

Website Clarifications

We wanted to provide a response to some questions we received earlier than anticipated because the responses would provide clarification for all those submitting proposals.

Please note the RFP referenced subdomains related to the Bi-State Regional Commission website and our redesign RFP. Technically, these are not subdomains; they are separate websites for the following entities: Rock Island County Waste Management Agency (<https://ricwma.org/>) and Quad City Transit (<https://qctransit.org/>). We do not foresee significant reworking of the content of these sites; rather, we want them to be compatible with the new platform utilized for the Bi-State Regional Commission website and have a refreshed appearance. Specifically, we are open other ideas QCTransit such as redirecting interested parties to a transit tab on the Bi-State site to accomplish a new-looking *transit "site" that's* integrated & easy to manage.

We will not be providing a ballpark estimate in the RFP. We will negotiate pricing prior to selecting our vendor.

When we state in the RFP that we want all pages from the current BSRC website to be rebuilt in the new design, Bi-State would be responsible for updated content where needed and the vendor would be responsible for incorporating said content.
