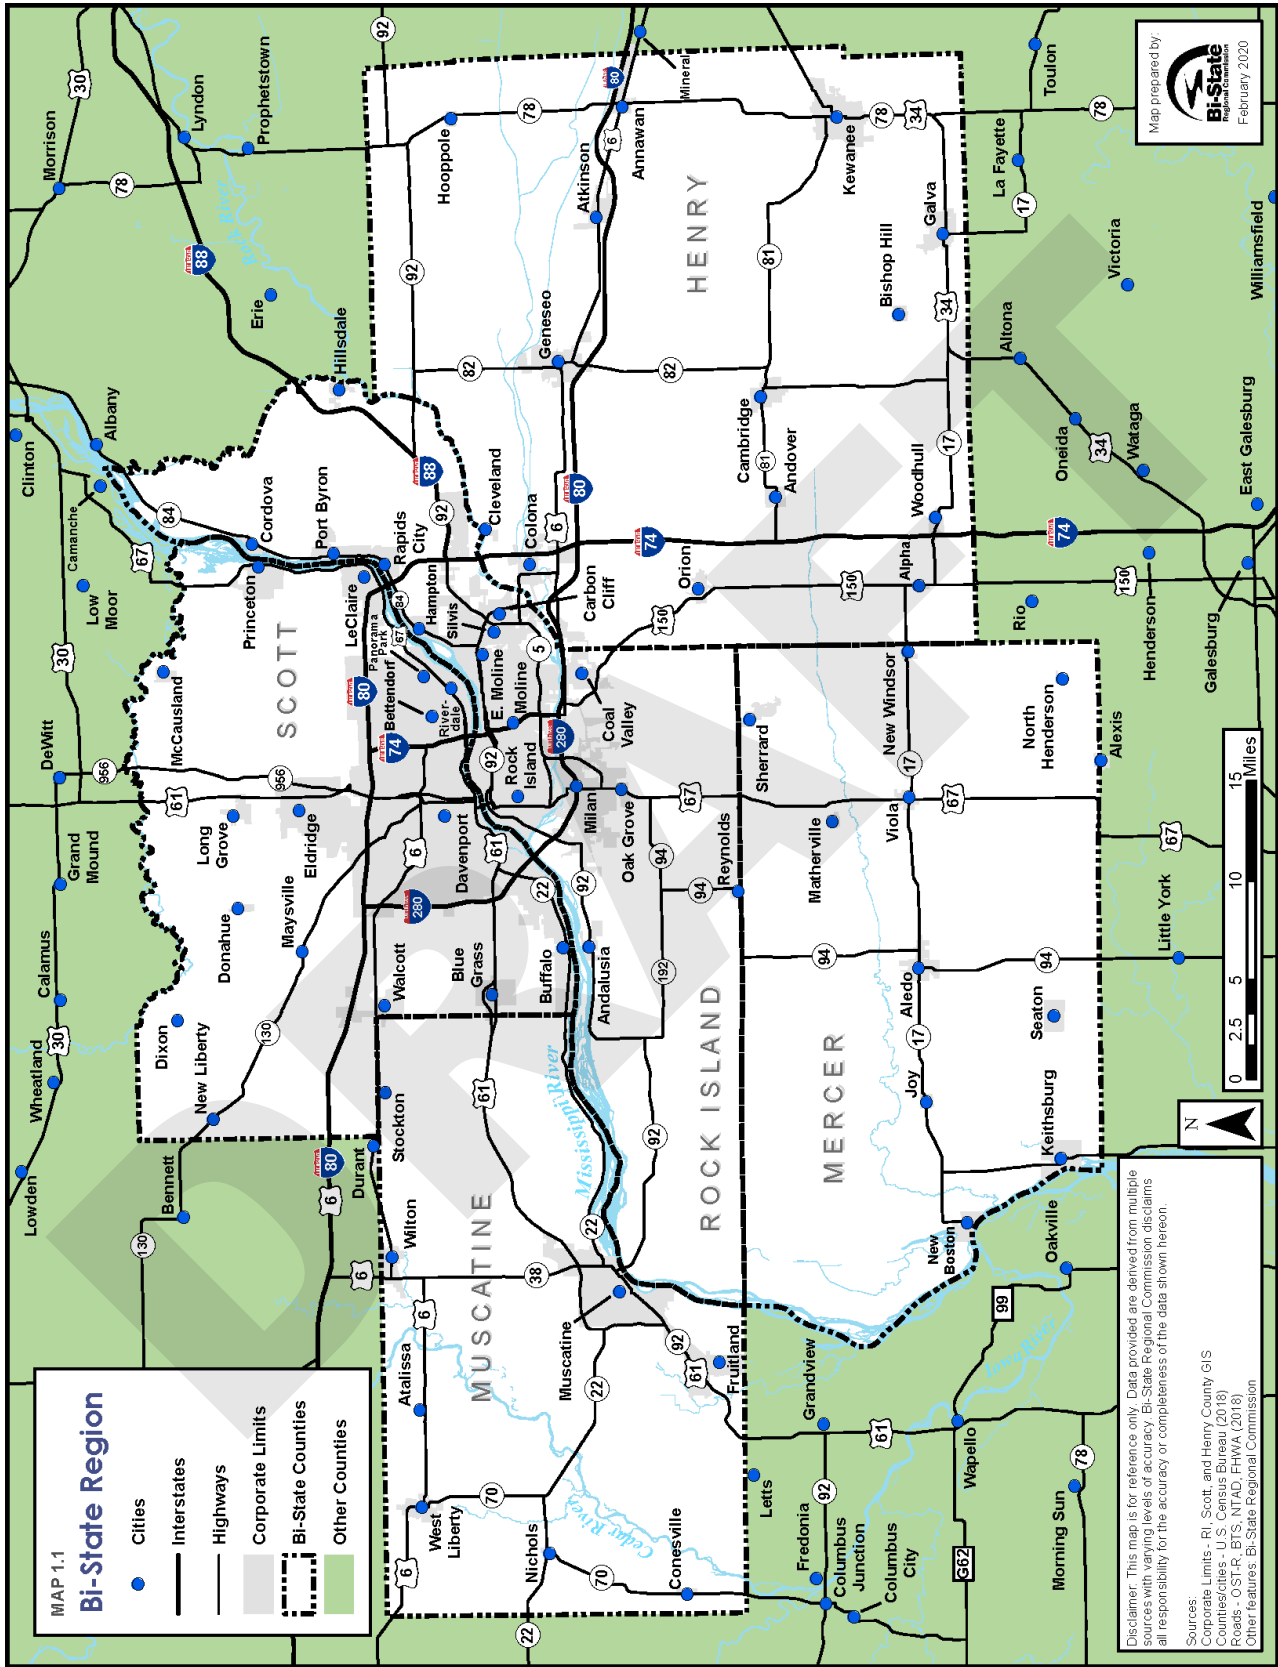

Locally, the transportation planning process incorporates these national goals into the metropolitan transportation planning process, supports each States' or local transit systems' respective performance targets, and works with each to identify and address system improvements. IJA also furthered prior transportation reauthorizations of transportation planning for resilience and reliability; consideration of travel and tourism; and integration of private transit systems into the planning process, such as public ports, intercity bus operators, and employer-based commuting programs. Additionally, U.S. Department of Transportation (USDOT) released Planning Emphasis Areas (PEAs) on December 30, 2021 that further focus the comprehensive, continuing, and coordinated transportation planning efforts. These PEAs, until they are revised or rescinded, are to be integrated into the local long range transportation plan with subsequent updates, and will be facilitated between federal, state and local partners. They relate to the transportation system being resilient in the face of natural disasters, bringing a wide variety of participants into the planning process, furthering non-motorized transportation, coordinating with the Department of Defense to ensure access to essential DOD facilities, using decision-making tools to improve project delivery timing; and advancing data sharing for improved policy development and decision-making at local, regional, and state levels.

Bi-State Region and Study Area

The study area or Metropolitan Planning Area (MPA) boundary for transportation planning covers 391 square miles, a slightly larger area than the Census-designated Davenport, Iowa-Illinois Urbanized Area. The study area is referred to as the Quad Cities Metropolitan Planning Area (MPA). Bi-State Regional Commission is the Metropolitan Planning Organization (MPO) responsible for transportation planning in the study area. The Transportation Planning Work Program (TPWP) describes the federally-funded transportation planning activities for this two-state metropolitan area conducted through Bi-State Regional Commission.

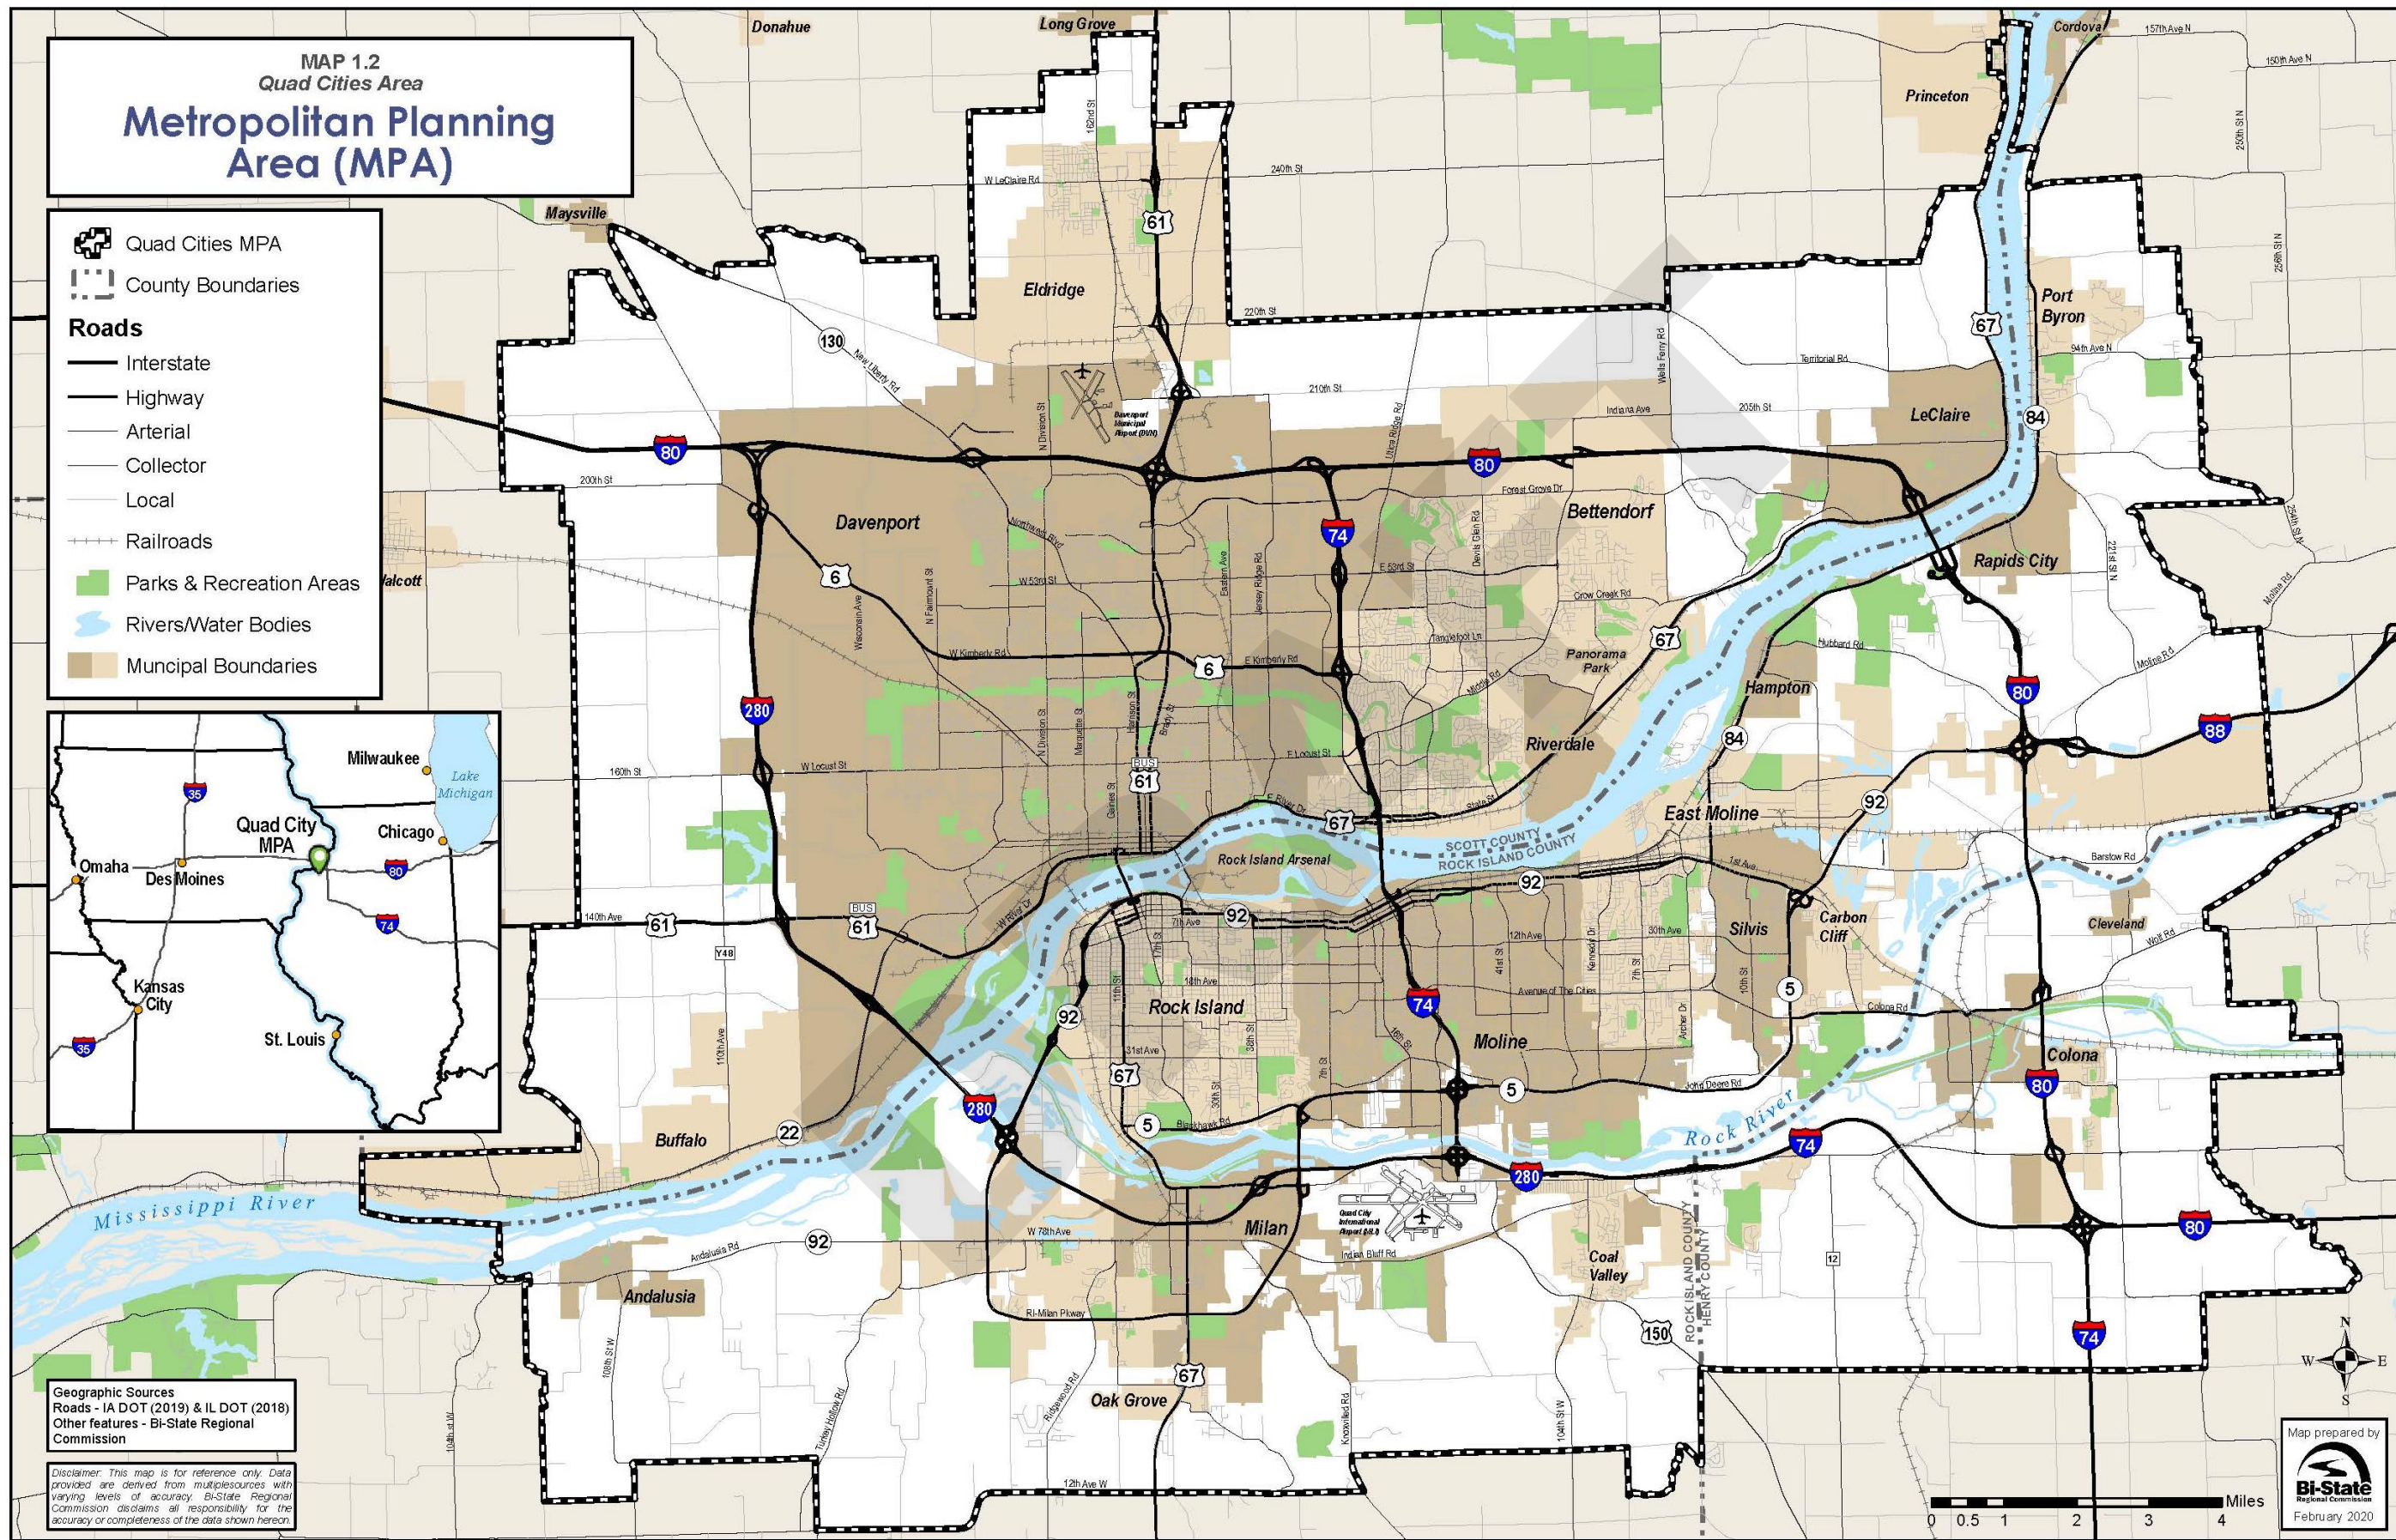

With the study area population over 200,000, the Quad Cities MPA is also classified as a Transportation Management Area (TMA) and subject to certain federal requirements based on this population threshold. The study area population is 301,060 (2023 Esri/ACS). The study area is centrally located in the Bi-State Region. There are 2,721 square miles in the five-county Bi-State Region, with Scott County containing 454 square miles; Muscatine County, 448 square miles; Rock Island County, 424 square miles; Henry County, 826 square miles; and Mercer County, 569 square miles. Travel in and out of the metropolitan area from the Bi-State Region feed into the transportation system.

Maps 1.1 and 1.2 show the Bi-State Region highway network as it feeds into the metropolitan planning area for the Quad Cities MPO and Census-Designated Davenport, IA-IL Urbanized Area.

2. ORGANIZATION

Background and Metropolitan Planning Organization Formation

Provisions of the 1962 Federal-Aid Highway Act brought initial efforts to provide a program of comprehensive area wide planning. Transportation planning on each side of the Mississippi River in the Quad Cities began independently of the other. The Illinois portion began in November 1963, while Scott County's program started in January 1965. Separate consultant contracts were initiated in each county, administered by the then Division of Highways in Illinois and the Scott County Metropolitan Planning Commission in Iowa. Under a Resolution of Cooperation, approved in March 1965, the groups from both sides of the river began meeting together as the Joint Transportation Policy Committee to consider and resolve matters of region-wide transportation planning significance.

When the decision was made in the summer of 1966 to form the Bi-State Metropolitan Planning Commission, it was a matter of unifying the existing Rock Island County Regional Planning Commission and Scott County Metropolitan Planning Commission into one commission that would represent the interests of the entire Bi-State area. This decision was in response to federal and local encouragement to coordinate planning across state lines. In 2026, Bi-State Regional Commission will celebrate its 60th anniversary as an organization.

The resolution establishing the Commission abolished both county planning commissions and provided a 22-member commission, 11 from each county. The mayors from the three largest contiguous cities in each county (Davenport, Bettendorf, Riverdale, Rock Island, Moline, and East Moline) and the respective county board chairs (Scott and Rock Island Counties) became voting members of the Commission. Several additional citizen members from each county were appointed by the county board on the Illinois side, and the governing bodies of the member agencies from the Iowa side.

The U.S. Department of Housing and Urban Development (HUD) began, in 1972, to express its policy requiring counties within the same Standard Metropolitan Statistical Area (SMSA) to join together for the purposes of comprehensive planning. Henry County, along with Scott and Rock Island Counties, make up the Davenport-Moline-Rock Island, IA-IL Metro Area MSA with a combined population of 384,324 (U.S. Census Bureau 2020).

After many sessions involving the principals of the merger and the terms of the relationship, the County Boards of Henry and Rock Island Counties, Illinois, and the County Board of Supervisors of Scott County, Iowa entered into an agreement designating the Bi-State Metropolitan Planning Commission as the three-county regional planning commission by virtue of the powers granted to them by Chapter 34, Section 3001-3005, Chapter 84, Section 1021, and Chapter 127, Section 721-728, Illinois Revised Statutes, and Chapters 28E and 473A of the Code of Iowa.

On July 1, 1976, Muscatine County, Iowa and Mercer County, Illinois joined the Bi-State Metropolitan Planning Commission, thus making it a five-county agency. And in 1983, in response to efforts by the Commission to broaden its membership support to include municipal governments in addition to the counties, the Commission was restructured to provide membership to financially participating counties and municipalities. Revised Articles of Agreement providing for such county and city membership and a Commission composed of 34 representatives were adopted by the member governments in August and September of 1983 and went into effect on October 1, 1983. The Commission currently serves a five-county area with 47 member governments. The five-county Bi-State Region population is 427,559

Section 2 – Organization

according to the 2020 Census. The Bi-State Metropolitan Planning Commission officially changed its name to Bi-State Regional Commission in November 1990.

Membership of the Bi-State Regional Commission

The Bi-State Regional Commission consists of 35 persons representing counties, cities, and program and designated constituencies throughout the Bi-State Region. Approximately 71 percent of the members are elected officials, and 29 percent are citizen appointments. Membership is approximately proportional to population with 11 county representatives, 14 city representatives, and 10 program and designated constituency representatives. The Rock Island Arsenal Garrison Commander sits on the Commission as an ex-officio member.

(Current membership identified at the beginning of the document on page v.)

Committees of the Bi-State Regional Commission

Executive Committee

Membership – The committee is composed of nine members, at least two-thirds of which are elected officials and at least one representative from each member county. The chair, vice chair, secretary, and treasurer of the Commission serve on the committee by virtue of their office. In addition, each county board chairman and four representatives from municipalities, along with one minority representative and one designated constituency, serve on the committee.

Function – Responsible for administration of the Commission's activities.

Finance and Personnel Committee

Membership – Commission members appointed annually by the Commission chair.

Function – Responsible for development of the budget, review of expenditures, and matters of personnel policies.

Delegated Authority Groups

In the interest of effective and efficient functioning of the Commission, delegated authority groups have been established from time to time by the Commission to expedite specific business and planning activities. The Commission has established specific guidelines or limits within the delegated authority groups. Two such groups are the Transportation Policy Committee and Bi-State Drug and Alcohol Testing Consortium. The Cooperative Transportation Planning and Programming Agreement is provided in the Appendix, page A-7, and posted on the Bi-State Regional Commission website: <https://bistateonline.org/transportation-and-mobility/quad-cities-metro-planning/other-plans/tpwp-public-participation-title-vi-policy>.

Transportation Policy Committee

Membership – Membership is as follows:

- County Board Chair, Rock Island County, Illinois
- County Board Chair, Scott County, Iowa
- Mayor, City of Bettendorf, Iowa*
- Mayor, City of Davenport, Iowa*
- Mayor, City of East Moline, Illinois

Mayor, City of Moline, Illinois
Mayor, City of Rock Island, Illinois
Region Engineer, Illinois Department of Transportation
District Planner, Iowa Department of Transportation
Two Aldermen, City of Davenport
Board Chair, Rock Island County Metropolitan Mass Transit District (Metro)
Caucused "chief elected official," Iowa-side small communities
Caucused "chief elected official," Illinois-side small communities
Division Administrator, Federal Highway Administration – Iowa Division (ex-officio, non-voting)
Division Administrator, Federal Highway Administration – Illinois Division (ex-officio, non-voting)
Administrator, Federal Transit Administration – Region VII Division (ex-officio, non-voting)

(Current membership identified at the beginning of the document, page v.)

Function – Responsible for transportation planning and programming for the Davenport IA/IL Urbanized Area.

*Respective mayors represent transit interests of Bettendorf Transit and Davenport CitiBus

Bi-State Drug and Alcohol Testing Consortium

Membership – Membership is open to member governments and not-for-profit agencies in the Bi-State region who must meet Federal Transit Administration and Federal Motor Carrier Safety Administration drug and alcohol testing requirements as a result of the 1994 Department of Transportation Federal Testing Regulations.

Function – Provides a forum to procure a contractor for drug and alcohol testing services, to supervise the contractor, and to address revisions to regulations.

Technical and Advisory Committees

Technical and advisory committees work to assist the Commission in each of its major planning efforts. The committees are composed of local citizens and city, county, state, and federal technical personnel concerned with daily operations affected by any plans developed. The technical committees are responsible for review and guidance of data collection and analysis, plan preparation, and plan review and update functions. Technical and advisory committees that assist the Transportation Policy Committee include the Transportation Technical Committee, Bi-State Regional Trails Committee, Bi-State Technology and Safety Technical Committee, the Regional Transit Interest and Advisory Group, the Bi-State Region Air Quality Task Force, and the Regional Transportation Advisory Group.

Transportation Technical Committee

Membership – Bettendorf, Davenport, East Moline, Moline, and Rock Island, along with the smaller Iowa and Illinois Quad Cities communities in Henry, Rock Island and Scott Counties; planners and engineers; Illinois Department of Transportation district staff and Iowa Department of Transportation district staff; and representatives of the Bettendorf and Davenport transit systems, and the Rock Island County Metropolitan Mass Transit District (MetroLINK or Metro).

Planning and research staff from the Illinois and Iowa Federal Highway Administration division offices serve as ex-officio, non-voting members of the Transportation Technical Committee as does a planning representative from the Federal Transit Administration's Region VII (Kansas City).

Section 2 – Organization

(Current membership identified at the beginning of the document on page vii.)

Function – Responsible for technical review and guidance of data collection and analysis, transportation plan preparation, review, and update. This committee is responsible to, and makes recommendations to, the Transportation Policy Committee.

Bi-State Region Air Quality Task Force

Membership – Representatives from Henry, Mercer, and Rock Island Counties, Illinois and Muscatine and Scott Counties, Iowa include local city public works and engineering officials, transit managers, county health departments, chambers of commerce representatives, economic development organizations' staff, representatives of major industries and business, state resource agencies' staff (IADNR, ILEPA, DOTs, IEDA, DCEO), local conservation, health and education representatives, and interested citizens.

Function – Provides a forum to discuss issues for maintaining National Ambient Air Quality Standards (NAAQS) attainment status through voluntary emission reduction measures; for communication between public and private entities on voluntary measures by sharing experiences and knowledge; and for encouraging and supporting individual and group voluntary measures/activities such as public education and mobile/stationary source reduction initiatives.

Bi-State Regional Trails Committee

Membership – Membership is open to jurisdictions located in the Bi-State Region to work toward the development of multi-purpose trails within the Bi-State Region.

Function – To coordinate planning and development activities associated with the multi-purpose trails in the Bi-State Region.

Bi-State Technology and Safety Technical Advisory Group

Membership – Intelligent Transportation System (ITS) and Traffic Safety Stakeholders (engineers, public works staff, public safety officials, planners) in Bettendorf, Davenport, East Moline, Moline, and Rock Island, along with the smaller Iowa and Illinois Quad Cities communities in Henry, Rock Island and Scott Counties; Illinois Department of Transportation staff and Iowa Department of Transportation staff; representatives of the Bettendorf and Davenport transit systems and the Rock Island County Metropolitan Mass Transit District (Metro); and planning and research engineers from the Illinois and Iowa Federal Highway Administration division offices and the Federal Transit Administration's Region VII (Kansas City).

Function – To coordinate ITS and traffic safety planning and deployment activities in the Bi-State Region.

Bi-State Region Freight Forum

Membership – Multi-modal freight transportation stakeholders in both private and public sectors representing air, highway, rail, and water; community officials (engineers, public works and economic development staff, and/or planners) in the Bi-State Region; Illinois Department of Transportation staff and Iowa Department of Transportation staff; and planning and research engineers from the Illinois and Iowa Federal Highway Administration division offices.

Function – To coordinate multi-modal freight planning in the Bi-State Region and to understand and monitor needs and issues related to physical, operational, and institutional aspects of the regional freight system.

Regional Transit Interest and Advisory Group

Membership – Membership is open to anyone interested in passenger transportation and mobility. Members represent elderly, disabled advocacy groups, resident associations, social service agencies, transit systems, or individual community members.

Function – Provides a forum to receive and provide public input into regional mobility, passenger transportation, and the public transit systems compliance plan with the Americans with Disabilities Act on an as-needed basis. The group also provides organized discussions on transportation problems affecting the special needs populations of the region. Information and meeting notices related to the *Bi-State Region Transit Development Plan*, and transit funding selection process are provided to this group for input and suggestions. The group serves in an advisory capacity to the transportation community, as well as the Transportation Technical Committee.

Regional Transportation Advisory Group

Membership – Membership is open to anyone interested in transportation planning and projects. Members represent private transportation providers, social service agencies that provide transportation, transit consumers, school districts, historic societies, tourism, biking and hiking clubs, environmental groups, and freight movers.

Function – Provides a forum through direct mailings and meeting notices to solicit input and examine the Transportation Improvement Plan (TIP), Long Range Transportation Plan, Bi-State Regional ITS Architecture Plan, Transportation Alternatives Program (TAP) projects, and Surface Transportation Block Grant Program (STBG) projects. This group may provide comments to the Transportation Technical and Policy Committees for their consideration at regular meetings, public hearings, or through direct requests for input.

Public Participation

Public participation in the transportation planning and programming activities of the Bi-State Regional Commission is facilitated through four primary mechanisms of communication under the framework of the Public Participation Plan (See Appendix):

- Technical and advisory committees, and delegated authority groups
- Seminars, workshops, and public meetings or hearings
- Commission reports, mailings, website, and other publications
- Television, radio, print, social media and other electronic media coverage

The public input process ensures that all citizens are given ample opportunity to be involved in the planning process, regardless of race, color, national origin, age, disability, religion, sex, and familial status. (Not all prohibited bases apply to all programs.). Further, the Bi-State Regional Commission complies with Title VI and non-discrimination requirements. The Bi-State Regional Commission's *Title VI Program and Non-Discrimination Policy* is posted on the agency website, and the Title VI public notice and complaint form are both posted in the Bi-State Regional Commission office and on its website. A Limited English Proficiency (LEP) Analysis has been prepared as part of the Title VI documents for the

Section 2 – Organization

Bi-State Regional Commission as not to discriminate on the basis of national origin by law. The transit systems prepare individual Title VI documents. A Title VI analysis is included in the *Bi-State Region Transit Development Plan* and in the *Connect QC 2050: Quad Cities Long Range Transportation Plan*. Refer to public participation plan in the appendix for the public participation process. These documents provide guidance for fulfilling federal civil rights requirements per the 1964 Civil Rights Act.

Technical and Advisory Committees and Delegated Authority Groups

The following tabular listing shows the extensive committee structure that provides guidance and input to the program of the Bi-State Regional Commission along with information regarding total numbers of people, minority, and female composition to align with civil rights law. Note the Trails Committee, task forces, and advisory groups are not listed because of their fluctuation in membership.

<u>Boards and Committees</u>	<u>Number of Members</u>	<u>Racial Minorities</u>	<u>Females</u>	<u>Elected Officials</u>
Bi-State Regional Commission	33	9	8	25
Transportation Policy Committee*	14 (3)	2 (1)	2(0)	11
Transportation Technical Committee*	20 (3)	0 (0)	1(1)	0

*Ex-officio, non-voting members shown in parentheses (#).

Seminars, Workshops, and Public Hearings

The Bi-State Regional Commission conducts and participates in seminars, workshops, webinars, public hearings, and informational meetings beyond the formal committees' structure. Past examples have included sessions on community development, land use, environmental issues, public and traffic safety, hazards mitigation, air quality and extreme weather, energy, infrastructure, census, solid waste, sustainability/livability, community health, and transportation. Periodic functions of this nature offer the opportunity to bring in more varied viewpoints not otherwise obtained in the formal committee structure, as well as educating and informing numbers of citizens and officials on relevant planning issues.

Commission Report, Mailings, Website and Other Publications

Topical publications in each of the Commission's program areas are published when needed. A periodic Commission in Review summary on the Commission's meeting actions is posted to the Commission website. Commission minutes are distributed to all member county and city elected officials. Further, the Commission maintains a website that contains current information regarding the Commission's services/activities as well as several draft and adopted planning documents and publications. The website content is revised and expanded on an on-going basis. In 2016, the website was restructured to include a Quad Cities MPO homepage for related transportation information, Policy and Technical Committee meetings noted for the full year based on anticipated dates, and an MPO News module added to the homepage. In 2022-2023, the website was redesigned. In 2025, refinements to the QC MPO page navigation, search engine, and the addition of an accessibility widget for the website as a whole enhanced user access for a variety of visitors. Agendas and minutes of the following groups are posted on the Bi-State Regional Commission website:

- Bi-State Drug and Alcohol Testing Consortium
- Bi-State Executive Committee
- Bi-State Finance and Personnel Committee
- Bi-State Region Air Quality Task Force

- Bi-State Regional Commission
- Bi-State Regional Trails Committee
- Bi-State Revolving Loan Fund Board
- Mercer-Muscatine Revolving Loan Fund Board
- QCIC Net Governing Board
- Quad City Riverfront Council
- Quad Cities MPO and Region 9 Transportation Policy Committees
- Quad Cities MPO and Region 9 Transportation Technical Committees

Television, Radio, Internet and Print Media Coverage

Extensive news media resources can be accessed by the Commission within its five-county area. Four major television networks (ABC, CBS, NBC, and FOX) have affiliate stations located in the region. There are three public television stations, plus digital and cable TV. In addition, there are 35-38 radio stations¹, three daily newspapers, and four weekly newspapers located in the area. Many of these media sources also have digital communications, websites and/or social media that include news and information. Local news coverage including the matters of local government provides a broad, varied reporting within all sectors of the community. Local governments also host websites and social media sites providing direct news to their constituents. The visibility of the Commission is enhanced with public service announcements and public affairs programming through the local cable television media. Meeting announcements and news features focusing on local government are given attention.

Equal Opportunity and Non-Discrimination Policies

The Commission adopted the *Equal Opportunity Policies, Bi-State Regional Commission* on June 26, 1991. This document contains the Commission's ongoing, broad equal opportunity policies, provides for the designation of an Equal Opportunity Administrator, outlines the responsibilities of this administrator, and gives specific employment and contractual policies and standards. The Commission also accepts responsibility for promoting minority and women business opportunities as detailed in contracts with the various state and federal agencies. The Commission adopted a policy statement in January 2000 that will inform Commission members of gender balance and current status when making membership appointments.

In accordance with federal law, Bi-State Regional Commission is prohibited from discriminating on the basis of race, color, national origin, age, disability, religion, sex, and familial status (not all prohibited basis apply to all programs). As part of the 1964 Civil Rights Act, Title VI states "No person in the United States shall, on the grounds of race, color or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." The Equal Employment Opportunity Act prohibits employment discrimination and retaliation associate with hiring, firing, promotions, and pay. In 2025, certain Executive Orders (EOs) to address environmental justice in minority and low-income populations (EO 12898) and to improve access to services for persons with limited English proficiency (EO 13166)

¹ <https://northpine.com/iowa/radio-stations/quad-cities-davenport-rock-island-moline-radio-stations/> and <https://worldradiomap.com/us-ia/davenport>

Section 2 – Organization

have been rescinded. There are other statutes that address other protected classes related to age, sex, marital status, disability, etc.

In 2011, the Iowa Department of Transportation, as lead overseer of Bi-State Regional Commission’s transportation planning process, required a separate and standardized Title VI Plan in 2012 for the agency. Additionally, the Federal Transit Administration (FTA) required separate Title VI documents for each transit system in the Davenport, IA-IL Urbanized Area, due to their direct receipt of FTA funds. The Bi-State Regional Commission Title VI Program and Non-Discriminatory Policy was approved by the Commission in December 2012 and filed with the Iowa and Illinois Departments of Transportation. It was since revised in October 2015, 2018, 2021, and 2024. The current policy is also posted to the Bi-State Regional Commission website and the public notice and complaint form are posted in the office and on the website.

3. ISSUES AND PLANNING EMPHASIS

An overview of the Quad Cities Metropolitan Planning Area (MPA) transportation planning process is highlighted as issues and planning emphasis. This includes important transportation issues facing the area for the movement of people and goods, the status of significant elements of the planning program, and procedures used to accomplish these elements and assure that a continuing, cooperative, and comprehensive–3C transportation planning process is being carried out by the states and local communities. All multi-modal transportation-related planning activities and transportation support activities are considered in this process. It is a means of consolidating and coordinating transportation planning at the metropolitan level.

Agency Responsibilities

Local agencies, including the counties, cities, and passenger transit operators, play an important role in the transportation planning process. The staff of the Bi-State Regional Commission works closely with the staffs of these local agencies in order to achieve a coordinated transportation program for the area. Local agencies are involved in every phase of the planning process by supplying data, developing alternatives, reviewing plans, and programming transportation improvements.

Representatives of the U.S. Department of Transportation and the Iowa and Illinois Departments of Transportation participate in the transportation planning process in close cooperation and/or consultation with the Bi-State Regional Commission and other local agencies. This participation is both through membership on the Transportation Policy and Technical Committees and through the technical assistance provided on a day-to-day basis through the provision of information and the review of work. Bi-State Regional Commission also works cooperatively with its federal partners, Federal Highway Administration (FHWA), and Federal Transit Administration (FTA). The agency through its multi-modal transportation planning process seeks out involvement from a variety of transportation stakeholders, both public and private.

The Quad Cities MPO has completed and abides by the following major transportation planning documents:

1. FFY 2025-2028 Transportation Improvement Program (TIP)
2. FY 2025 Transportation Planning Work Program (TPWP) and Addendum revisions
3. *Bi-State Region Transit Development Plan –2023 Update* (known as a Passenger Transportation Plan-PTP in Iowa and Human Services Transportation Plan – HSTP in Illinois)
4. *Bi-State Region Freight Plan Addendum – 2024* of the 2015 original plan
5. *Bi-State Regional ITS Architecture Plan – 2022*
6. *Connect QC 2050: Quad Cities Long Range Transportation Plan (LRTP) – 2021* (Technical corrections in 2022)
7. Complete Streets Policy Statement – 2008
8. Public Participation Plan (PPP) – 2023 Update
9. *Title VI Program and Non-Discrimination Policy – 2024*
10. *Quad Cities – Kewanee – Muscatine Traffic Safety Action Plan – 2025*
11. *Connect QC: 2050 Performance Measures Technical Report Addendum – 2021*
12. *Connect QC: 2050 Congestion Management Process – 2022*
13. *Quad Cities Extreme Weather Resilience Report – 2020*

Section 3 – Issues and planning emphasis

In addition to these planning documents, several reports, documents, and items were completed or updated during FY 2025. These included:

- *Public Officials Directory for the Bi-State Region* (September 2024)
- Bi-State Regional Commission website updates of content, www.bistateonline.org including long range transportation plan update progress, transportation progress reporting, TIP revisions, enhanced traffic safety planning page, transportation funds programming among other updates; maintenance of Quad Cities MPO homepage, and calendar of Policy and Technical Committee meetings and advisory groups; and MPO News module on homepage, and website redesign
- Oversight for Be Healthy QC – Built environment updates and www.QCTrails.org website
- Maintenance of web portal for metro area transit systems’ links, www.qctransit.org
- River Crossings Bridge Restrictions schedules and public outreach
- Bi-State Region Comprehensive Economic Development Strategy (CEDS) 2025 Progress Report
- Support of state’s and transit systems’ Performance Measures targets
- Updates of Quad Cities MPO Transportation Projects Progress Reports and Illinois list of federally obligated projects
- Facilitation of Mississippi River Ports of Eastern Iowa and Western Illinois Ports, doing business as the Upper Mississippi River Ports, online interactive mapping project
- Facilitation of Quad Cities MPO Roads/Bridges online interactive mapping project via utilization of Waze for Cities
- Completion of Andalusia Road – Indian Bluff Road Corridor Study - 2025

Further efforts included traffic, and trails studies; transit, trail, and pedestrian planning coordination; air quality activities; transit grants assistance; performance management discussions; grant application preparation for various transportation projects; and response to inquiries. With the completion of these documents/items, a number of transportation issues have been identified and/or resolved. However, areas remain where further discussion and study will be necessary as part of the comprehensive, continuing, and coordinated–3C transportation planning process.

Major Transportation Issues Facing the Quad Cities

Faced with capital and human resources limitations, market volatility, changing travel patterns and technology, supply chain variability for all modes of transportation, and continued transportation systems needs, it is very important to stress strategic decision-making, and cost-effectiveness in planning and operations of the transportation system. This focus will support a number of the LRTP transportation objectives. Focused activities have included and will include:

- Facilitation of transportation safety and security, including traffic safety, operations, and maintenance techniques, congestion management methods, using the MPO Congestion Management Process (CMP) and use of technology outlined in Bi-State Region Intelligent Transportation System (ITS) Architecture for efficient movement of goods and people

- Emphasis on developing multi-modal and intermodal facilities, and accessibility and mobility for all types of users
- Planning for land use, sustainable and resilient communities, public health and community wellness, hazard mitigation from natural disasters, stormwater management, extreme weather impacts, and for transportation that meets the needs of all users of the system
- Coordination with public and private passenger transportation providers, tourism partners and human services providers for greater mobility options within the region
- Coordination with federal land management agencies and federal defense facilities to ensure access and security
- Improvement of freight movement in and around the metropolitan area
- Examining the transportation system for vulnerabilities and critical facilities to identify adaptation strategies to reduce disaster recovery time and foster long-term system resilience.

The Bi-State Regional Commission will continue to emphasize these areas in support of the *Connect QC 2050: Quad Cities Long Range Transportation Plan* goals and transportation objectives as it addresses the following major transportation issues:

- **Improve river crossing capacity.**

Mississippi River:

The Quad Cities MPA is fortunate to be located along two major rivers, the Mississippi and Rock Rivers. While these natural features are sources of scenic beauty, recreation and commercial navigation, they also act as impediments to free movement of vehicular traffic throughout the area. The bridges over the Mississippi River in the metro area range in age from 4 years to 129 years. These bridges provide a total of twenty (20) lanes for traffic, and three provide access for bicycles and pedestrians, including the I-74 Mississippi River crossing having opened in Spring 2022. Maintenance responsibilities continue to restrict the available lanes on the older bridges due to regularly scheduled and unexpected repairs. A fourth pedestrian and bicycle crossing is anticipated with the reconstruction of the I-80 Mississippi River bridge.

In 2014, steel beam repairs were necessary on the Centennial Bridge and required more than the expected 35 day-closure of the span to traffic. The repair project carried over into CY2016 to complete work. Additional work in planning in CY2022. Meetings were held to coordinate transit and local road impacts anticipated due to work zone restrictions of the I-74 bridge reconstruction from CY2017 to 2022. Currently, preliminary engineering is underway to study alternatives to reconstruct or replace the Centennial Bridge. Engineering work is underway for I-80 bridge replacement, and a preferred alternative was released in November 2023.

Bi-State Regional Commission staff regularly coordinate with the jurisdictions responsible for bridge maintenance and construction to help minimize effects to the traveling public and suggest transportation alternatives to reduce congestions, such as walking, bicycling, and using transit or carpooling.

QUAD CITIES MISSISSIPPI RIVER BRIDGES

Bridge	Bridge Opened	Design Type	ADT*
I-280	1973	Steel Thru-Arch, 4 lanes	28,100
Centennial	1940	5 Tied Steel Arches, 4 Lanes	22,400
Government	1896	Swing Span, 2 Lanes	5,750
I-74	2021	Twin Spans, Tied Arches, 6 lanes + auxiliary lanes	78,100
I-80	1966	Steel Girder, 4 Lanes	32,200
		TOTAL	166,550

* Average Daily Traffic (ADT) for 24-hour period provided by either Iowa Department of Transportation or Illinois Department of Transportation. For I-280 (2023), Centennial/U.S.67 (2023) I-74 (2023), and I-80 (2023), and Government Bridge(2023).

Major Investments History. Beginning in FY 1996, the Illinois and Iowa DOTs funded a study regarding Mississippi River crossing needs in the Quad Cities MPA. The study included an origin and destination analysis. It was completed with an alternatives/location analysis in Stage II of the study. During the second stage of the study, a Major Investment Study (MIS) was also conducted. The States of Illinois and Iowa each funded 50 percent of the study, which was finalized in 1998. The Study Management Group guided the study and concluded that for adequate crossing capacity to be available, tolls must be removed from the U.S.67/Centennial Bridge, the I-74 Bridge must be widened to at least six lanes, and a new bridge must be built between East Moline and Bettendorf.

The Mississippi River Crossing Strategy Implementation Task Force, a broad-based citizens committee and assisted by staff, developed a plan to resolve implementation issues regarding this three-pronged recommendation. Teams of local leaders have been working to implement each of these three bridge components. Extensive reconstructive work was completed in 1997 and 2003 through 2005 on the U.S. 67/Centennial Bridge, a former toll facility (removed May 2003). The area saw the successful transfer of jurisdiction for the U.S. 67/Centennial Bridge from the City of Rock Island to the Illinois and Iowa Departments of Transportation in July 2005. These actions resulted in the first short-term strategy being completed of the Mississippi River Crossing Strategy Implementation Study, with two components remaining. With the grand opening of the new I-74 bridge on December 1, 2021, the second priority has been accomplished as part of the original investment study with the twin tied-basket handle arch structure with six travel lanes and auxiliary lanes for passing along with shoulders. The I-74 project history can be found in the Appendix.

Capacity Implementation Efforts. Staff continues to assist with Mississippi River Crossing Study implementation. I-74 Mississippi River Corridor reconstruction was the second component to pursue. The Illinois-bound I-74 structure was completed at the end of CY2021, and final demolition of the older structure was completed in CY2024. The pedestrian-bicycle access opened in Spring 2022, and a let-down structure with an elevator is on hold as of CY2023.

Continuing efforts to secure funding are still needed to complete the I-74 Mississippi River Corridor North Section, and south of Avenue of the Cities at the John Deere Road interchange. Coordination of engineering, funding, and legislative needs for the corridor will continue until the project is complete. The longer term implementation of the East Mississippi River bridge strategy will also continue to be monitored for need and support.

While the third component of the Major Investment Study implementation remains important, there is also recognition that the other existing Mississippi River bridges are in need of repair or replacement. Preliminary engineering is underway to replace the I-80 structure to meet capacity demands from freight movement, and as a national artery of commerce. The US67 Centennial Bridge is also under study to determine a feasible solution to reconstruction or replacement.

The *Connect QC 2050: Quad Cities Long Range Transportation Plan* outlined the need for another additional study of both highway and rail capacity along the Mississippi River corridor from I-280 to I-80. A Planning Environmental Linkages (PEL) study was initiated for the I-80 bridge by the Illinois DOT in 2019 and in coordination with Iowa DOT. During FY 2026-2030, Illinois DOT has programmed \$245 million for I-80 bridge replacement. A new bridge deck was completed for I-280 by Illinois DOT as of CY2023. Iowa DOT has conducted an analysis on I-80 corridor in Scott County, and there is interest in a Planning and Environmental Linkages (PEL) analysis to determine discrete independent projects to pursue engineering analysis. The LRTP highlights the need to do further study of the U.S.67/Centennial Bridge for its future viability. Preliminary engineering work is underway with kick-off meetings with the Davenport and Rock Island City Councils in February 2025.

Rock River:

With completion of Veterans Memorial Bridge at Carr's Crossing (West Rock River Bridge), the Illinois Quad Cities will continue investigating the feasibility and local support of an east crossing of the Rock River from IL5/John Deere Road to an area between Coal Valley and Colona with connectivity to the federal, state, and/or local road system as to be determined by a study. Staff continue to follow re-designation of the floodway in the Rock River area by the State of Illinois and its impact on communities and the transportation network.

Bridge replacement and reconstruction of 27th Street over the Rock River for \$49.5 million is slated for FFY2027 based on the Illinois DOT FFY2026-2030 Multi-Year Program. Bridge rehabilitation is planned on IL84 at the Rock River for \$15 million in FFY2028.

- **Reduce congestion. Improve mobility and system reliability. Enhance air quality and resilience.**

Congestion Management and System Reliability. When applicable, transportation planning efforts focus on coordination activities to improve operations, reduce traffic restrictions/bottlenecks, and decrease vehicle emissions for improved air quality in the Quad Cities. Non-recurring congestion from maintenance and reconstruction projects occurring on the area transportation network impact traffic flow. Coordination and early notification of construction schedules help alleviate some of the related congestion and provide valuable information to the public for making mobility decisions. Construction on the major bridge crossings will continue to be a monitoring and notification effort. Coordination of an interactive road and bridge construction mapping solution was identified using *Waze for Cities* platform. A number of cities and counties in the MPO in 2022 became Waze partners and began uploading road and bridge construction updates to the platform. Bi-State staff continue to assist and monitor postings of road and bridge restrictions in Waze, and posted the map to the Bi-State website.

Bi-State staff will continue to work with area representatives and the Illinois and Iowa Departments of Transportation to prepare for the transportation needs of the area through a congestion management process. As part of the *2045 Quad Cities Long Range Transportation Plan (LRTP)*, a Congestion Management Process (CMP) was developed and approved in CY 2016. An update was completed in CY2022 as an addendum to the 2050 LRTP. Travel time data and analysis are a component of on-going system performance monitoring to identify and address congested corridors and along transit priority routes. Looking at on-going opportunities to tap "big data" from third party data collection sources is important for understanding bottlenecks and corridors with impeded traffic flow. The 2024 TMA Certification Review recommended more graphical depiction of CMP data, of area congestion, and identification of deficiencies.

Federal performance management related to traffic safety targets for fatal and severe injury crash reductions is monitored, both motorized and non-motorized. The Quad Cities MPO has supported both Iowa and Illinois state traffic safety targets. The *Quad Cities Traffic Safety Plan* was completed in CY2020. It included an analysis of intersections in the Quad Cities and aligns with both state references to traffic safety emphasis areas in order to focus efforts to reduce crashes. The data and analyses from these reports will aid area officials in examining nonrecurring congestion due to crashes at key locations in the Quad Cities, and improving traffic safety. Bi-State staff will continue to work with state DOTs on highway safety plans and coordinate with local safety officials to reduce crashes in the metropolitan area through engineering, enforcement, education, and emergency response to support each state's safety performance measures targets to reduce fatalities and serious injuries on all public roads.

Bi-State staff secured a Safe Streets and Road for All (SS4A) planning grant to facilitate a consultant-lead traffic safety action plan for the Quad Cities MPA and two micropolitan areas for Muscatine, Iowa and Kewanee, Illinois. The Traffic Safety Action Plan was initiated in CY2024 and will be completed in CY2025. The plan has identified implementation recommendations to reduce fatal and severe injury crashes in the three geographic areas and provide an opportunity to pursue SS4A implementation funds for eligible projects.

Technology Deployment. The use of Intelligent Transportation System (ITS) technology will be implemented to relieve congestion and improve traffic safety, especially related to the area bridges. The I-74 Mississippi River Bridge Incident Detection and Management Study recommended implementation of ITS technologies to improve traffic operations in and near the corridor. These have been implemented, and new technologies are part of the I-74 reconstruction implementation. A deployment plan and routing manual was completed in FY 2009. A project-level architecture for the reconstruction of I-74 was updated in CY 2011-12 and was integrated with the update of the Bi-State Region ITS Architecture beginning in CY2012 and finalized in CY2013. This document was updated in CY2022.

Staff has worked with the Illinois and Iowa DOTs on area ITS issues as it relates to I-74 incident management. An initial project level ITS architecture plan has been completed in conjunction with the I-74 Mississippi River Corridor Study. The CY 2013 update refined plans to deploy transportation technology in the corridor for efficient traffic operations. An update is anticipated as the new I-74 bridge comes online. Deployment of the *Bi-State Regional Intelligent Transportation System (ITS) Architecture Plan* continues to require multi-disciplinary interests' involvement. Both short-term and long-term strategies will be deployed to improve the transportation system. Staff will assist in coordination issues and implementation as needed.

Mobility Choices. Efforts continue to bring forward discussions on context-sensitive solutions and Complete Streets for multiple transportation system users – pedestrians, bicyclists, transit riders, motor vehicle drivers – and for providing a menu of transportation options for travel within the metropolitan area. Discussions of access and modal choice for walking, bicycling, and using transit will continue.

The Quad Cities Health Initiative “Be Healthy QC” is working on improvements to the “Built Environment” to support alternative transportation choices. As part of that effort, Bi-State Regional Commission maintains an interactive website to encourage use of the area’s extensive trails system. The website www.QCTrails.org launched in February 2016. A local advocacy group supported a feasibility study for a bike-sharing program in the metro area. In order to launch a program, project sponsor(s) would be needed to host and deploy equipment and support operations and maintenance.

Bi-State staff gained technical capacity as part of a Centers for Disease Control and Prevention (CDC) grant that supported development of 11 Safe Routes to Schools plans over a three-year period (2015-17). Staff provide technical assistance and mentoring for new plan development, and grant writing for plans implementation. In FY2024-2025, staff wrote one Safe Routes to Schools grant and five trails grants. Similarly, the Iowa Department of Public Health selected the Quad Cities MPO, along with peers statewide, to implement a physical activity access project (2019-2022) to encourage walking and bicycling to senior meal sites, senior housing areas and other facilities.

Additionally, funding was secured to examine multi-modal mobility options and corridor improvements along Illinois 92 from Rock Island to Silvis. The study was completed in February

2020. A grant was awarded for corridor planning along the Andalusia Road –Indian Bluff Road in FY2024, and the study will be wrapping up in CY2025.

The *Bi-State Region Transit Development Plan (2023)* outlines progress to increase transit ridership, access and improve urban and urban-rural mobility to access jobs, medical facilities, and other essential services. It serves as the human services coordination plan, and addresses mobility needs in the region. It is on a three-year update cycle.

Other areas of passenger transportation planning include access for persons with disabilities, transit in concert with sustainable development, emerging on-demand ridesharing and taxis services, carpooling and intercity passenger connections. The Infrastructure Investment and Jobs Act (IIJA) continues to support integration and coordination of passenger transportation and social services.

Transit-oriented development is encouraged to stimulate ridership. Implementation of transit-oriented development is part of Centre Station and “Q” passenger rail station in Moline as part of the planned establishment of passenger rail service between the Quad Cities and Chicago. Illinois DOT continues work to complete engineering analysis and pursue a \$250 million funding shortfall to allow for rail service to be initiated. In Rock Island, the transit hub at 20th Street and 2nd Avenue serves mobility efforts. Under the I-74 Mississippi River Corridor reconstruction, the transit systems secured funding to provide a commuter route with more frequent transit cross-river service to reduce congestion during the construction project. The temporary commuter service launched in December 2018 and concluded in March 2021. The Iowa Quad Cities transit systems serving Bettendorf and Davenport are partnering with Eldridge and LeClaire to look a broadening transit service through a route analysis beginning in CY2025.

Air Quality and Resiliency. The Davenport-Moline-Rock Island, IA/IL Metropolitan Statistical Area is currently classified as an “attainment area” for the National Ambient Air Quality Standards (NAAQS). These air quality standards are regulated by the U.S. Environmental Protection Agency (EPA). The monitored values indicate the Quad Cities MPA is near non-attainment for fine particulates and ozone, as more stringent measures have been put into place. NAAQS under the Clean Air Act are reviewed on a cyclical basis and lowered as a result of health-based research. These cyclical reviews continue to drive air quality improvements nationally. USEPA set a new PM_{2.5} annual standard effective May 2024 of 9.0 micrograms per cubic meter to provide increased public health protection.

On October 10, 2015, U.S. EPA strengthened the ozone standards from 75 parts per billion (ppb) to 70 ppb. The latest Quad Cities three-year design value (2021-2023) is 67 ppb for the Iowa Quad Cities, and 63 ppb for the Illinois Quad Cities based on a 2020-2022 design value. There were numerous exceedences of ozone in the Iowa Quad Cities in CY2023 due to unprecedented wildfires in Canada. These occurred May 23-24, 29-30, and June 2-6, 10, 22-23, 27-28. Officials in the region continue to watch regulatory review for ozone. There were no exceedences of ozone in CY2024.

In CY2012, U.S.EPA revised the fine particulate standard to utilize an annual standard. The annual standard was lowered from 15 $\mu\text{g}/\text{m}^3$ to 12 $\mu\text{g}/\text{m}^3$ in CY2012 and again in CY2024 to 9 $\mu\text{g}/\text{m}^3$. The annual fine particulate design value (2020-2022) for the Illinois Quad Cities is 8.8 $\mu\text{g}/\text{m}^3$ and is 8.9 $\mu\text{g}/\text{m}^3$ for the Iowa Quad Cities (2021-2023). There were no exceedences of fine particulate standards in the Iowa and Illinois Quad Cities for CY2024.

Public education and voluntary air emission reduction efforts are expected to continue in order to maintain air quality levels below these standards. Staff will continue to monitor changing NAAQS regulations and potential nonattainment threats, and potential resulting transportation conformity and its impact on the transportation planning process. Federal performance measures were implemented for greenhouse gas (GHG) and targets were set by the Departments of Transportation in February 2024. The Quad Cities MPO, similar to the other PMs, will consider supporting the state targets by July 2024. In litigation, the state and MPO target setting are on hold since March 2024.

Through the Bi-State Region Air Quality Task Force, staff will continue to promote congestion management techniques, travel demand management, anti-idling policies, diesel engine retrofitting, alternative fuels/vehicles, energy conservation, and mobility choice options as well as activities to improve the transportation network and reduce emissions. Staff will pursue funds to support public education on voluntary emission reduction measures and transit and rideshare marketing, where available.

An alternative energy conference was held in the region to provide information on alternatives to fossil fuels use with funding from a 2019 Schwiebert Foundation grant. In 2021, an Eastern Iowa collaborative completed an electric vehicle readiness study and work group meets quarterly to facilitate its implementation. In summer 2022, Bi-State staff partnered with both Departments of Transportation and state Clean Cities partners to host an electric vehicle and charging infrastructure event in anticipation of National Electric Vehicle Infrastructure (NEVI) funding. In CY 2023, a Carbon Reduction Program (CRP) evaluation process was developed to evaluate and program projects to reduce emissions due to transportation sources. Bi-State staff participates in meetings of the Eastern Iowa EV Readiness Plan group and Iowa Clean Cities.

Monitoring other environmental issues, such as the transportation impacts and opportunities from changes in long-term weather patterns, extreme weather adaption/mitigation, sustainability, hazard mitigation, and energy independence, will continue to occur. With an emphasis on regional resilience, it will be important to look at system redundancy, mitigation efforts, and fortifying our infrastructure from man-made and natural hazards. The global pandemic of CY2020-2021 had dramatic impacts on the economy and public transit. Through participation in the joint emergency operations center, Bi-State staff provided liaison communications between the EOC and the transit systems, helping to secure needed protective supplies and information to support continued system operations. In CY2018, Bi-State staff secured a FHWA Extreme Weather Resilience Pilot Project, 1 of 11 awarded nationally, to assess vulnerable transportation facilities and offer adaptation strategies to incorporate into the Long Range Transportation Plan. The *Quad Cities Iowa/Illinois MPO Extreme Weather and Transportation Resilience Report* was completed in 2020, and elements were incorporated into the 2050 *Connect QC 2050: Quad Cities Long Range Transportation Plan*.

- ***Coordinate multi-modal transportation needs for long-term system economic, social and environmental vitality.***

Passenger and freight transportation issues are important considerations for a multi-modal transportation network. Having multiple modes locally provide links for passenger travel as well as goods movement. These modes connect the metro area to the greater mega-region and its economy. Passenger rail service between Chicago and Omaha via the Quad Cities through the Midwest Rail Initiative is an area priority. The last third of the rail infrastructure improvements are

in preliminary engineering and environmental review. Rail infrastructure improvements for passenger service will aid freight movement and reduce congestion on highways.

Staff participate in transit projects and mobility, connectivity, and accessibility issues. Transit will continue to be studied, including transit-oriented development, transit priority corridors, transit alternatives (including bus rapid transit and express bus options), asset management, improved facilities, and services coordination. In addition, assistance in promoting commercial air service and terminal improvements at the Quad Cities International and Davenport Municipal airports will be provided.

Trail development coordination to complete a contiguous system that incorporates the national American Discovery Trail (ADT) and Mississippi River Trail (MRT) will also continue. The metro area also works with state and local jurisdictions on coordination of state and regional trail systems. Similar to aging roads, the metropolitan area trails built 20 or more years ago and providing a vital network for access between communities are candidates for reconstruction. Bi-State staff provide assistance with grants, coordination, and encourage non-motorized transportation improvements for improving community health and tourism.

Transportation assets on and along the rivers in the Quad Cities will be considered to facilitate river navigation and maritime highway opportunities, as needed. Passenger ferries and a newer ferry terminal offer a river crossing alternative. Freight movement as it pertains to the various modes must also be part of the planning process. The *2015 Bi-State Region Freight Study* frames the next steps for improving the economic vitality of the region. In CY2024, updates to the data within the freight plan were completed through a consultant. Staff will monitor activities related to funding for intermodal improvements in the greater Quad Cities Area and work cooperatively with the states' freight planning efforts. The Rock Island Regional Port District will be undertaking a master plan to enhance transportation facilities that support the multi-modal freight movement in the district. A Ports of Eastern Iowa Authority was created in 2024 to leverage opportunities for the Iowa Bi-State Region. A local regional freight forum, called as needed, is used to discuss and facilitate freight transportation needs within the region.

Other freight concerns will be addressed as needed. Funding was secured through Illinois Statewide Planning and Research funds in 2018 to examine options to improve rail freight movement over the Mississippi River at the two existing rail-river crossings. The study concluded in March 2020. As part of the Corn Belt Ports on the upper Mississippi and Illinois waterways, the Mississippi River Ports of Eastern Iowa and Western Illinois Statistical Area, dba Upper Mississippi River Ports (UMRP), was designated in CY2020 for 15 counties bordering Iowa and Illinois to bring greater attention to the economic importance of the river on this region and its status nationwide. A web-based mapping effort supported with Statewide Planning and Research funds located and cataloged terminals and ports in the Upper Mississippi River Ports. The effort began in 2021 and was completed by CY2023. The interactive map is posted on the Bi-State website.

- **Implement long range transportation plan projects, as needed.**

The *Connect QC 2050: Quad Cities Long Range Transportation Plan* was adopted in March 2021. Elements of this plan include modal considerations along with ITS, Title VI review, sustainability and resilience, and mobility options. Emphasis will continue to be placed on system preservation and maintenance, utilizing limited resources in an efficient manner, and examining economic vitality, sustainability, resilience, and community livability as part of the transportation system review. These concepts support a transportation network that is durable, resilient, and supportable. Public outreach will continue as projects move toward implementation by engaging interested parties and the public at large through a transparent and accessible process. Staff will continue to provide information on long range plan issues to various entities and to provide access through the internet to the plan document. Implementation efforts will evolve as the area moves toward the development of the subsequent *Thrive 2055: Quad Cities Long Range Transportation Plan*. Additionally, staff will utilize the travel demand model for general assistance requests and related technical studies. Modifications to the model data and network will be conducted, as needed. Future innovations in modeling techniques and data resources will continue to be researched and implemented as feasible.

- **Integrate safety and security activities into overall transportation planning.**

Safety for traffic operations as part of the Congestion Management Process (CMP), formerly Transportation Management System (TSM), has long been an element of the area's transportation planning process. From preparation of an intersection crash analysis report to incorporating safety factors into the Surface Transportation Block Grant (STBG) Program evaluation process, these elements of transportation safety will be continued. Additionally, activities to facilitate safer pedestrian and multi-purpose trail access to schools will occur. A traffic safety summit was held in CY2023 and again in CY2025 to include elements of motorized and non-motorized traffic safety in conjunction with the development of a traffic safety action plan. The Traffic Safety Action Plan (2025) supports Vision Zero and identifies emphasis areas to reduce fatal and serious injury crashes using the Safe System Approach for implementation strategies.

Since 2001, the Quad Cities MPO has focused greater attention on public safety and security. Planning for a resilient transportation system through applied technology, improved and redundant communications, evacuation routes, and hazard mitigation for both man-made and natural disasters will continue to be relevant. In CY2022, the Bi-State Regional Intelligent Transportation System (ITS) Architecture plan was updated. ITS is an integral component of traffic safety and congestion management for efficient operations of the transportation system.

Transportation system reliability and redundancy as well as preparedness will carry the metro area through natural and man-made crises. The *Extreme Weather and Transportation Resilience Report* (2020) identified critical facilities and corridors where disruptions to the transportation system should be minimized or mitigated. It will be vital to the metropolitan area to monitor vulnerable facilities and strategies for lessen disruptive transportation network effects and provide alternative mobility options due to these system disruptions. Staff will provide technical assistance related to interdisciplinary transportation safety and security efforts between two states, multiple counties and municipalities, as well as a federal military installation and assist with coordination of intergovernmental agreements, technology deployment, and other resources.

- **Address issues related to implementation of IIJA/Bipartisan Infrastructure Law, and monitor transportation reauthorization implementation and other funding sources.**

Section 3 – Issues and planning emphasis

The five-year federal transportation bill – Infrastructure Investment and Jobs Act (IIJA) or Bipartisan Infrastructure Law (BIL) – was authorized on November 2021 and expires in September 2026. The Act allowed for \$567.5 billion for five years and provided for program continuity with core programs remaining and a number of new programs and discretionary programs. As local governments pursue discretionary grant programs, Bi-State staff provide letters of concurrence related to projects' consistency with MPO and regional plans, and provide data and mapping support where needed.

Efforts continue to complete the projects under the previous reauthorization (FAST). In FAST, no discretionary projects were identified, and funds have programmed through core highway programs. Many core programs have continued through the IIJA, and there are a number of new programs. Staff will monitor and assist with project implementation of the I-74 corridor project, I-80 corridor and bridge replacement, as well as other area transportation needs. The north section of I-74 in the Iowa Quad Cities remains to be funded, and the I-74/John Deere Road interchange is not yet programmed in the Illinois Quad Cities, just beyond the I-74 corridor project area.

In addition to core highway and transit programs, staff will monitor potential new funding sources as they relate to transportation planning and programming, as well as those that are part of a new federal surface transportation reauthorization. For example, transportation monies under COVID-19 relief for state and local highway and transit operations, and retrofitting for reducing the virus spread were issued by Congress that were in addition to those authorized through the Highway Trust Fund in FY2021 and 2022. The current federal priorities include addressing extreme weather impacts, transportation safety, asset management and maintenance, process streamlining, public transit investment, electric vehicle readiness, focus on operations, automated vehicle readiness, and recognition of the land use component of transportation.

Elements of the Transportation Planning Process

The following is a general description of the status, anticipated accomplishments, and procedures used to carry out the major elements of the transportation planning process.

Investigation of Social, Economic, and Environmental Impacts

The impact of transportation facilities on the social character of the Quad Cities community, its economic base, and its environment were all factors evaluated during the development of the long-range transportation plans for 1985, 1995, 2005, 2020, 2025, 2035, 2040, 2045, and 2050. During development of these plans, alternative highway, transit, trails, and sidewalk schemes were evaluated with respect to their social, economic, and environmental effects. Similar considerations have been part of the area's Surface Transportation Block Grant (STBG) and Transportation Alternatives Set-Aside (TASA) programming processes as part of a technical evaluation and advisory ranking of candidate projects. This was also applied to the Carbon Reduction Program (CRP).

Assurance of Equal Rights

An assessment of the impact of transportation facilities and services as required by UMTA (now FTA) Circular 1160.1 was updated during FY 1987. This assessment was updated in FY 1992 and again in FY 1994. The process provides for an evaluation of how proposed transportation facilities affect individuals' civil rights, and focuses on ensuring that no persons are excluded from participation in, deprived benefits of, or otherwise subjected to discrimination under any program for which federal assistance is to be requested because of race, color, sex, national origin, or physical limitations. A *Title VI Program and Non-Discrimination Policy* update was prepared and submitted in FY 2019 for Bi-State

Regional Commission. An update was completed in CY2024. The transit systems maintain individual Title VI policies. The Bi-State Title VI policy includes a Limited English Proficiency (LEP) analysis. A LEP analysis was also prepared for the *Connect QC 2050: Quad Cities Long Range Transportation Plan* and included in the *Bi-State Region Transit Development Plan (2023)*. The results were utilized in the implementation of the plan's public outreach as part of the release of the full draft.

Specific procedures used to comply with Title VI of the Civil Rights Act include: the preparation of maps, using Census and American Community Survey data, to identify concentrations of minority groups; promotion of the citizens' participation process to minority groups; determination of special transportation needs of and effects on minority groups; and determination of non-user and user benefits and costs of transportation projects located in minority areas.

Citizen participation by a wide variety of participants is developed through the comprehensive use of Bi-State's communications program. The involvement effort includes citizen appointees from Rock Island and Scott Counties as Bi-State Commissioners to support this basis of Title VI. In FY 2011, a presentation on Disadvantaged Business Enterprise (DBE) was provided by the Iowa Department of Transportation to review the process for Commissioners and educate them on opportunities to expand transportation construction opportunities within the region. Bi-State Regional Commission agency contract opportunities are reviewed annually and submitted to the Iowa DOT for information. Information on transportation workforce and labor plans was shared with the MPO Technical and Policy Committees.

Depending upon the type of information to be distributed, the communications process informs a variety of transportation users of transportation planning and project development activities and receives feedback through the following: public meetings, public hearings, surveys, use of existing resources (community group meetings), radio and television, website, public affairs programs, and media publicity.

Outreach to protected classes will be continued in future long range transportation plan update processes and through procedures outlined in the MPO's Public Participation Plan located in the Appendix of this document and posted to www.bistateonline.org.

Planning Transportation Services for Accessibility and Mobility

Limitations of transportation services for persons with fewer resources and physical or other limitations have been studied over the years. Section 2 noted Bi-State Regional Commission's efforts under equal opportunity and non-discrimination, referencing the Title VI Policy. The paragraphs above under "Assurance of Equal Rights" discussed outreach efforts to households with fewer resources or other barriers that would limit their use of the metro area transportation system as part of the planning process, but also includes looking for transportation solutions that support improved accessibility and mobility.

The United States Department of Transportation (U.S. DOT) rules and regulations on Section 504 of the Rehabilitation Act of 1973 prohibits discrimination against people with disabilities in programs that receive federal financial assistance. This act set the stage for the Americans with Disabilities Act (ADA) of 1990. ADA requires public agencies with more than 50 employees to create a transition plan to identify physical obstacles in public facilities that limits accessibility by individuals with disabilities to programs or activities

The passage of the Americans with Disabilities Act (ADA) of 1990 brought new U.S. DOT rules and regulations concerning transportation services for the disabled. Under ADA, transit providers must

Section 3 – Issues and planning emphasis

provide a comparable level of service to individuals with disabilities and make provisions for a special paratransit service for those disabled individuals who cannot access service within a ¼ mile distance of an existing fixed route. In order to meet these requirements, a plan for paratransit implementation was requested by the Federal Transit Administration. Between 1990 and 1997, the contents of the annually updated plan included information on how Bettendorf Transit, Davenport CitiBus, and the Rock Island County Metropolitan Mass Transit District (MetroLINK) intended to meet the regulations and deadlines outlined within the ADA regulations. In FY 1997, the transit systems declared conformity with the six ADA criteria and ceased annual plan updates. In FY 1998, the Quad Cities' transit systems recertified their conformity and continue to do every year in the FTA grant application process.

Specific procedures used in planning public transportation facilities and services that can be effectively utilized by disabled persons include the following: input by citizens with disabilities and organizations into the identification of areas with a high percentage of these individuals, conducting surveys on their transportation needs and improvements, conducting and tabulating the results of cost versus benefit studies, and identifying other agencies that may provide transportation alternatives to members of the community with mobility and accessibility limitations. The latter task resulted in the completion of the *Specialized Transportation Services Inventory*. This document has been incorporated into the *Bi-State Region Transit Development Plan (TDP)* and appears as an appendix with the inventoried information. The information was updated as part of the cyclical update of the TDP in CY2023.

Bi-State staff members worked with all the transit providers on a coordinated plan of compliance for the paratransit portion of ADA. In the past, Bi-State had performed annual updates of the *Quad Cities Transit Development and Disabled Accessibility Study*. However, the coordinated human services transportation planning efforts serve as a replacement to the accessibility study.

In 1996, federal welfare reform legislation created an emphasis on moving individuals from welfare to work. Transportation was identified as a barrier to accessing jobs both nationally and regionally. Public assistance recipients and low-income individuals are not always located near jobs that pay a livable wage. They often do not have reliable transportation. In response, TEA-21 included a new program for Job Access and Reverse Commute (JARC) to fund solutions to these barriers. The program was continued with SAFETEA-LU but was blended with existing FTA funding programs in MAP-21 and carried forward in FAST, and continued in IIJA. Planning efforts continue to examine existing transit services, non-traditional working hours, childcare responsibilities, and poverty-level residents in rural areas, and look at human services coordination to meet the travel demand of those need mobility and accessibility accommodations.

Areas of transportation planning, including accessibility for the persons with disabilities, rural transportation, and sustainable development, are affected by the spatial mismatch between jobs and potential workers. The New Freedom program was also initiated under SAFETEA-LU to provide mobility options beyond what Americans With Disabilities Act (ADA) provides. It was merged into existing FTA funding programs under MAP-21 and continued similarly under FAST and IIJA. The *Bi-State Region Transit Development Plan (2023)* inventories existing transportation providers, solicits and outlines mobility needs/issues, and offers potential solutions through coordination between transit providers and human services agencies.

Transit services planning is not alone in addressing access to these populations. Traffic operations, pedestrian and bicycle facilities, and other transportation facilities, such as stations, transit hubs, airports, and others also need to examine opportunities to provide services/access for traditionally underserved persons and individuals with disabilities.

Consideration of Involvement of Other Transportation Services Providers and Resource Agencies

In the event that funds are authorized for federal or state assistance to other transportation service providers, the Bi-State Regional Commission staff will work within the established guidelines to provide information on funding sources to these providers. Bi-State will continue to inform other transportation providers of developments occurring in the public sector and encourage their participation in the planning process through the Regional Transportation Advisory Group and/or Regional Transit Interest and Advisory Group.

The metropolitan transportation planning process is to provide for the involvement of transportation stakeholders from traffic, ridesharing, parking, transportation safety and enforcement agencies; commuter rail operators; airport and port authorities; toll authorities; appropriate private transportation providers, and appropriate city officials; tourism agencies; and provide for the involvement of local, state, and federal environment resource and permit agencies as appropriate.

Consideration of Livability, Sustainability, and Energy Conservation

Under the U.S. Department of Transportation, livability focuses on the human side of the built environment that supports wellbeing and quality of life of the residents in an area. Context sensitive solutions, complete streets and access for all through choices made for our transportation system support livability, and when social, economic and environmental conditions are considered for generations to come, our transportation system becomes sustainable.

Managing congestion in an urban area, supports livability by reducing air quality impacts, reducing travel times, and improving safety. Congestion Management Process (CMP) alternatives are generally considered by the various jurisdictions through project development. These are outlined in the MPO's CMP as an addendum to the long range transportation plan. Alternatives such as signal timing synchronization, work zone management, transit on-time performance, availability of trails and bicycle lanes, van/carpooling programs, etc. are examples of operational, non-motorized alternatives, and programs under the CMP. Specific techniques will be considered by the various jurisdictions in the Quad Cities MPA based on the local congestion situation. This will help ensure effective use of existing transportation resources.

Concerns related to air quality have coincided with discussions on energy conservation, livability, and sustainability. The Bi-State Region Clean Air Partnership was established in CY 2009. By the end of CY2017, there were 22 public and private partners pledging to implement activities toward air emission reductions. While the Clean Air Partnership was a short-term awareness effort, alternative fuels/vehicles, fleet management and operations, and energy conservation measures continue to be discussed by the Bi-State Region Air Quality Task Force. Air quality interests will be provided information on these alternatives and options. In FY 2011, Scott County completed a countywide sustainability plan that addressed critical resources and how to integrate elements of the environment, economy, and community to become more sustainable. In FY 2012, the Bi-State Region Air Quality Task Force created the "*Make Air Quality Visible*" *Strategic Plan* for reducing outdoor air emissions. In FY 2014, the strategic plan was updated and serves as the framework to voluntarily reduce emissions. Alternative fuels and alternative energy workshops were held in 2018 and 2019 as outreach on these topical areas and funded through local foundation monies. In FY2021-22, the MPO participated in an electric vehicle readiness planning for Eastern Iowa to support alternative fuel vehicles and infrastructure, as options within the urban area. Bi-State staff continue to participate in the Eastern Iowa EV readiness meetings to monitor activities, funding, and development of options for EV charging.

Section 3 – Issues and planning emphasis

Linking housing, employment, the environment, and transportation have long been a part of area community comprehensive planning. Refer to area history of comprehensive planning in the appendix. These community development issues will be invigorated by livability and sustainability initiatives where land use decisions made with area transportation network access, mobility, and system efficiency in mind to convey people to where they live, work, and play. Housing and transportation are the largest expenses typically for most households. Reducing one or both of these expenses through land use policies and multi-modal system improvements will enhance livability for a variety of area residents.

Status of Technical Activities

Studies pertaining to the analysis of existing and expected transportation demand, transportation facility investments, and system management techniques have been undertaken throughout the fiscal year. In 2014, a household travel survey was completed for the MPA. In fall 2015, a freight commodity study for the Bi-State Region was completed. An addendum to the 2015 *Bi-State Region Freight Plan* was completed in CY2024. Other special studies completed in CY2020 include a Quad Cities strategic traffic safety plan, an Illinois 92 corridor study from Rock Island to Silvis, and a Mississippi River rail bridges alternatives analysis. The Quad Cities *Extreme Weather and Transportation Resilience Report* was finalized in 2020 and published in early 2021. In FY2024, consultant contracts were initiated to create a traffic safety action plan, and develop a transportation study of the Andalusia Road-Indiana Bluff Road corridor. These studies will be completed in CY2025.

As indicated earlier, the *Connect QC 2050: Quad Cities Area Long-Range Transportation Plan* was completed in March 2021. Long-range projects are monitored for progress as funds become available for programming. Facilitation of corridor studies are one way of moving projects from concept toward implementation. The multi-year Transportation Improvement Program (TIP) has been completed and is updated annually. The *Bi-State Regional ITS Architecture Plan* was last updated in CY 2022 and is examined annually for consideration of updates with an update to coincide with the completion of I-74. The *Bi-State Region Transit Development Plan (2023)* is reviewed annually to monitor transit mobility and human services coordination issues and programs. Updates are required every five years, and the next will occur in CY2028.

Surveillance inventories of social, economic and environmental data, and transportation facilities data are also undertaken. With access to congestion datasets, manual travel time surveying is conducted as needed. An intersection crash report was prepared in CY2021 with the Quad Cities Traffic Safety Report, and shared with local officials to aid non-recurring congestion. Staff is continuing to work cooperatively with Illinois and Iowa DOTs on statewide Highway Safety Plans. Traffic and trail counting is conducted on request by jurisdictions in the metro area. In addition, frequent monitoring of projects contained in the annual elements of the TIP is carried out to ensure their timely completion. These monitoring efforts are conducted by the Transportation Technical Committee through their review of the *Quad Cities MPO Projects Progress Report*. The report is updated to the Bi-State Regional Commission website following each Technical Committee meeting.

Agreements

Included in the appendix of this document is a copy of the cooperative agreement entered into among the Bi-State Regional Commission, publicly-owned operators of mass transit services, and the Iowa and Illinois Departments of Transportation, which specifically present cooperative procedures to be used in carrying out transportation planning and programming. It was updated in December 2011.

Agreements for the federally-required performance management are in the appendix and outline roles and responsibilities between the MPO, transit providers, and the DOTs. The MPO understood that Transit Asset Management targets were to be in place by June 30, 2017, and worked toward that end in cooperation with the local transit systems who set targets in January 2017. The MPO supported respective state safety targets (October 2019), conditions targets (September 2018), transit systems asset management targets (March 2019). Targets for the MPO must be set 180 days following each state's setting of targets. The first performance measures to be set were for the safety targets with a deadline for MPO approval in February 2018, and reviewed annually, or in cycle thereafter. Greenhouse gas targets were expected to be considered by July 2024, but target setting has been put on hold. Targets will be reviewed and either state or transit system targets will be supported or the MPO will develop its own targets in evaluating the best way to manage the MPA's transportation system. The compilation of these performance management records is contained in the Performance Management Addendum of the 2050 LRTP.

4. SUMMARY OF PLANNING ACTIVITIES/WORK TASKS

The Transportation Planning Work Program (TPWP) details the transportation planning activities to be conducted through Bi-State Regional Commission during a fiscal year (July 1st to June 30th). This work is carried out in cooperation with local city and county engineers and planners, the transit operators, representatives from the Illinois and Iowa Departments of Transportation, and staff of the Federal Highway Administration and the Federal Transit Administration.

The work program focuses on the three main transportation responsibilities of Bi-State: 1) the coordination of overall transportation planning and operations activities; 2) maintaining a long-range transportation plan; and 3) the programming of transportation projects to address the needs identified in that plan and associated studies. Information supplied by Bi-State through short-range planning activities such as crash studies, capacity analyses, transit route information, and so forth are used by the local and state planners in the project development process from planning to implementation.

The current long-range transportation plan (LRTP), *Connect QC 2050: Quad Cities Long-Range Transportation Plan (LRTP)*, will be monitored, as needed. The plan was adopted March 24, 2021 with the next update slated for March 2026. As part of the 2050 LRTP update, the 2015 household travel survey was used in developing the travel demand model to reflect area travel patterns and forecast future trips. Technical corrections were approved in February 2022 in Chapters 3 and 4 of the LRTP.

The Transportation Improvement Program (TIP) is a listing of all state and federally-funded surface transportation projects anticipated to be implemented within the metropolitan planning area during a period of time, currently four consecutive years. A TIP has been formulated annually since 1972. The TIP contains Annual Elements (AE) for each Federal Fiscal Year (FFY) (October 1st to September 30th) and approximates funding spent on maintenance activities. The TIP also includes a reporting of the locally-programmed status of Surface Transportation Block Grant (STBG) Program, Transportation Alternatives Set-Aside Program (TASA), and Carbon Reduction Program (CRP) funds attributable to, and obligated within, the metropolitan planning area. It also includes information on maintenance and operations.

The *FY2026 Transportation Planning Work Program* is divided into four major categories: 1) Program Support and Administration; 2) General Development and Comprehensive Planning; 3) Long-Range Transportation Planning; 4) Short-Range Transportation Planning and 5) Complete Streets Transportation Planning. For categories 1.0 through 4.0, the percentages sum to 100% with category 5.0 being the 2.5% set-aside taken from the target of the DOT PL funds in Iowa. The State of Illinois provides a 2.5% set-aside statewide rather than at the metropolitan level. A brief description of each category outlines the work elements that are included in each task. Funding levels from each source (IL and IA PL and IL and IA FTA Section 5305d funding) are identified by the percentages following each numbered work activity. The targeted percentages are based on each work activities' percent of the total available transportation planning funds. In 2019, Illinois DOT merged planning targets into a combined PL and FTA amount, and is reflected accordingly below. A general summary of categories follows:

1.0 PROGRAM SUPPORT AND ADMINISTRATION:

- Transportation Planning Work Program Development
- Management and Operations
- Public Information, Citizen Participation, and Public Participation Process Development

2.0 GENERAL DEVELOPMENT AND COMPREHENSIVE PLANNING:

- Information Management
- Development and Comprehensive Planning
- Modal Planning
- Environmental Considerations
- Technical Assistance

3.0 LONG-RANGE TRANSPORTATION PLANNING:

- Long Range Plan Development
- Modeling
- Facilities Planning
- Facilities Programming and Development
- Technical Assistance

4.0 SHORT-RANGE TRANSPORTATION PLANNING:

- Transportation Improvement Program Development
- Facilities Planning
- Facilities Programming and Development
- Technical Assistance

5.0 COMPLETE STREETS TRANSPORTATION PLANNING:

- Transit, Bicycle and Pedestrian Plan Development
- Facilities Planning
- Facilities Programming and Development
- Technical Assistance

1.0 Program Support and Administration (5%)

Status

A TPWP (also known as the Unified Planning Work Program – UPWP 23 CFR 450.104) has been prepared annually since FY 1974 as a statement of transportation planning work to be carried out in the metropolitan planning area. Depending on the source of funds, separate applications and contracts are prepared along with program monitoring, including auditing, is undertaken on an annual or continuous basis. All major funding sources now accept the single audit done by a private certified accounting firm.

The Commission prepared a Title VI Non-Discrimination Policy (2024) for its federally-funded planning activities. Complaint forms are posted in the office and on the Bi-State Regional Commission website to allow for investigation where access to the transportation planning process does not meet this law.

Bi-State's public information function includes a strong emphasis in community relations, citizen participation, and technical assistance. Numerous communities and groups have used Bi-State as

a technical resource for graphics, communications, and public relations work as they deal with the public in local government. Bi-State’s website is another resource (www.bistateonline.org). There is a Quad Cities MPO landing page for quick access to information specific to the MPO role and transportation planning efforts (<https://bistateonline.org/transportation-and-mobility/quad-cities-metro-planning>). A navigation bar was added to this page for additional ease in moving from the land page to other MPO resources.

The purpose of the public information program is to not only inform the general public, but also specific interest groups, such as elected officials, community leaders, resource agencies or other interested parties, as framed by the Public Participation Process (See Appendix). Communications tools such as in-person and virtual meetings, workshops, publications, website, and other methods will be utilized on an as needed basis to convey information on the transportation planning process.

Objectives

Administer planning and management contracts that support the Commission's activities in an effective and timely manner.

Coordinate the Commission's multi-functional program between and among the participating federal, state, and local governments and public transportation providers.

Provide for continuing improvement of staff resources beginning with recruitment based upon equal opportunity and non-discrimination policies, personnel evaluation, and relevant training opportunities.

Inform targeted audiences about transportation system development. These groups will include the following:

- Bi-State Regional Commission
- Local elected officials
- Public officials
- Public interest groups
- Community leaders
- Resource agencies
- News media
- General public including but not limited to: minority, low-income, disabled, elderly, private transit providers, modal transportation interests, tourism, environmental interests/agencies, school districts, and multi-modal freight interests

Use the communications and public response process as a method of involvement and feedback provided by the public and private sector.

Encourage the use of Bi-State as a technical resource for local governments in the areas of graphics, mapping, public relations, citizen participation, and data services.

Major Action Steps and End Products

- ◆ Revise, when necessary, the FY2026 TPWP and develop the FY2027 TPWP

Section 4 – Summary of Planning Activities/Work Tasks

- Revise FY2026 TPWP (as needed, includes revisions needed to utilize remaining FY2025 Illinois planning funding)
- Develop FY2027 TPWP (February-June)
- ◆ Prepare and submit budgets, grant applications, agreements, assurances, and other documentation to the funding sources that support transportation planning activities of the Bi-State Regional Commission (July-August, Feb-June)
- ◆ Prepare Illinois FHWA-PL and FTA Section 5305d contract (April-June)
- ◆ Prepare Iowa FHWA-PL and FTA Section 5305d contract (April-June)
- ◆ Prepare and submit financial and work program status reports (monthly, includes FY2025 end of year reporting)
- ◆ Prepare monthly and/or quarterly and annual closeout reports for the transportation planning funding programs (as scheduled, includes FY2025)
- ◆ Provide staff support for Bi-State Regional Commission and Transportation Policy and Technical Committees (as scheduled)
- ◆ Provide staff support and conduct committee, advisory group, and task force meetings (as needed, includes filling positions vacated in FY2025, and carrying over into FY2026)
- ◆ Provide new member orientation (as needed)
- ◆ Coordinate transportation program activities with governmental entities and the general public (on-going, includes activities in progress, carrying over from FY2025)
- ◆ Maintain communications lists/databases (continuous)
- ◆ Maintain graphic and mapping services (continuous, includes activities in progress, carrying over from FY2025)
- ◆ Prepare programs report to Commission (monthly, includes those carried over from FY2025)
- ◆ Prepare meeting reports (as scheduled, includes those carried over from FY2025)
- ◆ Prepare annual report (as scheduled)
- ◆ Prepare and revise *Public Officials Directory* and master mailing/communications database (biannual publishing and continuous mailing list updates)
- ◆ Administer agency policies related to transportation, such as Title VI, non-discrimination, and equal opportunity policies (on-going) and update to incorporate changes in staffing and other federal requirements, such as Federal Transit Administration elements
- ◆ Maintain Bi-State website (on-going, includes activities in progress carrying over from FY2025)
- ◆ Provide information to the general public concerning transportation planning activities
- ◆ Continue public relations through intergovernmental meetings and business chambers (on-going)
- ◆ Encourage citizen participation and expand involvement as needed (continuous)
- ◆ Prepare media/news releases (as needed)
- ◆ Continue implementation of recommendations in *2024 MPO Certification Review Report* (ongoing for implementation, includes activities carrying over from FY2025).
- ◆ Monitor transportation reauthorization and technical aspects that may effect the MPA's transportation planning processes and procedures
- ◆ Evaluate and revise *Public Participation Process*, as needed, and review the Regional Transportation Advisory Group and Regional Transit Interest and Advisory Group communications database to ensure representatives of all modes of transportation, including rail, trail, roadway, transit, air, river navigation and freight, and human

services coordination interests are represented and consulted on the public participation plan (continuous)

Funding Sources and Amounts

IL DOT PL/FTA 5303d	\$ 27,859	
+FY2024 Carryover	\$ 4,865	
IA DOT PL	\$22,389	
IA FTA 5305d	\$4,113	
State/Local/Other	<u>\$ 14,806</u>	
 Total	 \$ 74,032	 (xxx FY26 employee hours)

Previous Work in FY2025

Twelve monthly Commission meetings were staffed. • Held 10 Technical and 9 Policy Committees’ meetings (July 2024-June 2025). • Media information was prepared and disseminated. • Staff meetings were held and time sheets were reviewed for accuracy. • Staff supervision, including HSTP regional transit coordinator position, training, and performance reviews were continued. • Hired 1 planning intern, and continued hiring for vacant positions. • Fiscal reports were prepared and budgets reviewed. • Monitored implementation of FY2025 TPWP. • Facilitated grant agreements. • Developed FY 2026 agency budget and prepared FY2026 TPWP. • Continued computer system troubleshooting and system planning implementation. • Monitored federal regulations related to IJJA reauthorization and changes in transition of federal administrations. • Facilitated implementation of federal transportation programs, status on prior remaining projects and guidance on compliance. • Monitored follow-up needs related to 2024 Certification Review and administrative implementation of recommendations. • Continued public information opportunities – mailing lists/communications database, Public Officials Directory, website platform and other electronic media, and data/graphics technologies..

2.0 General Development and Comprehensive Planning (20%)

Status

Decision-making, whether it is of a planning, management, or development nature, is founded on the availability of pertinent information to exercise judgment or evaluation. In the Bi-State area, agencies, local governments, private groups, and individuals rely on basic social and economic information to determine courses of action and activity. The provision of this basic, common data is one of the services offered by the Commission.

Data collection, analysis, mapping, and dissemination have all been continuing efforts of the Commission since its inception in 1966. The Commission periodically prepares and publishes estimates and forecasts of population and other critical socio-economic variables and presents such data in tabular, graphic, and map formats. The central data service function of the Commission maintains a core of commonly requested socio-economic data. It does not, however, encompass all of the data collection, analysis or forecasting tasks carried on by the agency. Data tasks that are more exclusively identifiable within a single program function are included within that program.

Other activities addressed in this component include modal issues dealing with rail, air, water, freight and trails. Interdisciplinary public safety and security coordination are another aspect to ensure a reliable and effective transportation network. Forecasts also play a role in establishing growth patterns and land use changes. Further, along with land use changes are environmental and social considerations.

Objectives

Maintain a core of social and economic data about the general population for the five-county Bi-State area that is as complete, current, and accurate as reasonably possible and make this information available to the general public via various media, e.g. graphics, factsheets, reports, summaries, media releases, web, mapping, etc.

Major Action Steps and End Products

- ◆ Maintain current and accurate records and mapping on data for the general population, including but not limited to Census/American Community Survey, employment, and land use data, and other data sets that support transportation planning (as requested from individual jurisdictions) in the Bi-State area (continuous), and provide data support for LRTP development (cyclical) and other transportation planning documents and grants (on-going, includes activities carrying over from FY2025)
- ◆ Integrate decennial Census and updates of American Community Survey data as available into the Bi-State documents/reports data on agency website (continuous, includes activities carrying over from FY2025)
- ◆ Conduct follow-up for Census programs/data releases, monitor status, and provide coordination for Census Transportation Planning Products (CTPP) data usage and development, and utilize other available data sets that support transportation planning (as scheduled and requested)
- ◆ Monitor urbanized area boundary review process as part of next decennial Census (includes carrying over from FY2025).
- ◆ Provide technical assistance in the land use and environmental services area, including comprehensive land use planning, housing and transportation relationships, development ordinances (e.g. zoning, subdivision, etc.), and environmental assessments and their impact on the transportation system (as requested, includes activities carried over from FY2025)
- ◆ Participate in state and national associations to monitor trends, regulations, and legislation.
- ◆ Provide technical assistance in the interdisciplinary public safety and security efforts among the two states, multiple counties and multiple municipalities, and a federal military installation and assist with coordination of intergovernmental agreements and resources (as requested, includes activities carrying over from FY2025)
- ◆ Investigate general transportation issues as they occur in various transportation modes such as rail, air, water navigation, and intermodal issues (as needed)
- ◆ Monitor status of passenger rail transportation service and facilities, and provide technical and coordination assistance among local governments (includes activities carried over from FY2025).
- ◆ Continue to monitor status of National Ambient Air Quality Standards (NAAQS) and greenhouse gas emissions requirements, long-term weather pattern impacts and resilience, hazard mitigation, including pandemic response/recovery, stormwater

management, and their impact on transportation planning (continuous, includes activities carrying over from FY2025)

- ◆ Inform freight interests of planning activities through the Regional Transportation Advisory Group communications, local chambers’ industry logistics interests, and business members (as needed)

Funding Sources and Amounts

IL DOT PL/FTA 5303d	\$ 111,433	
+FY2025 Carryover	\$ 19,460	
IA DOT PL	\$89,557	
IA FTA 5305d	\$16,453	
State/Local/Other	<u>\$59,226</u>	
Total	\$ 296,129	(x, xxx FY26 employee hours)

Previous Work in FY2025

Maintained socio-economic data and served inquiries. • Participated in Census mapping assistance, American Community Survey, quarterly cost of living survey, and dissemination of data. • Served mapping requests and maintained mapping data and files. • Maintained www.bistateonline.org website content, continued website updates and Tier 2 website redesign refinements. • Zoning amendments/revisions were examined for their impact on the transportation system. • Shared informational opportunities on land use planning, as related to transportation planning and participated in related workshops, webinars, and telemeetings. • Served inquiries and participated in comprehensive land use planning/sustainable development, development codes, environmental assessments and homeland security/hazards planning, funding requests, grant assistance for improving and/or protecting infrastructure, and attended related meetings. • Assisted and facilitated efforts related to improved communications for incident management and traffic operation. • Participated in service clubs, organizations, and chamber of commerce meetings, e.g. air service, passenger rail, general transportation; and made presentations regarding transportation issues,. • Monitored status of implementation of passenger rail service between Chicago and the Quad Cities. • Staff continued to monitor vendor testing performance for the Drug and Alcohol Consortium program. • Continued with GIS users’ activities within the Bi-State region and coordination for aerial photography data collection, and other area mapping data needs. • Participated in national and states’ Association of Regional Councils meetings. • Monitored air quality issues and assisted with attainment status coordination, emission reduction activities, and information dissemination.

3.0 Long-Range Transportation Planning (38%)

Status

Long-range transportation planning forecasts future travel demand, analyzes the current system's ability to meet future travel demands, and identifies what improvements will be necessary to address declining or excess demand. These improvements are subsequently directed through the short-range planning and programming processes to implementation.

Objectives

Identify multi-modal long-range transportation needs.

Major Action Steps and End Products

- ◆ Conduct transportation system analyses (as needed, includes activities carrying over from FY2025)
- ◆ Maintain transportation system inventory through various media (continuous, includes activities carrying over from FY2025)
- ◆ Provide technical assistance to participating governmental entities (continuous)
- ◆ Coordinate with state and local traffic counting programs to be used in the update of the metropolitan area Average Daily Traffic mapping (as needed)
- ◆ Conduct traffic studies and determine their impact on the long-range transportation plan (LRTP) (as requested, includes carrying over from FY2025), including additional planning toward implementation of the traffic safety action plan.
- ◆ Assist with long-term river crossing needs, including Mississippi River Crossing Study implementation, assistance with the implementation of the unfunded sections of I-74 Corridor, I-80 and Centennial Bridge reconstruction studies, legislative and funding needs for other MPA bridge needs, and other related bridge coordination issues (on-going, includes FY2025 work carrying over from I-74 and I-80 as well as the Centennial Bridge/U.S.67)
- ◆ Assist with other studies identified in the long-range transportation plan (as requested, includes activities carrying over from FY2025)
- ◆ Continue training on modeling programs/best practices through conferences/ workshops/webinars/meetings and work with the DOTs and model user groups (as scheduled)
- ◆ Continue in-house analysis capabilities for alternatives analyses (as requested, includes activities carrying over from FY2025)
- ◆ Maintain travel demand model network, databases, and software (continuous)
- ◆ Monitor planning area boundary with next decennial Census redesignation process and Traffic Analysis Zones (TAZs) for Census and/or other changing conditions and refine them (as needed)
- ◆ Implement *Connect QC 2050: Quad Cities Long Range Transportation Plan* (as needed)
- ◆ Monitor long range transportation planning issues, examining the multi-modal facets of the Quad Cities transportation system (as needed, includes activities carrying over from FY2025); and monitor for consistency with the current transportation act requirements if revisions, amendments, and/or administrative modifications are necessary, and/or implications of reauthorization (as needed, includes activities carrying over from FY2025)
- ◆ Continue to conduct public information process related to long range planning (continuous, includes preparing for next long range plan update)

- ◆ Assist in problem identification and appropriate solutions regarding long range plan projects among the various modes of transportation for the movement of goods and people (as requested, includes activities carrying over from FY2025)
- ◆ Continue to facilitate the regional freight plan implementation and efforts to enhance freight planning capacity within the agency, including oversight of plan data sharing and coordination with the freight forum stakeholders group (includes activities carrying over from FY2025) and working with stakeholders in trucking, rail and maritime sectors for improved access and goods movement efficiency.
- ◆ Assist with efforts to maintain and preserve the transportation system to support network reliability and sustainability (as needed, includes activities carrying over from FY2025)
- ◆ Continue to work on planning elements' issues of the LRTP including, safety, security, ITS, air quality, sustainability, livability, long-term weather pattern impacts and extreme weather adaption, hazards mitigation/resilience, congestion and asset management, maintenance and operations, Title VI review, human services coordination with transportation providers, and performance measures (continuous, includes activities carrying over from FY2025)
- ◆ Maintain the regional ITS Architecture Framework document for necessary revisions and new technology deployment (annual review and update every five years)
- ◆ Maintain Congestion Management Process (CMP) LRTP Addendum for revisions and update as appropriate (as needed and update every five years)
- ◆ Use social and economic data and model input for 2055 model update, including input for base and horizon years; and investigate and review best practices/opportunities for employment data and its alignment with the Iowa Standardized Model Structure parcel-based data (on-going, includes base year parcel data collection carrying over from FY2025)
- ◆ Monitor travel demand model needs for 2050 plan implementation and future plan update, including network and parameter verification and software needs
- ◆ Utilize household travel survey data and other resources to prepare travel forecasts and analysis; and look at alternative sources or opportunities to update travel data (as needed)
- ◆ Facilitate 2055 LRTP public input process and monitor timeline of strategies and evaluate potential outreach tools; continue modal data collection for 2055 modeling with 2023 base year and review consultation process with resource agencies into the future plan development
- ◆ Maintain Transit Development Plan (update cycle to satisfy guidance for Iowa's Passenger Transportation Plans and Illinois' Human Services Transportation Plans) and facilitate allocations and decisions related to core funding programs (as needed, includes activities carrying over from FY2025)
- ◆ Work on 2055 plan update related to safety, modal issues, and other items referenced in reauthorization of the federal transportation act and look ahead to elements that may become part of future plans

Funding Sources and Amounts

IL DOT PL/FTA 5303d	\$ 211,723	
+FY2025 Carryover	\$ 36,974	
IA DOT PL	\$ 170,157	
IA FTA 5305d	\$ 31,262

Previous Work in FY2025

Staff continued to address river crossing needs and served inquiries. • Monitored status of I-74 Mississippi River corridor reconstruction not yet complete. • Monitored I-80 corridor and U.S. 67/Centennial Bridge replacement studies, and other long-term Mississippi and Rock River crossing needs; and facilitated discussions on trail access on the approaches and bridges. • Looked for implementation opportunities for Mississippi River rail bridges and Illinois 92 corridor studies. • Completed facilitation of consultant-led Andalusia Road-Indian Bluff Road Corridor Study and Quad Cities-Kewanee-Muscatine Traffic Safety Action Plan. • Monitored issues from modeler’s users groups to apply to recommendations of travel model enhancements as part of Iowa Standardized Model Structure (ISMS) implementation. • Participated in trainings and users groups’ meetings related data analysis and modeling capacity building. • Participated in statewide long range (freight, rail, transit), trail or community transportation planning meetings. • Continued conversations on port statistical area, ports district and authority designations, and modal freight improvements. • Participated in national webinar on disaggregation technique used in the 2024 Freight Plan addendum data elements. • Facilitated Performance Measures target setting to incorporate into PM addendum to the *Connct QC 2050: Quad Cities Long Range Transportation Plan* by supporting the respective state targets for safety and asset management/reliability, and transit systems asset management. • Monitored and assessed strategies to address performance management requirements, including attending freight data, transit and safety peer exchanges on data availability, safety plans and transit asset management. • Assisted with long range plan implementation for various projects. • Continued work on area connections to the American Discovery Trail (ADT), Mississippi River Trail (MRT), Grand Illinois Trail (GIT), and wayfinding/signing issues (area wide and trail). • Trail development efforts included serving funding inquires, grants assistance, routing analysis, general public presentations, and attending related coordination meetings. • Continued efforts toward passenger transportation and human services coordination planning and implementation, meetings, and conferences. • Examined regional transit development plan projects in relation to the LRTP and assisted with implementation. • Monitored need for changes and implementation of the Regional ITS Architecture Framework document. • Continued to work on planning elements of the 2050 LRTP including, safety, security, ITS, air quality, sustainability, livability/community wellness, long-term weather pattern impacts/adaption, hazards mitigation/resilience, congestion management, maintenance and operations, environmental justice/effects, human services coordination with transportation providers, and performance measurements. • Continued on *Thrive 2055: Quad Cities Long Range Transportation Plan* update through public involvement outreach, chapters and mapping development, data collection and

analysis, fiscal constraint analysis, and travel demand modeling. • Extreme weather resiliency and durability used as reference for vulnerabilities to the transportation system, and continued gaining knowledge of long-term weather trends related impacts and research.

4.0 Short-Range Transportation Planning (37%)

Status

Short-range transportation planning analyzes short-term, low-cost improvements to mitigate existing transportation system deficiencies or enhancements. This type of planning, usually referred to as Congestion Management Process (CMP) and also known as transportation systems management (TSM) or traffic safety, maintenance and operations (TSMO), typically concentrates on topics such as traffic studies, safety and security planning, Intelligent Transportation System (ITS) planning/deployment, congestion mitigation, trail planning, and transit service analyses.

Objectives

Assist local governments in evaluating transportation system performance.

Identify short-term, low-cost system improvements or enhancement to improve mobility and choice of system users.

Major Action Steps and End Products

- ◆ Maintain FFY2025-2028 Transportation Improvement Program (TIP) through September 30, 2025 and prepare Illinois listing of Federally Obligated Projects (as needed, includes projects requiring revisions, as work carrying over from FY2025)
- ◆ Maintain FFY 2026-2029 Transportation Improvement Program (TIP) and prepare FFY 2027-2030 TIP that list projects receiving federal funds and provide for public participation in the process (update March-June, then continuous monitoring the remainder of the timeframe, includes ILDOT 5-Year Program edits provided after June 30, 2025, as work carrying over from FY2025)
- ◆ Provide technical assistance related to the transportation network to participating governmental entities (as requested, includes activities carrying over from FY2025)
- ◆ Evaluate progress of congestion management process implementation (formerly transportation system management-TSM) and deployment of specific techniques for possible use in reducing non-recurring congestion (on-going)
- ◆ Provide assistance to local governments with planning, programming, and meeting requirements for the state and federal transportation programs (as requested, includes activities carrying over from FY2025)
- ◆ Conduct evaluation processes for programming of federal transportation funds (such as Surface Transportation Block Grant, Transportation Alternatives Set-Aside, and Carbon Reduction Program), along with public participation (as needed, includes activities carrying over from FY2025)
- ◆ Evaluate transportation data (as needed, includes activities carrying over from FY2025)
- ◆ Provide technical assistance in non-motorized – bicycle facilities and pedestrian – planning (continuous, includes activities carrying over from FY2025)
- ◆ Provide technical assistance in transit planning to transit systems and work on human services coordination related to transportation mobility, utilizing the Regional Transit Interest and Advisory Group for public information and advisory input into passenger transportation (includes activities carrying over from FY2025)

Section 4 – Summary of Planning Activities/Work Tasks

- ◆ Hold transit managers meeting for transit coordination in the MPA (quarterly or as needed).
- ◆ Assist transit operators in preparing for and responding to the recommendations of FTA's Triennial Reviews (as they are conducted)
- ◆ Update, maintain, and determine appropriate distribution of Section 5307 capital and other designated and/or direct recipient funds or allocations (e.g. 5310 and 5339) to the Quad Cities MPO (October – March, as needed remainder of year, includes activities carrying over from FY2025)
- ◆ Facilitate FTA subrecipient supplemental agreements with fixed-route transit systems to facilitate projects related to the appropriate funding programs (includes activities carrying over from FY2025).
- ◆ Assist in documentation for grant applications and letters of concurrence with existing plans (as requested, includes activities carrying over from FY2025)
- ◆ Assist in preparation for and totaling of random sampling of ridership for FTA Section 15 reports for National Transit Database (NTD) reporting (as requested)
- ◆ Prepare or assist with Title VI compliance reports (as needed), and update Title VI document (on 3-year cycle)
- ◆ Document planning justification for projects included in Annual Element (TIP) (March–June, as needed remainder of the year)
- ◆ Assist in general planning needs and special studies of systems (as requested, includes activities carrying over from FY2025)
- ◆ Assist in transit route analysis and coordinated marketing efforts with transit providers; and coordinate rideshare and carpooling efforts and outreach with transit providers (as requested)
- ◆ Maintain and update a listing of transportation providers in the Bi-State Region (as needed)
- ◆ Address planning issues related to special needs and diverse populations
- ◆ Monitor ADA implementation, including ADA Access Plan maintenance (on-going)
- ◆ Include local transit agencies, social service agencies, welfare recipients, and low-income people, in conjunction with the regional transit development planning process, and facilitate transit mobility coordination with passenger transportation providers (on-going)
- ◆ Address non-discrimination issues tied to Title VI and where required by law and continue outreach to a variety of transportation users, and assess impacts through use of current census data, and other federal/state resources as part of Title VI update and other outreach efforts (on-going)
- ◆ Address safety/security and drug/alcohol testing planning (as needed, includes activities carrying over from FY2025)
- ◆ Assist cities, counties, transit operators, and not-for-profit transportation providers in complying with regulations regarding drug and alcohol testing requirements by coordinating and facilitating meetings and contracting needs of the Bi-State Drug and Alcohol Testing Consortium (on-going, includes activities carrying over from FY2025)
- ◆ Continue to meet with safety and emergency response representatives in the Quad Cities and Bi-State Region for communications and incident management, along with the multi-disciplinary safety teams (on-going, includes activities carrying over from FY2025)

- ◆ Prepare crash analyses and provide technical assistance in traffic safety and security efforts (as needed, includes activities carrying over from FY2025)
- ◆ Review and utilize traffic action safety plan for Quad Cities and update on an established cycle (includes activities carrying over from FY2025), and work toward implementation recommendations as they unfold in the plan with the local jurisdictions (includes activities carrying over from FY2025)
- ◆ Assist with congestion management process activities for the urbanized area and implement projects that are feasible (on-going)
- ◆ Investigate appropriate ITS activities to assist in congestion and emission reduction (as needed)
- ◆ Participate in ITS planning and deployment of technologies to improve transportation efficiency and operations (as needed), including deployment related to the Mississippi and Rock River bridges, and as funding becomes available (on-going)
- ◆ Staff the Bi-State Region Air Quality Task Force and support their activities, participate in alternative fuels activities, and administer transit website portal (QCTransit.org website maintenance and outreach), rideshare and micromobility, trails outreach (QCTrails.org website maintenance) and air quality related education programs (as scheduled)
- ◆ Staff the Bi-State Regional Trails Committee to facilitate trail network development and pedestrian needs

Funding Sources and Amounts

IL DOT PL/FTA 5303d	\$206,151	
+FY2023 Carryover	\$36,001	
IA DOT PL	\$165,679	
IA FTA 5305d	\$30,439	
State/Local/Other	<u>\$109,568</u>	
Total	\$547,838	(x,xxx FY26 employee hours)

Previous Work in FY2025

Responded to transportation requests by communities and inquiries by citizens & media. • Served transportation analysis and research requests, such as traffic and trail counting. • Coordinated interdisciplinary Scott County traffic safety (CARS) committee, Iowa-Illinois interdisciplinary traffic safety group, and participated in hazards planning. • Coordinated joint purchase of safety items, such as signs/sign posts. • Attended pedestrian, trails, transit, freight, GIS and transportation data, resiliency, highway funding, MPO Planning, air quality, and safety meetings, workshops, webinars, and conferences. • Attended ILDOT MPO Conference, and freight meetings, quarterly IADOT MPO Coordination and IADOT/city meetings, and ILMPO Advisory meetings to discuss transportation issues. • Continued coordination, attended meetings, and served inquiries for the ADT, MRT, and GIT trails connections and facilitated implementation of local trails through the Quad Cities and across the Mississippi River. • Held six Bi-State Regional Trails Committee meetings. • Utilized trail counters on request. • Continued to assist communities with riverfront, greenways, and other trail development and easement issues, wayfinding, scenic byways, safe routes to schools, pedestrian access, and attended related

meetings. • Provided oversight and transition of maintenance and facilitated expansion of interactive trails website, www.QCTrails.org as part of community wellness effort, and attended related meetings with local health initiative partnership for marketing site. • Served roadway and trail funding requests and follow-ups, grant assistance/research, RFP/RFQ assistance and inquiries. • Updated bridge restrictions notices, held coordination meeting, and responded to general and media inquiries on transportation issues. • Continued coordination of MPA communities registration and updates in Waze for road/bridge construction reporting. • Monitored transit programs, served inquiries, and forwarded transit information to systems. • Maintained access to TrAMS/FACES. • Assisted IL Region 2 Transit Coordinator with transit issues. • Held 2 Air Quality Task Force meetings. • Monitored status of air quality standards and nonattainment status for unhealthy air events, participated in electric vehicle readiness coordination for eastern Iowa and Clean Cities, and related public education. Monitored status of GHG PM and State of Illinois efforts to expand requirements for transportation planning. • Served air quality inquiries, and assisted with related grants or letters of concurrence, such as transit No-Lo grants. • Maintained FFY2024-2027 and FFY2025-2028 Transportation Improvement Programs (TIPs), including revisions and amendments along with IADOT's TPMS database processing and transportation progress report updates, as needed. • Drafted FY2026-2029 TIP. • Prepared FTA 5310, 5339, and 5307 appropriations' suballocations for FFY2026-2029 TIP. • Monitored status of STBG and TASA funds for programming, served funding inquiries and assistance with implementation, and planned for programming process. • Facilitated solicitation and programming of Carbon Reduction Program funds. • Provided updates on major transportation issues to both individual local governments and intergovernmental committees.

5.0 Complete Streets Transportation Planning – Iowa Quad Cities (2.5% Set-Aside)

Status

Complete Streets transportation planning analyzes short and long-term, low-cost improvements to mitigate existing transportation system deficiencies or enhancements related to efforts to find context sensitive solutions for a variety of roadway users. This type of planning, usually referred to as Complete Streets, typically concentrates on topics related to transit, bicycle and pedestrian accommodations within a roadway based on its current and projected use by a variety of users.

Objectives

Assist local governments in evaluating transportation system performance related to Complete Streets to increase safe and accessible options for multiple travel modes for people of all ages and abilities..

Identify short-term, low-cost system improvements or enhancement to improve mobility and choice of transit and non-motized transportation options.

Major Action Steps and End Products

- ◆ Staff the Bi-State Regional Trails Committee to facilitate trail network development and pedestrian needs
- ◆ Participate in Complete Streets discussions with communities and identification of Complete Streets corridors that improve safety, mobility accessibility and network connectivity, and assist with policies that support these objectives
- ◆ Assist and facilitate STBG, TASA and Carbon Reduction Program programming where Complete Streets may be a component or part of project development.

- ◆ Participate in active transportation activities in order to provide forums for design best practices, integrate multiuse transportation facilities, encourage public transit ridership and transit-oriented development, improve pedestrian and bicycle safety, and support emission reductions.
- ◆ Provide technical assistance related to Complete Streets

Funding Sources and Amounts

IA DOT PL	\$7,668	
State/Local/Other	<u>\$1,917</u>	
Total	\$9,585	(xxx employee hours)

Previous Work in FY2025

Held six Bi-State Region Trails Committee meetings for trail network coordination and development and discussion of pedestrian needs. • Assisted with trail, pedestrian, and safe routes to schools grant inquiries and applications. • Monitored status of STBG, and TASA programmed projects, and facilitated Carbon Reduction Program project programming processes. • Assisted with trail counting requests. • Attended conferences, webinars, and meetings related to trail and pedestrian needs. • Facilitated discussions on trail access as part of I-80 bridge reconstruction and Great American Rail Trail. • Clarified trail/pedestrian access on river bridge traffic restrictions. • Facilitated update of trail ordinance related to e-bikes, and worked with group on non-motorized traffic safety messaging and outreach.

5. BUDGET INFORMATION AND PROGRAM REVISIONS

Direct Salary and Fringe Benefit Costs

Direct salary and fringe benefits are programmed for each category listed in the TPWP. Staff time is allocated in increments of person-hours on the basis of past experience reflecting the time required to perform the same or similar tasks. Every effort is made to charge each project the appropriate amount of direct time to be worked. Refer to the tables on the following pages for a summary of Bi-State Regional Commission agency revenue, summary of transportation planning funding, summary of staff hours, and object class budget.

Direct Other Costs

The transportation program budget includes an estimate of direct other costs. Direct other costs consist of travel, printing (including copying), and supplies that can be identified with a given project. Such items as consultants, computer services, and membership and subscription fees are also directly identified with a project. In order to compute direct other costs for the purposes of this TPWP, past bookkeeping records are reviewed to determine the direct cost incurrence characteristics of each project. In addition, knowledge of future substantial printing and consultant costs are considered.

Indirect Costs

The Bi-State Regional Commission has an Indirect Cost Rate (ICR) based upon a plan prepared in accordance with Uniform Guidance For Federal Awards. The plan allocates indirect costs to projects, grants, and contracts on the basis of direct labor dollars using a percentage allocation rate. Direct labor costs include fringe benefits. The indirect cost information is included at the end of this budget section, as a certificate of indirect costs. The Economic Development Administration is the cognizant agency for review of the indirect cost allocation plan, and it is assigned to the Department of the Interior for review.

Disadvantaged Business Enterprise (DBE)

A DBE worksheet is no longer included in the TPWP to show contract opportunities for DBE businesses, which will be collected by other means on a 3-year cycle basis.

Annual Audit

Arrangements have been made for the required financial and compliance audit, and the audit will be made within the prescribed audit reporting cycle. Failure to furnish an acceptable audit as determined by the cognizant federal audit agency may be a basis for denial and/or refunding of federal funds.

The Commission's FY2024 audit was conducted by Bohnsack & Frommett, LLP, the accounting firm determined by a competitive bid process. The Commission has a fiscal year from July 1 through June 30, which should provide for a clear audit for the transportation program.

Rationale Utilized to Apportion Funds

The apportionment of funds to the Iowa and Illinois DOTs for the work categories is based on the percentage contribution received from each agency and not on the preparation of work anticipated in each state. Funding from FTA, however, is based on the proportion of work anticipated and as exhibited in previous years.

TPWP Revisions

TPWP revisions and approvals will comply with 2 CFR 200.308 requirements related to additional funding, transfer of funds, changes in scope, third party transfer of work, capital expenditures, and transfer of funds between categories.

Waiver of Approvals

All work program changes require prior written federal approval, unless waived by the awarding agency. Federal Regulation 2 CFR 200.308 outlines different types of revisions for budget and program plans. Full requirements for prior approvals can be found at www.fhwa.dot.gov/planning/priorapprovals.cfm. The following table denotes the approving agency for various changes to work programs. The following approving agencies include the Federal Highway Administration (FHWA), Federal Transit Administration (FTA), Iowa Department of Transportation (IADOT), Illinois Department of Transportation (ILDOT) or Bi-State Regional Commission, representing the MPO. For approvals affecting the TPWP as a whole, FHWA-Iowa Division is the lead agency and in consultation with FHWA-Illinois Division. For approvals affecting specific sources of funds by state, the respective FHWA Division will be the lead approving agency.

Revision Type	Approving Agency
Request for additional Federal funding	FHWA/FTA
Transfer of funds between categories, projects, functions, or activities that exceed 10 percent of the total work program budget when the federal award share of the total work program budget exceeds \$150,000.	FHWA/FTA
Revision of the scope or objectives of the activities (i.e. adding or deleting of activities or major change in scope of activity).	FHWA/FTA
Transferring substantive programmatic work to a third party (i.e. consultant).	FHWA/FTA
Capital expenditures including the purchasing of equipment .	FHWA/FTA
Transfer of funds between categories, projects, functions, or activities that do not exceed 10 percent of the total work program budget or when the federal award share of the total work program budget is less than \$150,000.	Iowa or Illinois DOT, depending on the funding jurisdiction
Transfer of funds allotted for training .	FHWA/FTA
Revisions related to work that does not involve federal funding.	MPO

Revision and Approval Procedures

Revisions where FHWA/FTA is the designated approving agency require written approval by FHWA/FTA prior to commencement of activity, purchasing of equipment, or request for reimbursement. Requests from Bi-State Regional Commission will be submitted in writing electronically to the Iowa DOT Systems Planning Bureau through the district planner and copied to the Illinois DOT Office of Programming and Planning, and then forwarded to FHWA and FTA for approval. Notification by the approving agency will be in writing in reverse order.

Revisions where the Iowa DOT Systems Planning Bureau is the designated approving agency shall require written approval by the Iowa DOT Systems Planning Bureau prior to commencement of activity, purchasing of equipment, or request for reimbursement. Requests from the Bi-State Regional Commission shall be submitted in writing electronically to Iowa DOT Systems Planning Bureau through the district planner. Copies will be forwarded to FHWA/FTA. Notification by the approving agency will be in reverse order.

Revisions where the Illinois DOT Office of Planning and Programming is the designated approving agency shall require written approval by the Illinois DOT Office of Planning and Programming prior to commencement of activity, purchasing of equipment, or request for reimbursement. Requests from the MPOs and RPAs shall be submitted in writing electronically to Illinois DOT Office of Planning and Programming. Copies will be forwarded to FHWA/FTA. Notification by the approving agency will be in reverse order.

Revisions where Bi-State Regional Commission is the approving agency shall be approved by the Commission with review by the MPO Transportation Policy Committee. Electronic copy updates to the work program shall be provided to the DOTs, FHWA, and FTA.

Estimated FY2026 Total BSRC Budget July 1, 2025–June 30, 2026

The following table shows the estimated total Bi-State Regional Commission (BSRC) budget by funding sources for the fiscal year July 1, 2025 through June 30, 2026. This budget reflects the funding for those agency activities that will be under contract during all or a portion of the fiscal year.

BSRC Source of Funds Income Summary FY2025 [To Be Updated]	
Local Membership Support	\$ 416,699
Other Local Income/IA HSIP-Swap	\$ 469,821
EDA Planning Grant	\$ 70,000
Iowa COG Assistance	\$ 20,706
IA /IL Regional Planning	\$ 97,153
FHWA PL-IA	\$ 441,990
FHWA PL-IL/FTA 5305d-IL & SPR	\$ 673,244
FTA 5305d-IA	\$ 76,210
Misc./Federal Contracts	\$ 264,000
IL Comprehensive Regional Planning	\$ 168,311
	<hr/>
	\$ 2,698,134

Special Projects Planning Justification

Quad Cities Traffic Safety Summit and/or Special Project

Plan and hold traffic safety summit to discuss motorized and non-motorized transportation issues in the Quad Cities that are derived from the SS4A Traffic Safety Plan project. It is anticipated to include a forum to discuss implementation activities and status of fatal and serious injury crash reduction. The total project cost is estimated at \$35,000, using state funds (Illinois). The project is anticipated in FY2026 in coordination with the Traffic Safety Action Plan.

SUMMARY OF TRANSPORTATION PLANNING FUNDING IN FY2026 [TOTAL EMPLOYEE HOURS TBD]

¹ The listed amounts include the Federal (FTA) shares only. Local match is not included.

Transit Operators Planning Justification

The Federal Transit Administration (FTA) Metropolitan Planning Program and the State Planning and Research Program use the same Activity Line Item (ALI) codes; only the scope code (5-digit code) changes. The transit system's grant application will also include funding for Metropolitan Planning activities, the Metropolitan Planning scope code, 44x-xx, should be shown separately along with appropriate ALI codes 44.2X.XX. For a description of these metropolitan planning scope codes noted on page V-19 and used by FTA, go to: <https://www.transit.dot.gov/funding/grantee-resources/scope-activity-line-codes/scope-activity-line-codes>.

City of Bettendorf

Program Support and Administration:

The City of Bettendorf Staff will prepare, submit, and administer grants and reports, and perform other program administration activities as required by FTA, the Iowa DOT, and NTD. Budget development shall occur in context with the objectives of the LRTP, the Program of Projects in the TIP, and other planning documents of the region or city.

City of Davenport

No funding is being utilized for planning.

Rock Island County Metropolitan Mass Transit District-RICMMTD (MetroLINK)

General Development and Comprehensive Planning

Staff will facilitate planning activities related to transit-oriented development, regional coordination activities, multi-modal access, alternative fuel vehicles, bus rapid transit, collision avoidance and autonomous vehicle technology, or other feasibility and planning studies as identified. (Transit Development Credits may be utilized in lieu of local match.)

Certificate of Indirect Costs For State & Local Governments and Indian Tribes

This is to certify that I have reviewed the indirect cost rate proposal submitted herewith and to the best of my knowledge and belief:

- (1) All costs included in this proposal dated December 29, 2023 to establish billing or final indirect cost rates for July 1, 2024 through June 30, 2025 are allowable in accordance with the requirements of the Federal award(s) to which they apply and the provisions of 2 CFR Part 200 Subpart E-Cost Principles. Unallowable costs have been adjusted for in allocating costs as indicated in the indirect cost proposal.
- (2) All costs included in this proposal are properly allocable to Federal awards on the basis of a beneficial or causal relationship between the expenses incurred and the agreements to which they are allocated in accordance with applicable requirements. Further, the same costs that have been treated as indirect costs have not been claimed as direct costs. Similar types of costs have been accounted for consistently and the Federal government will be notified of any accounting changes that would affect the predetermined rate.

I declare that the foregoing is true and correct.

Governmental Unit: Bi-State Regional Commission

Signature: Carol L. Connors

Name of Official (printed): Carol L. Connors

Title: Finance Director

Date of Execution: December 29, 2023

This certification:

- Is a requirement per 2 CFR Part 200 Subpart E Subsection 200.415 and Appendix VII Section D.3.;
- Must be submitted as part of the annual indirect cost rate proposal; and
- Must be signed on behalf of the non-Federal entity by an individual at a level no lower than vice president or chief financial officer of the organization.

FY 2025 ANTICIPATED MONTHLY EXPENDITURES [To Be Updated]

The following amounts are the anticipated total monthly expenditures for FHWA PL and FTA Section 5305d funded work activities contained in the Transportation Planning Work Program (FTA and PL share only):

First Month	\$ 99,287.00
Second Month	99,287.00
Third Month	99,287.00
Fourth Month	99,287.00
Fifth Month	99,287.00
Sixth Month	99,287.00
Seventh Month	99,287.00
Eighth Month	99,287.00
Ninth Month	99,287.00
Tenth Month	99,287.00
Eleventh Month	99,287.00
Twelfth Month	99,287.00
TOTAL	\$1,191,444.00

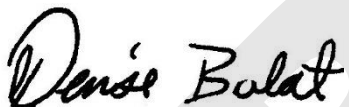

MPO Self-Certification of Procurement and Consultant Selection Procedures

This is to certify that I have reviewed the [Iowa DOT Purchasing Rules](#) (Iowa Administrative Code 761, Chapter 20) and Illinois DOT Purchasing Rules. I will ensure procurements or the selection of consultant firms/professional services for projects to be reimbursed with federal transportation planning funds will follow the policies and procedures outlined in the above-referenced purchasing rules.

Further, I certify that the following requirements will be adhered to for procurements and consultant services/professional services to be reimbursed with federal transportation planning funds.

- Capital expenditures, including the purchase of equipment, will be a separate line item in an approved Transportation Planning Work Program (TPWP) if the anticipated total cost exceeds \$5,000 (minimum of Iowa DOT).*
- An approved TPWP will specify that a project will involve consultant services prior to initiating the consultant selection process.
- Our agency will document the procedures utilized for the procurement or consultant selection, and will retain this documentation on file for a minimum of three years.
- When reimbursement is requested for capital expenditures or consultant/professional services, we will provide our Iowa DOT District Planner and the IADOT Systems Planning Bureau, through email or hard copy, invoices documenting the expenditure(s) at the time the associated reimbursement request is submitted.

I declare to the best of my knowledge and ability that we will adhere to the above requirements.

Denise Bulat, Executive Director
Bi-State Regional Commission

March 11, 2025

(Date Signed)

*Threshold of \$3,000 and greater identified by Illinois DOT for procurement of products or services. Reporting in TPWP will apply separate line item notation requirement to the \$5,000 threshold, as no such TPWP notation requirement is defined by Illinois DOT.

AN AGREEMENT
BETWEEN
ILLINOIS DEPARTMENT OF TRANSPORTATION
AND
IOWA DEPARTMENT OF TRANSPORTATION
AND
BI-STATE REGIONAL COMMISSION
AND
ROCK ISLAND COUNTY METROPOLITAN MASS TRANSIT DISTRICT
AND
ROCK ISLAND COUNTY, ILLINOIS AND SCOTT COUNTY, IOWA
AND
IOWA CITIES OF BETTENDORF AND DAVENPORT,
AND
ILLINOIS CITIES OF EAST MOLINE, MOLINE, AND ROCK ISLAND
AND
OTHER ELIGIBLE JURISDICTIONS IN THE URBANIZED AREA
FOR
COOPERATIVE TRANSPORTATION PLANNING AND PROGRAMMING

This Agreement, entered into by and between the Illinois Department of Transportation (herein called "ILDOT"), the Iowa Department of Transportation (herein called "IADOT"), the Bi-State Regional Commission (herein called "Bi-State"), and local governments referred to above in the Urbanized Area or subsequent urbanized area naming convention as determined by the appropriate U.S. government authority is for the purpose of establishing a framework for continuing, cooperative transportation planning and programming in the Urbanized Area in fulfillment of the provisions of the current Federal Transportation Act or subsequent amendments, continuing resolutions, or reauthorization of the Federal Transportation Act.

WHEREAS, Federal Transportation Act requires a cooperative metropolitan transportation planning and programming process; and

WHEREAS, Bi-State, established and organized as a council of governments (Iowa) and regional planning commission (Illinois), by virtue of the powers granted to local governments by Chapter 50, Act 15/0.01 et seq. and Chapter 55, ILCS 5/5-14001 et seq.; Illinois Compiled Statutes, 1992; and Chapters 28E, 28H and 28I Code of Iowa, 1993; and

WHEREAS, the Governors of the States of Iowa and Illinois have designated Bi-State as the Metropolitan Planning Organization (MPO) responsible for carrying out planning and programming requirements in cooperation with the States.

NOW, THEREFORE, IT IS AGREED by and between the parties hereto that:

ARTICLE I. PURPOSE

- A. Bi-State shall perform and carry out a cooperative, comprehensive, and continuing area wide transportation planning and programming process for the urbanized area in accordance with the requirements of applicable laws, policies, and procedures with assistance of the Iowa and Illinois DOTs.
- B. Bi-State shall maintain a MPO Transportation Policy Committee (TPC) to oversee and coordinate the process in a manner that will insure that transportation planning and programming decisions are reflective of the needs of local and state governments and transit operations.

ARTICLE II. MEMBERSHIP, VOTING, QUORUM

- A. The TPC shall be composed of the following representatives, each having one vote:
 - 1. A representative of the Illinois Department of Transportation.
 - 2. A representative of the Iowa Department of Transportation.
 - 3. The Chair of Rock Island County.
 - 4. The Chair of the Scott County Board of Supervisors.
 - 5. The Chair of the Rock Island County Metropolitan Mass Transit District.
 - 6. The Mayor of the City of Davenport.
 - 7. & 8. Two Aldermen from the City of Davenport.
 - 9. The Mayor of the City of Bettendorf.
 - 10. A Mayor from a city other than Bettendorf or Davenport from the Iowa portion of the Urbanized Area selected by a bi-annual caucus of the affected Mayors.
 - 11. The Mayor of the City of Rock Island.
 - 12. The Mayor of the City of Moline.
 - 13. The Mayor of the City of East Moline.
 - 14. A Mayor from a city other than Rock Island, Moline or East Moline from the Illinois portion of the Urbanized Area, selected by a bi-annual caucus of the affected Mayors.
- B. Any member of the TPC may select a designated voting representative to represent them at the meeting in their absence. An elected official must select another elected official as their designee.
- C. The Federal Highway Administration (FHWA) Division Administrators for Illinois and Iowa and the Federal Transit Administration (FTA) Administrator for Region VII shall serve as ex-officio non-voting members of the TPC.
- D. A quorum of the TPC shall consist of a simple majority of eight (8), without regard to state origin, except that no decision shall be made having interstate impact unless a simple majority of four (4) of the representatives of each state are represented at the meeting.
- E. The TPC may meet and conduct business that pertains to only one state portion if a simple majority of four (4) members of that state portion area are present and all are in agreement to conduct business.

ARTICLE III. OFFICERS

- A. A Chair and Vice-Chair of the TPC shall be chosen by representatives of the Committee at the first meeting held in odd numbered years. These officers shall reside from each state portion. The Chair or any member presiding over the Committee may vote and make or second motions.

ARTICLE IV. MEETING NOTIFICATION

Other local governments within the Urbanized Area who are not members of the TPC shall receive information and may attend all meetings. Also, all appropriate regional and division offices of the U.S. Department of Transportation serving the DRIMUA shall be notified of all TPC meetings.

ARTICLE V. TECHNICAL COMMITTEE FORMATION

The TPC shall appoint and direct a Transportation Technical Committee (TTC) composed of technical staff from the jurisdictions represented by the TPC.

ARTICLE VI. PLANNING ACTIVITIES, RESPONSIBILITIES

- A. A unified Transportation Planning Work Program (TPWP) shall be adopted annually by the Bi-State upon the recommendation of the TPC following cooperative development of the TPWP by the TTC and appropriate Illinois, Iowa and U.S. DOT representatives. The TPWP shall include all elements required by state and federal transportation authorities in addition elements requested by local government representatives.
- B. A Long Range Plan (LRP) for transportation facilities and services in the Urbanized Area shall be developed under guidance and recommendation of the TTC, considered by the TPC and recommended to Bi-State, who shall be responsible for final adoption of the LRP. In no instance shall the Bi-State modify the LRP recommended by the TPC, but it shall return the LRP (within sixty [60] days of receipt) to the TPC, noting specific inconsistencies that exist between the recommended plan and other regional plans, policies or studies. The TPC shall review their recommendation and report back to Bi-State within sixty (60) days.
- C. The TPC shall be solely responsible for the final adoption of the Transportation Improvement Program (TIP), which identifies an annual and multi-year implementation schedule for projects contained in the adopted LRP. Such action shall include other required endorsements of planning and programming consistencies.
- D. Bi-State, as the designated MPO, shall be the recipient of Federal Highway Administration (FHWA) PL and Federal Transit Administration (FTA) planning funds. Staff of Bi-State shall serve as staff to the TPC.

ARTICLE VII. AMENDMENTS, SEVERABILITY

- A. If any one or more of the provisions of this Agreement is declared unconstitutional or contrary to law, the validity of the remainder of the Agreement shall not be affected thereby.
- B. This Agreement is subject to amendment when a majority of all voting representatives of the TPC adopts the amendment.

ARTICLE VIII. DURATION OF AGREEMENT

- A. This Agreement shall become effective upon approval of at least three jurisdictions each from the Illinois and Iowa portions of the Urbanized Area and proper filing and recording, as prescribed in the laws of Illinois and Iowa, and shall remain in effect until terminated by a two-thirds majority vote of all designated representative of the TPC.
- B. A jurisdiction which is eligible to be part of this Agreement may do so by adoption of a resolution, said resolution agreeing to provisions of this Agreement shall be delivered to Bi-State.

ARTICLE IX. TERMINATION

Any party to this Agreement may withdraw by giving written notice to Bi-State. Termination from this Agreement shall not relieve the withdrawing party from compliance with Federal requirements for cooperative transportation planning and programming.

GM\sg
Resolutions - 80+803+807\TPWP Urban Agreement

Transportation Technical Committee Committee and Meeting Procedures

Purpose

Bi-State Regional Commission will maintain a MPO Transportation Technical Committee (TTC) to oversee and coordinate the transportation planning process, directed under the existing transportation authorization, in a manner that will ensure that the transportation planning process and programming recommendations are reflective of the needs of local and state governments and transit operations.

The TTC is responsible for technical review and guidance of data collection and analysis, transportation plan preparation, review, and update. This committee is responsible to, and makes recommendations to, the Transportation Policy Committee.

Membership, Voting and Quorum

The TTC is composed of the following representatives and mirrors voting requirements of the Transportation Policy Committee. Representatives are required to be present to vote.

Bettendorf, IA (represented either by public works, transit and/or planning) – one vote

Davenport, IA (represented by public works, transit and planning) – three votes with one vote per person present

East Moline, IL (represented by public works and/or planning) – one vote

Moline, IL (represented by public works and/or planning) – one vote

Rock Island, IL (represented by public works or planning) – one vote

Illinois Quad Cities communities (administrative, public works and/or other staff represented by one caucused representative from the Cities/Villages of Andalusia, Carbon Cliff, Coal Valley, Colona, Hampton, Milan, Oak Grove, Port Byron, Rapids City, and Silvis) – one vote

Iowa Quad Cities communities (administrative, public works and/or other staff represented by one caucused representative from the Cities of Buffalo, Eldridge, LeClaire, Princeton and Riverdale) – one vote

Henry County, IL (represented by the county engineer and/or other staff) – one vote

Rock Island County, IL (represented by county engineer and/or other staff) – one vote

Scott County, IA (represented by county engineer and/or other staff) – one vote

Illinois Department of Transportation District staff or central office staff – one vote

Iowa Department of Transportation District staff or central office staff – one vote

Rock Island County Metropolitan Mass Transit District (MetroLINK) – one vote

Appendix

Planning and research engineers from the Illinois and Iowa Federal Highway Administration division offices serve as ex-officio, non-voting members of the Transportation Technical Committee as does a community planning representative from the Federal Transit Administration's Region VII (Kansas City).

A quorum of the TTC shall consist of a simple majority (8), without regard to state origin, except that no decision shall be made having interstate impact, unless a simple majority of four (4) of the representatives of each state are represented at the meeting.

The TTC may meet and conduct business that pertains to only one state if a simple majority of four (4) members of the effected state are present and all in agreement to conduct business.

Small community staff representatives will be caucused in odd years to renew the standing representative or select a new representative, or as needed to fill vacancies.

Officers

A Chairman and Vice-Chairman of the TTC shall be chosen by representatives of the Committee at the first meeting held in odd numbered years. These officers shall reside from each state portion. The Chairman or any member presiding over the Committee may vote and make or second motions.

Meeting Notification

Other local governments within the MPO who are not members of the TTC shall receive information and may attend all meetings. Also, all appropriate regional and division offices of the US Department of Transportation serving the MPO shall be notified of all TTC meetings.

A public involvement plan will further outline meeting notifications for transportation planning documents and activities.

Adopted 8/26/08 by Transportation Policy Committee.

Performance management agreement between Bi-State Regional Commission and Iowa DOT

On May 27, 2016, the final rule for statewide and metropolitan transportation planning was published, based on 2012's Moving Ahead for Progress in the 21st Century (MAP-21) Act and 2015's Fixing America's Transportation System (FAST) Act. As part of this final rule, [23 CFR 450.314 \(h\)](#) was amended to state:

- (h)(1) The MPO(s), State(s), and the providers of public transportation shall jointly agree upon and develop specific written provisions for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward attainment of critical outcomes for the region of the MPO (see §450.306(d)), and the collection of data for the State asset management plan for the NHS for each of the following circumstances:
- (i) When one MPO serves an urbanized area;
 - (ii) When more than one MPO serves an urbanized area; and
 - (iii) When an urbanized area that has been designated as a TMA overlaps into an adjacent MPA serving an urbanized area that is not a TMA.
- (2) These provisions shall be documented either:
- (i) As part of the metropolitan planning agreements required under paragraphs (a), (e), and (g) of this section; or
 - (ii) Documented in some other means outside of the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation.

In 2017, the following three-pronged approach was cooperatively developed to address 23 CFR 450.314 (h). This approach provides a regular opportunity to review and update coordination methods as performance management activities occur, which offers an adaptable framework as performance-based planning and programming evolves.

- Agreement between the Iowa DOT and MPOs on applicable provisions through documentation included in each MPO's TPWP.
- Agreement between the Iowa DOT and relevant public transit agencies on applicable provisions through documentation included in each public transit agency's consolidated funding application.
- Agreement between each MPO and relevant public transit agencies on applicable provisions through documentation included in the appropriate cooperative agreement(s) between the MPO and relevant public transit agencies.

Inclusion of the following language in an MPO's TPWP, and that TPWP's subsequent approval by Iowa DOT, constitutes agreement on these items.

The Iowa DOT and [Bi-State Regional Commission](#) agree to the following provisions. The communication outlined in these provisions between the MPO and Iowa DOT will generally be through the statewide planning coordinator in the Systems Planning Bureau.

1) Transportation performance data

- a. The Iowa DOT will provide MPOs with the statewide performance data used in developing statewide targets, and, when applicable, will also provide MPOs with subsets of the statewide data, based on their planning area boundaries.
- b. If MPOs choose to develop their own target for any measure, they will provide the Iowa DOT with any supplemental data they utilize in the target-setting process.

2) Selection of performance targets

- a. The Iowa DOT will develop draft statewide performance targets for FHWA measures in coordination with MPOs. Coordination may include in-person meetings, web meetings, conference calls, and/or email communication. MPOs shall be given an opportunity to provide comments on statewide targets and methodology before final statewide targets are adopted.
- b. If an MPO chooses to adopt their own target for any measure, they will develop draft MPO performance targets in coordination with the Iowa DOT. Coordination methods will be at the discretion of the MPO, but the Iowa DOT shall be provided an opportunity to provide comments on draft MPO performance targets and methodology prior to final approval.

3. Reporting of performance targets

- a. Iowa DOT performance targets will be reported to FHWA and FTA, as applicable. MPOs will be notified when Iowa DOT has reported final statewide targets.
- b. MPO performance targets will be reported to the Iowa DOT.
 - i. For each target, the MPO will provide the following information no later than 180 days after the date the Iowa DOT or relevant provider of public transportation establishes performance targets, or the date specified by federal code.
 - 1. A determination of whether the MPO is 1) agreeing to plan and program projects so that they contribute toward the accomplishment of the Iowa DOT or relevant provider of public transportation performance target, or 2) setting a quantifiable target for that performance measure for the MPO's planning area.
 - 2. If a quantifiable target is set for the MPO planning area, the MPO will provide any supplemental data used in determining any such target.
 - 3. Documentation of the MPO's target or support of the statewide or relevant public transportation provider target will be provided in the form of a resolution or meeting minutes.
- c. The Iowa DOT will include information outlined in 23 CFR 450.216 (f) in any statewide transportation plan amended or adopted after May 27, 2018, and information outlined in 23 CFR 450.218 (q) in any statewide transportation improvement program amended or adopted after May 27, 2018.
- d. MPOs will include information outlined in 23 CFR 450.324 (f) (3-4) in any metropolitan transportation plan amended or adopted after May 27, 2018, and information outlined in 23 CFR 450.326 (d) in any transportation improvement program amended or adopted after May 27, 2018.
- e. Reporting of targets and performance by the Iowa DOT and MPOs shall conform to 23 CFR 490, 49 CFR 625, and 49 CFR 673.

4. Reporting of performance to be used in tracking progress toward attainment of critical outcomes for the region of the MPO

- a. The Iowa DOT will provide MPOs with the statewide performance data used in developing statewide targets, and, when applicable, will also provide MPOs with subsets of the statewide data, based on their planning area boundaries.

5. The collection of data for the State asset management plans for the NHS

- a. The Iowa DOT will be responsible for collecting bridge and pavement condition data for the State asset management plan for the NHS.

* Agreements related to the MPO, Illinois DOT and MetroLINK were approved by the Policy Committee on May 22, 2018. Memos of understanding between the MPO and Davenport (CitiBus), and the MPO and Bettendorf (Bettendorf Transit) were executed on May 22, 2018. These will appear in a Performance Measures Addendum once it is compiled.

Minutes of the
QUAD CITIES, IOWA-ILLINOIS
METROPOLITAN PLANNING AREA
TRANSPORTATION POLICY COMMITTEE

Minutes of the Quad Cities MPO Transportation Policy Committee discussing the FY2026 Transportation Planning Work Program for March 25, 2025 will be posted to the Bi-State website at <https://bistateonline.org/documents/meetings/quad-cities-transportation-policy-committee/minutes-12> following their approval at the April 22, 2025 committee meeting.

The Bi-State Regional Commission approves the funding and authorizes staff to proceed with contracts which occurred at the May 28, 2025 meeting. Minutes from this meeting will be posted to the website <https://bistateonline.org/documents/meetings/bi-state-regional-commission/minutes-4> following their approval at their June 25, 2025 meeting.

PUBLIC PARTICIPATION PLAN FOR TRANSPORTATION PLANNING IN THE DAVENPORT-MOLINE-ROCK ISLAND URBANIZED AREA

In compliance with the provisions of the Infrastructure Investment and Jobs Act (IIJA)*, the Metropolitan Planning Organization (MPO) Policy Committee for the Davenport, Iowa-Illinois Urbanized Area has approved the following public participation plan to engage interested parties and resource agencies in the transportation planning process.

The transportation planning process takes place at local, regional, tribal, state and federal levels. It is based on comprehensive, continuing and coordinated activities that work together to identify, prioritize and meet transportation needs at these various levels. Public participation in this process begins with finding what opportunities are available and expressing interest or concern.

Bi-State Regional Commission is the Metropolitan Planning Organization (MPO) designated to cooperatively facilitate public participation in the transportation planning process with Quad Cities Metropolitan Planning Area communities and counties, and state/federal Departments of Transportation, and among the various modes of transportation. The MPO is charged with carrying out metropolitan transportation planning that provides early and on-going opportunities for involvement, timely information, reasonable access to information, adequate notification, diverse participation and periodic review and evaluation of the participation process. This public participation plan outlines the parameters for conducting these requirements.

Public Notification

All meeting announcements and agendas of the Transportation Technical Committee and Policy Committee shall be sent to local news media and the Regional Transportation Advisory Group (RTAG) prior to the actual meeting date no less than 48 hours in advance. It is common practice to send meeting announcements and agendas one week in advance of a meeting. Agendas of these committees are posted at Bi-State Regional Commission offices and on the Bi-State Regional Commission website (www.bistateonline.org), while minutes are web-posted following approval by these committees. In addition, proposed amendments to the annual Transportation Improvement Program or Transportation Planning Work Program shall be sent to the same local media and RTAG, as well as local jurisdictions within the Davenport, Iowa-Illinois Urbanized Area, as part of the Policy Committee agenda. Other transportation related advisory committees may be posted on this website to provide added transportation related information, such as the Bi-State Regional Trails Committee and Bi-State Region Air Quality Task Force meetings. Notice of public hearings will be published in local newspapers of general circulation and posted on the Bi-State Regional Commission website per the time period noted in "Public Hearings" of this plan.

Regional Transportation Advisory Committee

The intent of the federal transportation legislation is to provide a special effort for an early and continuing public involvement process that seeks out and considers the transportation needs of a diverse public, including the traditionally underserved populations (Executive Order 12898 – Federal Action to Address Environmental Justice in Minority and Low-Income Populations, 1994) as well as providing an opportunity for consultation with resource agencies as defined in the current transportation act. The Regional Transportation Advisory Group (RTAG) will fulfill that role. Involvement in the RTAG is open to any interested party, business, organization, or interested citizen within the Davenport, Iowa-Illinois Urbanized Area wanting to be involved in the transportation

planning process. RTAG serves as the diverse, multi-modal advisory committee to the Transportation Technical Committee. Members will receive all meeting notices, as noted in "Public Notices" above, for the Technical and Policy Committee meetings. In addition, members will receive notification of proposed Transportation Improvement Program (TIP) amendments, Surface Transportation Block Grant (STBG) Program and Transportation Alternatives Set-Aside (TASA) submittal notices, and proposed changes to the Public Participation Plan, Regional Intelligent Transportation System (ITS) Architecture Plan, Regional Transit Development Plan (TDP) or the Long Range Transportation Plan (LRTP).

Annual TIP Project Request Notifications

Individual jurisdictions, members of RTAG, and the media shall be informed as to when projects are being sought for inclusion in the annual Transportation Improvement Program through an announcement requesting Transportation Improvement Program annual element additions, modifications, or deletions for the proposed fiscal years, as part of an annual document update cycle, typically thirty (30) days prior to a draft document review by the Technical Committee.

Public Comment/Notification

The general public shall be afforded the opportunity to provide comments via the Technical and Policy Committee meetings on the annual Transportation Planning Work Program (TPWP) activities, Transportation Improvement Program (TIP), Regional ITS Architecture Plan, Regional Transit Development Plan, Long Range Transportation Plan (LRTP), and the Public Involvement Plan (PPP), through the process outlined under "Public Notification" above. This process satisfies Program of Projects (POP) public participation requirements for Bettendorf Transit, Davenport CitiBus, River Bend Transit, and the Rock Island County Metropolitan Mass Transit District (MetroLINK). In the case of the Public Participation Plan, a minimum of a forty-five (45) day comment period shall be provided prior to action by the Transportation Policy Committee as required by the current transportation act. The LRTP will require a minimum of a thirty (30) day comment period prior to action by Bi-State Regional Commission. The prioritization process of both the Surface Transportation Block Grant (STBG) Program and the Transportation Alternatives Set-Aside (TASA) Program will require a minimum of a thirty (30) day comment/notification period to be provided prior to action by the Transportation Policy Committee. In matters involving adoption or amendments to the Transportation Planning Work Program, Transportation Improvement Program (TIP), Regional Transit Development Plan, Congestion Management Process, and Regional ITS Architecture Plan, a minimum of 48 hours, but typically seven (7) day comment period shall be utilized prior to approval by the Transportation Policy Committee. Additional notice may be provided through meetings of the Transportation Technical Committee in advance of action by the Policy Committee.

Publications

The MPO shall publish or otherwise make available for public review at a minimum the Long Range Transportation Plan (LRTP) and Transportation Improvement Program (TIP) in an electronically accessible format and means (to the maximum extent practicable), such as the World Wide Web. The LRTP and TIP publications developed by the MPO will be placed on the Bi-State Regional Commission website, www.bistateonline.org. Other transportation planning publications may be posted to allow for interested parties to review and access additional MPO transportation planning information. Within these publications, the MPO shall employ visualization techniques to help clarify transportation planning issues and/or activities. At a minimum, visualization techniques shall be applied to the LRTP and TIP. Visualization techniques may include maps, graphs, charts, tables, diagrams or other

methods. The LRTP will include a specific public participation outline during the update process that will be reviewed by the Technical and Policy Committees, and the results will be documented in the LRTP.

Public Hearings

Prior to approval of the final Transportation Improvement Program (TIP), the Transportation Policy Committee shall hold a public hearing on all the projects being considered for approval in the TIP. The Transportation Policy Committee shall also hold public hearings, as deemed necessary, for TIP amendments and prior to the approval of the Long Range Transportation Plan by Bi-State Regional Commission. At least fourteen (14) days prior notice will be given for all public hearings. No other documents noted will require a public hearing but shall afford public comment opportunities, as noted under "Public Comment/Notification."

Data

As part of non-discrimination requirements, Bi-State Regional Commission will maintain information on protected class (race, color, national origin, gender, age or disability) and Limited English Proficiency (LEP) populations within the Metropolitan Planning Area, including demographics and identification of potential barriers (language, mobility, temporal or other) that may prevent underserved persons from effectively participating in the metropolitan transportation planning process. This information is contained in the Bi-State Regional Commission Title VI Program and Non-Discrimination Policy.

Accommodation

Persons requiring special material or presentation formats will be asked within a public notice for advanced request of at least one week prior to a public hearing prior to consideration of adoption or approval by the Policy Committee. Reasonable accommodations to provide documents in an accessible format, as required by the Americans with Disabilities Act and Executive Order 13166 (Improving Access for Persons with Limited English Proficiency, 2000), will be made when requested by the public. For meeting notices and agendas, requests at least one working day in advance of the meeting is requested for reasonable accommodation. Persons requesting assistance will be referred to the appropriate Bi-State Regional Commission staff who will make reasonable accommodations for translation services or other accommodations based on the request. Meetings will be held at convenient and accessible locations and times with emphasis to engage minority, low-income and LEP populations. Receipt of public input will be taken in a variety of formats - written, oral or other means-where accommodations are requested and reasonable.

Approval of Revisions/Amendments March 26, 2019

Transportation Planning Work Program FY2026

What is a TPWP?

Transportation Planning Work Program (TPWP): The work plan, federally known as a Unified Work Program, is used by Bi-State Regional Commission staff to carry out metropolitan transportation planning requirements for the Quad Cities Metropolitan Area and advance long range plans for the Quad Cities transportation system. The annual work plan is for July 1, 2025 to June 30, 2026. The plan contains a budget to provide staffing, equipment and supplies to carry out these activities by Bi-State Regional Commission.

What is the process?

Each year Bi-State Regional Commission staff review and update the work tasks to implement the current Quad Cities Long Range Transportation goals and performance objectives. This is done in cooperation, coordination and continual review with local and state governments and stakeholders interested in the metro area transportation system. Major transportation issues are reviewed and modified with current and changing conditions to develop an efficient, reliable and vital Quad Cities multi-modal transportation network. Staff work with the Quad Cities Transportation Policy and Technical Committee to review and modify these work activities. Bi-State Regional Commission board approves the budget and authorizes the grants which fund the planning effort.

Major Transportation Issues in the Quad Cities

The transportation planning process is not static. We are continually looking at and determining how to make our system better. Focus on top issues to meet our transportation needs include:

- Improve River Crossing Capacity Improvements
- Reduce Congestion and Improve Mobility Choices, Reliability and Resilience Planning
- Coordinate Modes for Sustainability and Support Connectivity
- Implement Long Range Transportation Plan Projects
- Coordinate Passenger Transportation Opportunities
- Integrate Safety and Security
- Implement Planning Regulations and Monitor Federal Transportation Act Authorization –Infrastructure Investment and Jobs Act (IIJA)

Public Comment Opportunities

Public comment opportunities for the TPWP can occur at various levels. As communities prepare their community comprehensive plans and conduct capital improvement programming, there are opportunities for citizens to comment on individual or area transportation projects, issues and concerns being proposed by the respective jurisdiction. This is related to short-range planning.

For the region, public comment opportunities are provided in the development of the Long Range Transportation Plan, which is updated on a five-year cycle with its 20+ year planning horizon. Additionally, the Quad Cities Metropolitan Area receives a local share of Surface Transportation Block Grant Program (STBG) and Transportation Alternatives Set-Aside Program (TA) funds for which communities/counties can compete based on a selection process for transportation projects. Input opportunities are available during the project ranking process. Another opportunity is a public hearing by the Federal Highway Administration and Federal Transit Administration every 5 years as part of the Bi-State Regional Commission transportation planning process certification review.

Where Can I Find a Copy of the TPWP?

A full copy of the Transportation Planning Work Program can be found at <https://bistateonline.org/transportation-and-mobility/quad-cities-metro-planning/other-plans/tpwp-public-participation-title-vi-policy>.

Status of Comprehensive Planning

Comprehensive land use planning is an important component of transportation planning. The following discussion provides background history in the development of the Bi-State Region and the metropolitan area.

Since 1966, the Commission's regional planning program has completed the following programs: socio-economic analyses and forecasts; physical resource analysis; housing; land use; transportation; recreation and open space; water, sewage, and solid waste disposal; criminal justice; vocational rehabilitation; and work training.

Historically, comprehensive planning in the Bi-State area began with a needs survey completed through separate studies by Rock Island and Scott Counties. Completion of the Alternative Concept Plans in November 1967, provided a bridge between fact gathering and the plan. This document set forth basic goals and objectives with alternative means of guiding the desired growth. A later report entitled General Plan showed the level of land use and public facility development that was expected to be reached by 1985.

The Comprehensive Plan was completed by Bi-State in August of 1968. This Comprehensive Plan presented the overview of major plans completed at that time including the Alternative Concept Plan, General Plan, Recreation and Open Space Plan, Metropolitan Water and Sewerage Plan, and Interim Thoroughfare Plan. The 1985 Land Use Plan was updated to 1995 using the 1995 population and economic forecasts.

The Metropolitan Water, Sewerage, and Solid Waste Plan was augmented by the Comprehensive Solid Waste Management Plan completed in 1973 for a design year of 1995, and the Metropolitan Rock River Basin Study completed in 1974 with a design year of 1995. The Outdoor Open Space and Recreation Plan Update to 1995 was completed in 1975 with the completion of the Summary Report. The Resource Recovery Study was undertaken in 1976 for the five-county Bi-State area as a supplement to previous solid waste management planning. The Bi-State Comprehensive Solid Waste Management Plan was completed in 1990 for a seven-county area including Henry and Rock Island Counties in Illinois and Scott and Muscatine Counties in Iowa. Updates to the Solid Waste Plan were provided for five counties in Iowa in 1994, 1996, 1999, 2001, 2004, 2008, 2011, 2016 and 2023. Rock Island County updated their portion in 2001, and reviews status annually.

Henry County has been actively engaged in a comprehensive planning program since 1967. The Henry County Regional Planning Commission first contracted with a planning consultant to prepare the series of reports which culminated in the Henry County Comprehensive Plan, completed in May of 1970. The plan reviewed the physical, demographic, and economic resources of the county, recreation facilities, educational arrangements, public buildings, and transportation system. The land use components of the plan, and the associated mapping of the county and its communities, were additional features of this initial phase of the planning process. The Plan was updated in 1980, and again in FY2015.

There have also been two additional major studies, plus several lesser work items. The Henry County Comprehensive Water, Sewer, Storm Water and Flood Report was completed in May 1972, pursuant to HUD certification for the county. HUD noted findings in January 1975, in partial fulfillment of the inadequacies identified during the earlier HUD review. The additional inadequacies, yet to be completely resolved, are concerned with individual community water, sewer, and storm water plans. The Illinois Quad Cities is considering opportunities to address water service needs and new water

quality standards through joint efforts. The Iowa Quad Cities has employed the services of a consultant to project sewage treatment needs 50 years into the future.

The Henry County Open Space Planning and Program Report was completed in May 1973, and is an expansion of the recreation and open space component of the Comprehensive Plan. This report was reviewed and approved during FY 1975 and thus gained Henry County open space and recreation certification. Land use studies, monitoring of legislative progress concerning surface mined land reclamation, consideration of county building code adoption, and other planning and management activities were provided to Henry County during the first two years of Bi-State assistance. A greenway and trails plan was completed in 2018. A Rock Island County Greenway and Trails Plan was also completed in 2018.

Muscatine and Mercer Counties, which joined the Bi-State Regional Commission (BSRC) on July 1, 1976, had several elements of a comprehensive planning program completed previously. Muscatine County examined land use in a zoning plan dating back to 1958 and 1998. Muscatine County updated their Comprehensive Plan in FY2015, and is in the process of developing an update in FY2025. The Bi-State Regional Commission provided assistance to Muscatine County in 1974, 1975, 1991, and 1999 in the preparation of comprehensive amendments to the zoning ordinance. Mercer County, also with the assistance of the BSRC, completed an analysis of their land use problems and potentials in 1974, which culminated in the preparation and adoption of a Zoning Resolution and a Land Evaluation Site Assessment System in 1984. Mercer County withdrew its membership to Bi-State Regional Commission and is not a member (2014).

Most recently, comprehensive planning, recreation planning, and land use planning are accomplished individually by each community, with assistance from the Commission when requested. Jurisdictions within the Bi-State Region, which are currently conducting or have completed land use plan updates since 1995 are Aledo, Atkinson, Bettendorf, Blue Grass, Cambridge, Carbon Cliff, Coal Valley, Colona, Cordova, Davenport, East Moline, Eldridge, Geneseo, Hampton, LeClaire, Long Grove, Kewanee, McCausland, Milan, Moline, Muscatine, New Boston, Princeton, Port Byron, Rapids City, Riverdale, Rock Island, Sherrard, Viola, Walcott, West Liberty, Wilton and Henry, Scott, Muscatine, and Rock Island Counties. Buffalo is finalizing a plan in CY2025.

A Quad Cities Illinois/Iowa Future Land Use Map completed in 2003 outlines future land use plans in the metropolitan area and was updated in 2015 as part of the *2045 Quad Cities Long Range Transportation Plan* update adopted in 2016. The current iteration is associated with the *2050 Quad Cities Long Range Transportation Plan*, which was approved in March 2021 included 2015 parcel-based data used in the travel demand model. Data collection for a 2023 parcel-based land use map has been completed in CY2024, and future land use will be updated in CY2024-2025 for the *2055 Quad Cities Long Range Transportation Plan* update, expected to be adopted in March 2026.

As part of an energy initiative, Scott County prepared its first comprehensive Sustainability Plan in 2011. An alternative fuels workshop was held in 2018, and alternative energy workshop was held in 2019. Multi-jurisdictional hazard mitigation plans were approved by FEMA for Rock Island County (2022), Muscatine County (2015) and Scott County (2023). A Henry-Stark Counties hazard mitigation plan is under review and anticipating approval in CY2024.

The Housing Plan for the Bi-State Region was completed and adopted by the BSMPC in November 1977, and the land use element, entitled The Regional Development Policy: Plan and Program, was completed and adopted in December 1977. Both the housing and land use elements have been approved by HUD for satisfaction of 701 requirements. During FY 1981, the Commission adopted the

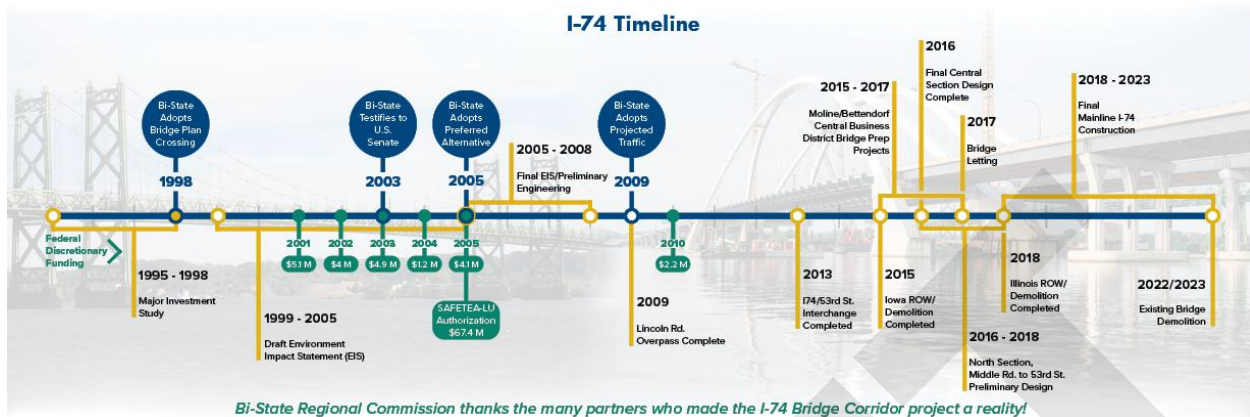

Area wide Housing Opportunity Plan (AHOP) and initiated an update of the Regional Development Policy Plan (RDP). The Commission completed the Davenport-Moline-Rock Island Fair Housing Analysis in 1989, which was updated in 1996, 2005 and 2012 as part of a consolidated planning process for housing. The Commission partnered with the Quad City Housing Authority to conduct a housing needs analysis for Scott County.

The 1995 Transportation Plan report was completed and published in March 1978. It provides thorough documentation of the work that was done and the background information that is available in support of the 1995 Transportation Plan adopted by the Commission in 1976. The Commission completed an update of the plan, Quad City Streets: Year 2005, in July 1986. In 1995, Vision 2020: the Quad City Area Long-Range Transportation Plan was adopted by the Commission. The document was amended in 1996, revising socio-economic forecasts and adding two projects. The document was also amended in 1999 with project additions and revisions, including Mississippi River Crossing Study implementation. The 2025 Quad City Area Long-Range Transportation Plan was adopted in March 2001, and a revision to allow trail access at major river crossings was amended in June 2002. Plan updates for 2035, 2040, 2045 and 2050 were adopted on March 22, 2006, June 22, 2011, March 23, 2016, and March 24, 2021, respectively.

In the area of economic development, the Commission has completed a study and report entitled Initial Overall Economic Development Program (OEDP) for the Bi-State Region which was adopted by the Commission in mid-1978. That study establishes the basis for further economic growth and employment diversity in the Bi-State area. The OEDP format has evolved into an integrated strategic planning tool which is now termed the Comprehensive Economic Development Strategy (CEDS). The CEDS is revised every five years for submission to the Economic Development Administration and the most recent update was completed in 2021. A progress report is prepared annually, unless part of the five-year update.

The Commission, in cooperation with the U.S. Army Corps of Engineers, has participated in the Corps' Quad Cities Urban Study program. Also called River Bend 2020, the study was authorized by Congress in 1974 to examine water resource problems in the Bi-State area and to provide plans and information to assist local governments. The water resource topics addressed by the study include: flood damage reduction; water supply, quality, and conservation; commercial regional harbors; erosion and sedimentation; recreation; and fish and wildlife. The Corps of Engineers developed a major needs study of the Mississippi River from Missouri to Minnesota. In September of 1999, the Commission endorsed one of various alternatives which would increase lock capacity throughout the study area. The Upper Mississippi River-Illinois Waterway System Navigation Study was completed in September 2004. The study determined the best way to manage the UMRS. It was a precursor to the Navigation and Ecosystem Sustainability Program (NESP) for navigation improvements and ecosystem restoration for the UMRS.

History of I-74 Mississippi River Corridor Project

I-74 Mississippi River Corridor reconstruction was the second component to pursue in a Major Investment Study completed in 1998. Completion of I-74 Mississippi River Corridor location, environmental study, design-engineering phase, and record of decision was finalized in 2009. The 7.8-mile I-74 Mississippi River Corridor includes from south of Avenue of the Cities, Moline to north of 53rd Avenue, Davenport. The construction design phase was completed in the first half of 2013, and public meetings on project staging were held in April 2014. Work on connections to the local system in downtown Bettendorf began in 2015. Interstate 74 Bridge reconstruction began in 2018, and a detour on I-74 began in 2019 which redirects traffic to I-80 and I-280, but allows local access across the bridge from downtown Moline to Bettendorf. The Iowa-bound span carried east and westbound traffic while the Illinois-bound span was under construction. The Illinois-bound structure was completed by the end of CY2021, and demolition of the older structure began in CY2022 and was completed in CY2024.
